The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

New theories and testing techniques related with Unsaturated Soil Mechanics have proven to be valuable tools to study a broad spectrum of geo-materials which includes rocks, rock fills, frozen soils and domiciliary solid wastes. These new theories and testing techniques have permitted the analysis of several traditional problems from a new perspect

The South African Education Policy Review is an invaluable historical archive. It is a source book on policies, conflicts, developments and perspectives on education policy in the period 1993 to 2000. Drawing from a selection of articles from the successful Quarterly Reviews of Education and Training produced by the Education Policy Unit of the University of Witwatersrand, this book provides readers with detailed accounts of educational changes in South Africa over the past decade. It reflects upon significant events, trends and debates and provides insightful analysis of this extremely momentous period of South Africa's history.

This book offers a unique compilation of papers in mathematics and physics from Freeman Dyson's 50 years of activity and research. These are the papers that Dyson considers most worthy of preserving, and many of them are classics. The papers are accompanied by commentary explaining the context from which they originated and the subsequent history of the problems that either were solved or left unsolved. This collection offers a connected narrative of the developments in mathematics and physics in which the author was involved, beginning with his professional life as a student of G. H. Hardy.

Mobile Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy provides readers with a rich collection of research-informed ideas for integrating mobile technologies into learning and teaching. Each chapter looks critically at the issues, related benefits and limitations of learning ubiquitously within the context of the research reported. New and emerging technologies present challenges for education causing educators to have to rethink pedagogy, boundaries and curriculum if they continue to embrace mobile technologies in their teaching.

The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level – in both the academic and the public discourse. Such allegations are made and, frequently, stronger adjectives than 'non-satisfactory' are used. Results of international test series in which South Africa has participated, such as the 2015 TIMSS tests, confirm the negative verdicts found in the (public and scholarly) discourse. This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors, one factor that can make a difference in the achievement levels obtained by learners in schools is leadership. The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation, blaming all ills in the education system and educational institutions on historical legacies and/or contextual factors (such as socio-economic deprivation in the catchment areas of schools) or poor resources and infrastructure. This collected work was inspired by a recently published spate of articles on top-performing schools (including top-performing schools in rural communities), in which it was demonstrated that good leadership can overcome such contextual and other challenges. The book unpacks the issue of leadership in South African schools from a variety of perspectives, thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa. The target audience of the book is scholars of Educational Leadership. The research reported in the chapters draw on a wide range of methodologies, including empirical (survey) research (questionnaires and interviews), critical literature surveys, and the comparative method.

Dinah and her sister Lisa are growing up in 1950s South Africa, where racial laws are tightening. They are two little girls from a dissenting liberal family. Big sister Lisa is strong and sensible, while Dinah is weedy and arty. At school, the sadistic Mrs Vaughan-Jones is providing instruction in mental arithmetic and racial prejudice. And then there's the puzzle of lunch break. 'Would you rather have a native girl or a koelie to make your sandwiches?' a first-year classmate asks. But Dinah doesn't know the answer, because it's her dad who makes her sandwiches. As the apparatus of repression rolls on, Dinah finds her own way. As we follow her journey through childhood and adolescence, we enter into one of the darker passages of twentieth-century history.

This is a collection of fifteen essays written over the last twenty years by one of Scotland's most eminent historians. The material concentrates on four broad themes in seventeenth-, eighteenth- and nineteenth-century Scottish history: Merchants, Unions and Trade; Scottish Economic Development; The Highlands; and the Rural Lowlands.

Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeshooled graduates. Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond.

A coming of age novel set in 1950s South Africa, by the author of Brother of the More Famous Jack.

The issues raised by the role of language in education are some of the most important and contentious faced by education systems across the globe. Language is embedded in the concepts of nationhood and identity, and is therefore directly linked to the very social and political fabric of a country. In a climate of increasing globalisation, development and mobility of populations, nations around the world are concerned with the tension between cultivating a sense of cultural and linguistic cohesion and making use of the linguistic diversity that exists in every country and region. This book examines the implications and impacts, the dilemmas and potential for language education in relation to education systems and wider society. Split into three key parts, it considers: \*current issues in language education, including the role of language in maintaining power and inequalities, in encouraging participation and inclusion and in challenging the status quo; \*different approaches to language education around the world; \*the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected World Yearbook of Education continues the tradition of offering a wide range of international perspectives from leading commentators on a universal

concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world.

A Learners Guide to Academic Success is an inspirational and motivational guidebook for school learners in primary and secondary school. This book is highly recommended for high school learners from Grade 8 all the way to Grade 12. This book is also a useful tool for teachers and parents as they

can read and share the message with their learners/children. Mafule is passionate about education and spends most of his time participating and running FBA projects such as career guidance, motivation sessions and mentorship in high schools and tertiary institutions in South Africa. Mafule has visited many schools across South Africa to encourage the culture of reading and academic excellence to thousands of learners as a way to help young people access higher levels of education. The schools that have been adopted under FBA have been performing very well and the learners have been able to access post-school opportunities. It is for those reasons that this book is written, to reach out to many young people of South Africa who need an inspirational voice. This inspirational and motivational guide book is a must read for all learners in South Africa who will like to achieve academic success.

Classified list with author and title index.

The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial),
