Sports Law by Adam Epstein brings the multi-billion dollar business of sport to the classroom. Epstein's book delves into the world of interscholastic, intercollegiate and professional athletics by exploring various categories of law and its relationship to sport. In addition to providing an examination of the history of the NCAA, this textbook examines relevant NCAA cases along with excerpts from the most recent NCAA bylaws in chapters throughout the book. This aspect of the text is particularly helpful for those who have an interest in pursuing a career in college sports. The book begins with an examination of the most current cases and regulations governing sports agents and how such individuals have helped to shape the sport business. The author also provides the best discussion on the importance and role of contracts in the sports industry with an exploration of various sports contracts and special contract clauses. Along with the aforementioned topics, Sports Law dives into other important legal topics in the sports industry including torts, crimes, Title IX and gender issues, social media concerns, disability issues, antitrust and labor issues involving leagues and their player associations, an examination of international issues including the Olympic Movement and more. Epstein provides abridged cases involving Andy Oliver, Jeremy Bloom, Coach Jim O'Brien and others. Sports Law brings the dynamic and exciting world of sports law to the undergraduate and graduate student. Globalised agriculture and food systems are at the crux of significant issues facing humanity from the rise in diet-related diseases to water pollution and biodiversity loss. Yet, legal scholarship on the regulation of agriculture and food is only now emerging. This timely book provides the first systematic analysis of the public international rules influencing agriculture. Each chapter considers the regulatory instruments that intersect with different components of agricultural systems from land tenure and soils through to agricultural in-puts and trade.

Derived in part from Joseph F. Healey's best-selling text *Race, Ethnicity, Gender, and Class*, this accessible 10-chapter text teaches concepts and theories through current, engaging topics, such as the Obama election and presidency and the economic recession. An analysis of minority-dominant relations is presented clearly, reinforced through case studies, and enhanced through gender and comparative perspectives. Particular emphasis is given to the history of race and ethnicity in the United States with more coverage than any other brief text.

"I have no agenda," US Supreme Court Chief Justice John Roberts proclaimed at his Senate confirmation hearing: "My job is to call balls and strikes and not to pitch or bat." This declaration was in keeping with the avowed independence of the judiciary. It also, when viewed through the lens of Roberts's election law decisions, appears to be false. With a scrupulous reading of judicial decisions and a careful assessment of partisan causes and consequences, Terri Jennings Peretti tells the story of the GOP's largely successful campaign to enlist judicial aid for its self-interested election reform agenda. Partisan Supremacy explores four contemporary election law issues—voter identification, gerrymandering, campaign finance, and the pre-clearance regime of the Voting Rights Act—to uncover whether Republican politicians and Republican judges have collaborated to tilt America's election rules in the GOP's favor. Considering cases from *Shelby County v. Holder*, which enfeebled the Voting Rights Act, to *Crawford v. Marion County Election Board*, which upheld restrictive voter identification laws, to *Citizens United* and *McCutcheon*, which loosened campaign finance restrictions, Peretti lays bare the reality of "friendly" judicial review and partisan supremacy when it comes to election law. She nonetheless finds a mixed verdict in the redistricting area that reveals the limits of partisan control over judicial decisions. Peretti's book helpfully places the current GOP's voter suppression campaign in historical context by acknowledging similar efforts by the postCivil War Democratic Party. While the modern Democratic Party seeks electoral advantage by expanding voting by America's minorities and youth, arguably hewing closer to democratic principles, neither party is immune to the powerful incentive to bend election rules in its favor. In view of the evidence that Partisan Supremacy brings to light, we are left with a critical and pressing question: Can democracy survive in the face of partisan collaboration across the branches of government on critical election issues?

Wer haftet, wenn sich selbst ausbreitende Gentechnik grenzüberschreitende Schäden verursacht? Mit Gene Drives und ähnlichen Verfahren wird es bald möglich sein, das Erbgut wild lebender Arten, Keime und Nutzpflanzen direkt in der Umwelt zu verändern. Dies könnte helfen, drängende Probleme in der öffentlichen Gesundheit, im Naturschutz und in der Ernährungssicherheit zu lösen. Allerdings bergen diese Verfahren auch das Risiko einer unkontrollierten Ausbreitung über Staatsgrenzen hinweg. Anhand einer grundlegenden Untersuchung der einschlägigen Verträge und des Völkergewohnheitsrechts zu Prävention und Haftung für grenzüberschreitende Schäden wird aufgezeigt, dass das derzeit geltende Völkerrecht dieser Herausforderung noch nicht gewachsen ist.

This book is an insight on how the healthcare quality may improve through a model of knowledge management and multi-contingency approach to or-

ganizational design. Abundant primary data about Montenegrin health system, the author's interdisciplinary approach, special emphasis on the COVID-19 pandemic, make this book thought-provoking.

Understanding Steel Design is based on an overall approach to understand how to design and build with steel from the perspective of its architectural applications. Steel is a material whose qualities have enormous potential for the creation of dynamic architecture. In an innovative approach to the reality of working with steel, the book takes a new look both at the state of tried-and-tested techniques and at emerging projects. Hundreds of steel structures have been observed, analyzed and appraised for this book. In-depth construction photographs by the author are complemented by technical illustrations created to look more closely at systems and details. Drawings supplied by fabricators allow greater insight into a method of working with current digital drawing tools.

This book provides a comprehensive examination of the ways that health policy has been shaped by the political, socioeconomic, and ideological environment of the United States. The roles played by public and private, institutional and individual actors in designing the healthcare system are identified at all levels. The book addresses the key problems of healthcare cost, access, and quality through analyses of Medicare, Medicaid, the Veterans Health Administration, and other programs, and the ethical and cost implications of advances in healthcare technology. This fully updated fourth edition gives expanded attention to the fiscal and financial impact of high healthcare costs and the struggle for healthcare reform, culminating in the passage of the Affordable Care Act, with preliminary discussion of implementation issues associated with the Affordable Care Act as well as attempts to defund and repeal it. Each chapter concludes with discussion questions and a comprehensive reference list. Helpful appendices provide a guide to websites and a chronology. PowerPoint slides and other instructional materials are available to instructors who adopt the book.

Legislating Equality describes the development of antidiscrimination policy through the lens of European integration. Through examining the development of discourses around anti-racism and historical developments in the 1980s, the book explains the role the key players who moved the legislation forward at the EU level.

Following the death of her father, journalist and hospice volunteer Ann Neumann sets out to examine what it means to die well in the United States. When Ann Neumann's father was diagnosed with non-Hodgkin's lymphoma, she left her job and moved back to her hometown of Lancaster, Pennsylvania. She became his full-time caregiver—cooking, cleaning, and administering medications. When her father died, she was undone by the experience, by grief and the visceral quality of dying. Neumann struggled to put her life back in order and found herself haunted by a question: Was her father's death a good death? The way we talk about dying and the way we actually die are two very different things, she discovered, and many of us are shielded from what death actually looks like. To gain a better understanding, Neumann became a hospice volunteer and set out to discover what a good death is today. She attended conferences, academic lectures, and grief sessions in church basements. She went to Montana to talk with the attorney who successfully argued for the legalization of aid in dying, and to Scranton, Pennsylvania, to listen to "pro-life" groups who believe the removal of feeding tubes from some patients is tantamount to murder. Above all, she listened to the stories of those who were close to death. What Neumann found is that death in contemporary America is much more complicated than we think. Medical technologies and increased life expectancies have changed the very definition of medical death. And although death is our common fate, it is also a divisive issue that we all experience differently. What constitutes a good death is unique to each of us, depending on our age, race, economic status, culture, and beliefs. What's more, differing concepts of choice, autonomy, and consent make death a contested landscape, governed by social, medical, legal, and religious systems. In these pages, Neumann brings us intimate portraits of the nurses, patients, bishops, bioethicists, and activists who are shaping the way we die. The Good Death presents a fearless examination of how we approach death, and how those of us close to dying loved ones live in death's wake.

There is a great difficulty in the way of a writer who attempts to sketch a living Constitution—a Constitution that is in actual work and power. The difficulty is that the object is in constant change. An historical writer does not feel this difficulty: he deals only with the past; he can say definitely, the Constitution worked in such and such a manner in the year at which he begins, and in a manner in such and such respects different in the year at which he ends; he begins with a definite point of time and ends with one also. But a contemporary writer who tries to paint what is before him is puzzled and a perplexed: what he sees is changing daily. He must paint it as it stood at some one time, or else he will be putting side by side in his representations things which never were contemporaneous in reality.

Ideal for neurosurgeons, neurologists, neuroanesthesiologists, and intensivists, *Monitoring in Neurocritical Care* helps you use the latest technology to more successfully detect deteriorations in neurological status in the ICU. This neurosurgery reference offers in-depth coverage of state-of-the-art management strategies and techniques so you can effectively monitor your patients and ensure the best outcomes. Understand the scientific basis and rationale of particular monitoring techniques and how they can be used to assess neuro-ICU patients. Make optimal use of the most advanced technology, including transcranial Doppler sonography, transcranial color-coded sonography, measurements of jugular venous oxygen saturation, near-infrared spectroscopy, brain electrical monitoring techniques, and intracerebral microdialysis and techniques based on imaging. Apply multimodal monitoring for a more accurate view of brain function, and utilize the latest computer systems to integrate data at the bedside. Access practical information on basic principles, such as quality assurance, ethics, and ICU design.

Promotes verbal and written communication strategies that nurses can use to effectively meet the individualized needs of an increasingly diverse patient population in an effort to enhance patient-provider communication across the entire continuum of care.

In a society that aims above all to safeguard life, how might we reckon with ethical responsibility when we are complicit in sacrificial economies that produce and tolerate death as a necessity of life? Arguing that biopower can be fully exposed only through an analysis of those whom society has "let die," Stuart J. Murray employs a series of transdisciplinary case studies to uncover the structural and rhetorical conditions through which biopower works. These case studies include the concept of "sacrifice" in the "war" against COVID-19, where emergent cultures of pandemic "resistance" are explored alongside suicide bombings and military suicides; the California mass hunger strikes of 2013; legal cases involving "preventable" and "untimely" childhood deaths, exposing the irreconcilable claims of anti-vaxxers and Indigenous peoples; and the videorecording of the death of a disabled Black man. Murray demonstrates that active resistance to biopower inevitably reproduces tropes of "making live" and "letting die." His counter to this fact is a critical stance of disaffirmation, one in which death disrupts the politics of life itself. A philosophically nuanced critique of biopower, *The Living from the Dead* is a meditation on life, death, power, language, and control in the twenty-first century. It will appeal to students and scholars of rhetoric, philosophy, and critical theory.

Fully updated, this new edition provides a comprehensive examination of the ways that health policy has been shaped by the political, socioeconomic, and ideological environment of the United States. In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' *New York Times Book Review*

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*

Understanding interpersonal relationships requires understanding actors, behaviors, and contexts. This 2002 volume presents research from a variety of disciplines that examine personal relationships on all three levels. The first section focuses on the factors that influence individuals to enter, maintain, and dissolve relationships. The second section emphasizes ongoing processes that characterize relationships and focuses on issues such as arguing and sacrificing. The third and final section demonstrates that the process of stability and change are embedded in social, cultural, and historical contexts. Chapters address cultural universals as well as cross-cultural differences in relationship behaviors and outcomes. The emergence of relational forms, such as the interaction between people and computers, is also explored. *Stability and Change in Relationships* will be of interest to a broad

range of fields, including psychology, sociology, communications, gerontology, and counselling.

One of the Best Feel-Good Books of 2021 by The Washington Post A hilarious and honest not-quite-self-help book in the vein of Buy Yourself the F\*ck-ing Lilies and I Used to Have a Plan. Every person on the planet wants their life to mean something. The problem is that you've been told there's only one way to find that meaning. In *Unfollow Your Passion*, Terri Trespicio—whose TEDx talk has more than six million views—questions everything you think you need: passion (fun, but fleeting), plans (flimsy at best), and a bucket list (eye roll), to name a few. Instead, she shows you how (and why) to flip society, culture, and the #patriarchy the bird so you can live life on your terms. Trespicio effortlessly guides you through her method of unhooking yourself from other people's agendas, boning up on the skills to move you forward, and exploring your own creativity, memory, and intuition to unlock your unique path to meaning—while also confronting the challenges that stop you in your tracks, like boredom, loss, and fear. *Unfollow Your Passion* is a fresh and fearless "must-read for anyone looking for a more meaningful life" (Mel Robbins, author of *The 5 Second Rule*).

The European Convention on Human Rights and European Union law provide an increasingly important framework for the protection of the rights of foreigners. European Union legislation relating to asylum, borders and immigration is developing fast. There is an impressive body of case law by the European Court of Human Rights relating in particular to Articles 3, 5, 8 and 13 of the ECHR. The Court of Justice of the European Union is increasingly asked to pronounce itself on the interpretation of European Union law provisions in this field. This handbook presents this European Union legislation and the body of case law by the two European courts in an accessible way. It is intended for legal practitioners, judges, prosecutors, immigration officials and nongovernmental organisations, in the EU and Council of Europe Member States.

"Ripstein's lectures, which constitute the central texts of this book, focus on the two bodies of rules governing war: the jus ad bellum, which regulates resort to armed force, and the jus in bello, which sets forth rules governing the conduct of armed force and applies equally to all parties. The lectures argue that both sets of rules constitute prohibitions rather than permissions, and that recognizing them as distinctive prohibitions can reconcile the seeming tension between them. By understanding that the central wrong of war is that war is the condition which force decides, Ripstein contends that the law and morality of war are in fact aligned; the rules governing the conduct of hostilities must apply equally to parties in the right and parties in the wrong in an armed conflict, because the prohibitions outlined in the rules governing war are prohibitions that restrain war. Ripstein's method of analysis and the substantive argument he puts forward offer an opportunity for rigorous critical engagement in subsequent essays by commentators Hathaway, Kutz, and McMahan, followed by a response from Ripstein"--

Written in a detailed and fascinating manner, this book is ideal for general readers interested in the English language.

This volume contains 16 original essays on the aesthetics of the body and bodily experience. Contributors in philosophy, sociology, dance, disability theory, race studies, feminist theory, medicine and law explore topics from beauty and sexual attractiveness to national identity and the somatic aesthetics of racialised police violence.

A critical part of the history of regionalism in Latin America and the Caribbean is to be found in the widening of the economic and functional relationships among the English-speaking Caribbean to embrace other countries in the Greater Caribbean. Bringing together a range of international experts to explain the broad thrusts of CARICOM's widening project and the opportunities and challenges it presents, the book pays particular attention to CARICOM's relations with the French Caribbean territories. Providing a review of the pan-Caribbean landscape this volume notes the impact of these new relationships on internal CARICOM affairs; inter-regional/South-South cooperation; and political and legislative changes in European metropolises of the non-independent territories. It also contemplates recent developments in the region and globally, such as political instability in Brazil and Venezuela, Britain's decision to leave the European Union and the policies of the Donald Trump administration. This edited collection will be an important resource for students and researchers in Latin American and Caribbean politics, economics, development, history and heritage.
