History & Memory explores the manifold ways in which the past shapes the present and is shaped by present perceptions. The journal focuses on a wide range of questions relating to the formation of historical consciousness and collective memory, the role of historical memory in modern and pre-modern cultures, and the relationship between historical research and images of the past in different societies and cultures.

The cult of memory: when history does more harm than good ...

Her research focuses on cultural memory, with particular interest on the tensions between individual experiences and official memories of Germany's history in the post-World War II period. Jan Assmann is Honorary Professor of Religious and Cultural Theory at the University of Konstanz, where he currently teaches, and Professor Emeritus at the University of Heidelberg, where he served until 2003.

The Long History of Memory | History Today Connection between Memory and History

I want to explain that memory is connective to history to a certain extent. It is not very related to written history because written passages allow people not to use their cognitive skills to convey history. However, it is extremely related to oral history because speaking is done from the brain process, and in other words, people's memory.

History and Memory is a historical exhibition illustrated by close to 500 objects, images, documents and early maps. All part of the Stewart Museum's collection and all on view here for the first time, they bear witness to a many-faceted past. We invite you to embark on a voyage through time that spans five centuries.

Memory And History In The

Crucial in understanding cultural memory as a phenomenon is the distinction between memory and history. Pierre Nora (1931 -) put forward this distinction, pinpointing a niche in-between history and memory. Scholars disagree as to when to locate the moment representation "took over". Nora points to the formation of European nation states.

Cultural memory - Wikipedia

The relationship between history and memory is complex and intricate. Memory is the central unifying force of human identity, while history records this force. Therefore, these texts suggest, history and memory are dependent on each other and are equally valid.

History and Memory on JSTOR

Memory is part of being human. How we remember our own past, individually and collectively, seems so natural that it is hard to imagine cultures which value memory differently. However, as Judith Pollmann's fascinating exploration of memory in early modern Europe demonstrates, memory also has a history.
