Robotics includes the design of the robots and then the construction, application and operation of the robot. It also requires a computer system for information processing such as control and sensory feedback. According to research, robotics is the number-one motivator to get students interested in science subjects, especially the STEM subjects. Some people think this is because of Transformers and other movies.

Our After-School Robotics curriculum is designed to maximize student engagement and foster an ongoing passion for robotics, programming and STEM education. This turn-key robotics program is designed to provide 5-12 hours of super-fun robotics education. Click for more info on our After-School Program.

Immerse students in the basics of robotics and coding with topics like navigation, loops, obstacle detection, color detection, object manipulation. This course includes 15 hours of curricula and 70 gamified missions with a virtual EV3 robot. Online Robotics 102
