"This is one of the best—most surprising, insightful, provocative—books I've read on the complex interplay of memory, militarism and masculinity. Japan specialists will be sure to find it thought-provoking. But it should also be 'must reading' for all students of masculinity, femininity, militarization, and soldiering. This is comparative feminist ethnography at its smartest."—Cynthia Enloe, author of *The Curious Feminist: Searching for Women in a New Age of Empire* "Uneasy Warriors presents a rare and intimate view into the psychological and social workings of the Self-Defense Forces. As the US and Japanese governments gear up to change the Japanese anti-war constitution, this book is even more important for understanding what the consequences will be."—Catherine Lutz, author of *Homefront: A Military City and the American 20th Century* "Sabine Frühstück expertly describes the ambiguous status of the Japanese Self Defense Forces. The book reveals insights gained from several years of sustained research, including a stint "in uniform" at an army base near Mt. Fuji. Frühstück's observations about the SDF's public relations emphasis on "cute" popular cultural media are timely and trenchant, as are her analyses of the militarization of masculinity and femininity."—Jennifer Robertson, author of *Takarazuka: Sexual Politics and Popular Culture in Modern Japan*

The variety and increasing availability of hypermedia information systems, which are used in stationary applications like operators' consoles as well as mobile systems, e.g. driver information and navigation systems in automobiles form a foundation for the mediatisation of the society. From the human engineering point of view this development and the ensuing increased importance of information systems for economic and private needs require careful deliberation of the derivation and application of ergonomics methods particularly in the field of information systems. This book consists of two closely intertwined parts. The first, theoretical part defines the concept of an information system, followed by an explanation of action regulation as well as cognitive theories to describe man information system interaction. A comprehensive description of information ergonomics concludes the theoretical approach. In the second, practically oriented part of this book authors from industry as well as from academic institutes illustrate the variety of current information systems taken from different fields of transportation, i.e. aviation, automotive, and railroad. The reader thus gains an overview of various applications and their context of use as well as similarities and differences in design. This does not only include a description of the different information systems but also places them in the context of the theories and models, which were presented in the first part of this book.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on

citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

This edited book examines the management of diversity and inclusion in the military. Owing to the rise of asymmetric warfare, a shift in demographics and labor shortfalls, the US Department of Defense (DoD) has prioritized diversity and inclusion in its workforce management philosophy. In pursuing this objective, it must ensure the attractiveness of a military career by providing an inclusive environment for all personnel (active and reserve military, civilian, and contractors) to reach their potential and maximize their contributions to the organization. Research and practice alike provide substantial evidence of the benefits associated with diversity and inclusion in the workplace. Diversity and inclusion programs are more strategic in focus than equal opportunity programs and strive to capitalize on the strengths of the workforce, while minimizing the weaknesses that inhibit optimal organizational performance. This new book provides vital clarification on these distinct concepts, in addition to offering concrete best practices for the successful management of diversity and inclusion in the workplace. Written by scholars and practitioners, each chapter addresses major areas, raises crucial issues, and comments on future trends concerning diversity and inclusion in the workplace. The book will be of great interest to students of military studies, war and conflict studies, business management/HRM, psychology and politics in general, as well as to military professionals and leaders. The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, the *Register of Debates in Congress (1824-1837)*, and the *Congressional Globe (1833-1873)*

The publication describes the evaluation, in terms of speed and accuracy, of four configurations of procedures for inputting information into a semi-automated information processing system. Sixty US-MA Prep School enlisted men were given an experimental task requiring each to translate 35 free-text messages into computer-acceptable terminology. Accuracy and speed of two input procedures were each compared under two conditions of verification. In one procedure, the subjects translated the incoming message onto a paper format before transcribing on a CRT screen (off-line). In the other procedure, the message was transcribed directly on the CRT screen (on-line). In the unverified condition, one man performed the input operation without error check; in the verified condition, two men translated the same message, compared their translations, and resolved differences before entering the information into the data base. Performance results under the four experimental conditions were also compared with a similar 7th Army TOS procedure in which a message is translated onto a paper format and the unverified message is copied on the CRT screen by the UIOD (user input-output device) operator.
