Something has gone seriously wrong with the American economy. The American economy has experienced considerable growth in the last 30 years. But virtually none of this growth has trickled down to the average American. Incomes have been flat since 1985. Inequality has grown, and social mobility has dropped dramatically. Equally troubling, these policies have been devastating to both American productivity and our long-term competitiveness. Many reasons for these failures have been proposed. Globalization. Union greed. Outsourcing. But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U.S. in delivering broad middle-class prosperity. And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership. In *What Went Wrong*, George R. Tyler, a veteran of the World Bank and the Treasury Department, takes the reader through an objective and data-rich examination of the American experience over the last 30 years. He provides a fascinating comparison between the America and the experience of the "family capitalism" countries: Australia, Austria, Belgium, Denmark, France, Germany, the Netherlands, and Sweden. Over the last 30 years, they have outperformed the U.S. economy by the only metric that really matters—delivering better lives for their citizens. The policies adopted by the family capitalist countries aren't socialist or foreign. They are the same policies that made the U.S. economy of the 1950s and 1960s the strongest in the world. *What Went Wrong* describes exactly what went wrong with the American economy, how countries around the world have avoided these problems, and what we need to do to get back on the right track.

NOMINATED FOR THE 2019 NATIONAL BOOK CRITICS CIRCLE AWARD FOR AUTOBIOGRAPHY ONE OF NPR'S BEST BOOKS OF THE YEAR SHORTLISTED FOR THE BAILLIE GIFFORD PRIZE FOR NONFICTION SHORTLISTED FOR THE RATHBONES FOLIO PRIZE LONGLISTED FOR THE RSL ONDAATJE PRIZE The acclaimed New York Times bestselling author of *The Vanishing Velazquez* shares a riveting true story "with as many twists and turns as any mystery" (Los Angeles Times) describing her mother's mysterious kidnapping as a toddler in a small English coastal village—"an incredible and incredibly unusual book about family secrets" (Nick Hornby, *The Believer*). In the fall of 1929, when Laura Cumming's mother was three years old, she was kidnapped from a beach on the Lincolnshire coast of England. There were no screams when she was taken, suggesting the culprit was someone familiar to her, and when she turned up again in a nearby village several days later, she was happy and in perfect

health. No one was ever accused of a crime. The incident quickly faded from her memory, and her parents never discussed it. To the contrary, they deliberately hid it from her, and she did not learn of it for half a century. This was not the only secret her parents kept from her. For many years, while raising her in draconian isolation and protectiveness, they also hid the fact that she'd been adopted, and that shortly after the kidnapping, her name was changed from Grace to Betty. "Both page-turning and richly absorbing" (The Providence Journal), *On Chapel Sands* (originally titled *Five Days Gone*) unspools the tale of Cumming's mother's life and unravels the multiple mysteries at its core. Using photographs from the time, historical documents, and works of art, Cumming investigates this case of stolen identity with the toolset of a detective and the unique intimacy of a daughter trying to understand her family's past and its legacies. "Brilliant" (The Guardian) and "a story told with such depth of feeling and observation and such lyrical writing I couldn't put it down" (Anna Quindlen), *On Chapel Sands* is a masterful blend of memoir and history, an extraordinary personal narrative unlike any other.

From reviews of the previous edition: 'Provides a wealth of information ... graphically illustrates the need for practitioners to be thoroughly knowledgeable.' Toni Belfield, Director of Information, Family Planning Association. The world's population is increasing dramatically. At levels over 7 billion, rising annually by over 83 million (with births outstripping deaths by a factor of c. 2.4) the toll this imbalance takes on the environment, developing economies and resources (healthcare, education, rates of poverty) and the lives of women in the poorer parts of the world is increasingly unsustainable. Even in the developed world there is still an unacceptably high rate of unplanned pregnancies, demonstrating that appropriate education at both local and global levels about the full range of available contraception is essential.
