E9A9DO - ELLISON CHEN

Have you ever seen a piece of gorgeous furniture and thought "I wish I could build that!"? Well now you can! This book is the third in a series of Handbooks being published by the Popular Mechanics Company. Like the magazine, and like the other books in this series, it is "written so you can understand it." The purpose of these handbooks is to supply a growing demand for high-class, up-to-date and accurate text-books, suitable for home study as well as for class use, on all mechanical subjects. The text and illustrations, in each instance, have been prepared expressly for this series by well known experts and edited to ensure an easy flow of learning and building of the projects.

An essential tool for dealers and collectors trying to identify makers, this book includes histories of the major mission furniture companies including Stickley, Limbert, Roycroft, Young, Harden, Leavens, and others. Provides identification clues and a glossary of terms. This excellent reference source is a must for dealers, collectors, interior designers, and anyone interested in the American Arts and Crafts Movement.

Provides instructions for building furniture in the "Mission" style, including tables, lamps, bookcases, and chairs.

This book is part of the TREDITION CLASSICS series. The creators of this series are united by passion for literature and driven by the intention of making all public domain books available in printed format again - worldwide. At tredition we believe that a great book never goes out of style. Several mostly non-profit literature projects provide content to tredition. To support their good work, tredition donates a portion of the proceeds from each sold copy. As a reader of a TREDITION CLASSICS book, you support our mission to save many of the amazing works of world literature from oblivion.

The piano bench shown in the accompanying picture was made of black walnut and was finished natural. The finish was applied in the following manner: First, all the parts were well scraped and sandpapered, then the surface was covered with a coating of boiled linseed oil. After this had stood several hours, or until it had had time to penetrate the wood, the surplus liquid was wiped off with a flannel cloth. After the oil had stood for 48 hours, a thin coat of shellac was applied and allowed to harden overnight. The next morning this shellac was sandpapered lightly with No. 00 paper and a coat of floor wax was applied according to the directions which are found upon every can. Two more coats of wax were applied after intervals of half an hour and the finish was completed. The effect is very pleasing. The oil brings out the rich color of the wood and the shellac and wax serve to preserve the color. The following stock is needed: With the exception of the legs all the stock is specified mill-planed to thickness upon two surfaces. The legs are specified planed on four sides. Square the legs to length and the rails, stretcher, slats, etc., to width and

length.

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. "THIS book is one of the series of handbooks on industrial subjects being published by the Popular Mechanics Co. Like the magazine, these books are "written so you can understand it," and are intended to furnish information on mechanical subjects at a price within the reach of all. "The texts and illustrations have been prepared expressly for this Handbook Series, by experts; are up-to-date, and have been revised by the editor of Popular Mechanics."

Nearly 100 of the finest, most desirable pieces of Mission furniture that you could ever want to make: chairs, desks, sideboards, buffets, and many smaller pieces. 213 illustrations, including measured drawings.

Mission style has withstood the test of time. In homes across America and around the world, Mission furniture creates a look and feel to a home that few others styles can—elegant and homey, all at once. This is a classic book of Mission-style furniture, filled with plans for the do-it-yourselfer and inspiration for architects and designers. Included are chairs, tables, desks, beds, shelves, and other more unusual items like wastepaper baskets, clocks, music stands, and even a porch swing. Each project includes a cutting list and detailed, measured drawings of each furniture piece, as well as the general order of work along with handy finishing tips.

This book is one - the second - of the series of Handbooks on industrial subjects being published by the Popular Mechanics Company. Like Popular Mechanics Magazine, and like the other books in this series, it is "written so you can understand it." The purpose of Popular Mechanics Handbooks is to supply a growing demand for high-class, up-to-date and accurate text-books, suitable for home study as well as for class use, on all mechanical subjects. The text and illustrations, in each instance, have been prepared expressly for this series by well known experts, and revised by the editor of Popular Mechanics.

Mission Furniture How to Make It, Part 3: Large Print By H. H. Windsor A mission chair for the dining room, a very comfortable and attractive porch chair, a well-proportioned mission library table, a beautiful roll top desk, a handsome settee, a mission sideboard - the projects go on and on, up to nearly 100 of the finest, most desirable pieces of mission furniture that you could ever want to make. Each project features accurate measured drawings and an illustration of the completed piece, while all the instructions have been prepared by experts and written in a clearly understandable style.

Excerpt from Mission Furniture, Vol. 1: How to Make It A library light stand of pleasing design and easy construction is made as follows: Square up a piece of white oak so that it shall have a width and thickness of 1 3/4 in. With a length of 13 in. Square up two pieces of the same kind of material to the same width and thickness, but with a length of 12 in. Each. Square up two pieces to a width and length of 8 in. Each with a thickness of 1 in. If a planing mill is near, time and patience will be saved by ordering one piece 1 1/8 in. Square and 40 in. Long, two pieces 1 1/8 in. Thick and 3 in. Square, all planed and sandpapered on all surfaces. The long piece can then be cut at home to the lengths specified above. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Henry Haven Windsor published this precious book on creating

furniture in 1909 in the collection Handbooks. Nowadays reading this simple manual allows creating the most beautiful chairs, tables, book racks etc. of the beginnings of the 19th century, avoiding ordinary do-it-yourself books. This edition contains several accurate instructions for creating 33 different types of furniture, moreover, this publication contains more than 70 illustrations and detailed schemes. Eventually, in the last part of this book, there's a brief chart listing 40 distinct styles of chairs from Egyptians to the Contemporary period, with descriptions and illustrations. This interactive digital edition includes Interactive Notes and Chapters, News about the Author, News about the Book, a very interesting Tag cloud of the Book and a link to connect to the Goodreads community to ask questions and share comments and opinions.

A library light stand of pleasing design and easy construction is made as follows: Square up a piece of white oak so that it shall have a width and thickness of 1-3/4 in. with a length of 13 in. Square up two pieces of the same kind of material to the same width and thickness, but with a length of 12 in. each. Square up two pieces to a width and length of 3 in. each with a thickness of 1-1/8 in. If a planing mill is near, time and patience will be saved by ordering one piece 1-3/4 in. square and 40 in. long, two pieces 1-1/8 in. thick and 3 in. square, all planed and sandpapered on all surfaces. The long piece can then be cut at home to the lengths specified above.

Learn to make classic pieces of Mission-Style furniture. MISSION FURNITURE: HOW TO MAKE IT, PART I, by H. H. Windsor presents 29 different pieces of furniture with illustrations, including detailed plans.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

With its simple, organic charm and timeless natural beauty, Mission-style furniture has enjoyed continued popularity for over a century. For craftsman and non-craftsman alike, perhaps the most cherished examples of Mission-style furniture are lamps. Mission Style Lamps and Shades takes readers through the entire process of designing, planning, and constructing radiant Mission-style lamps and shades. For countless craftspeople, John Duncan Adam's Mission Style Lamps and Shades has been the go-to guide for those wanting to build their own lamps and shades. The book contains a wide array of do-it-yourself projects, from reading lamps to chandeliers, desk lights to drop lights, complete with easy-to-follow instructions, measurements, and more than 75 diagrams, drawings, and illustrations. With straightforward language, Adams takes the reader through techniques like trimming a block of wood, using a soldering iron, and designing opulent shades with art glass. With Adams's expert guidance, the beginning craftsman will have no trouble creating a one-of-a-kind, fully functional, decorative lamps and shade.

Mission Furniture: How to Make It, Part 2 By H. H. Windsor

Have you ever seen a piece of gorgeous furniture and thought "I wish I could build that!"? Well now you can! This book is the second in a series of Handbooks being published by the Popular Mechanics Company. Like the magazine, and like the other books in this series, it is "written so you can understand it." The purpose of these handbooks is to supply a growing demand for high-class, up-to-date and accurate text-books, suitable for home study as well as for class use, on all mechanical subjects. This book is a handbook on industrial subjects being published by the Popular Mechanics Co. Like the magazine, these books are "written so you can understand it," and are intended to furnish information on mechanical subjects at a price within the reach of all. The texts and illustrations have been prepared expressly for this Handbook Series, by experts; are up-to-date, and have been revised by the editor of Popular Mechanics. The dimensions given in the stock list contained in the description of each piece of furniture illustrated in this book call for material mill-planed, sanded and cut to length. If the workman desires to have a complete home-made article, allowance must be made in the dimensions for planing and squaring the pieces. S-4-S and S-2-S are abbreviations for surface four sides and surface two sides.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.
