From the creator of the all-time classic VERY HUNGRY CATERPILLAR comes a sweetly resonant story about the power of friendship--now available for little hands When a best friend moves away, it can be painful for the child who is left behind. But the spunky boy in this upbeat story makes up his mind to find his missing playmate. Friends tells a story alive with love and perseverance, brightened with vibrant art and Eric Carle's trademark fostering of imagination. Praise for Friends: "This story of love and determination is illustrated with Carle's extraordinary signature artwork. For anyone who would cross rivers and scale mountains for a beloved friend, this warmhearted story will create an emotional response. Young readers will learn the value of friendship and its many challenges." —School Library Journal "Often dynamic and quite beautiful . . . A picture-book tribute to the strength of childhood friendships." —Booklist

An offbeat penguin shows his peers the power of individuality in this humorous tale from the author of Pookins Gets Her Way. Tacky is an odd bird. He likes to do splashy cannonballs and greet his companions with a loud "What's happening?" In fact, he's something of an eccentric, which wouldn't be a problem if all the other penguins weren't such...conformists. When intimidating visitors invade their peaceful, nice, icy land, it'll take a lot more than a bunch of perfect penguins to save the day. Thank goodness Tacky's such an odd bird! "This book is must reading for any kid—or grown-up—who refuses to follow the pack."—Publishers Weekly

Do animals have mothers too? Of course they do - just like me and you! Meet the little joey whose Kangaroo mother carries him in her pouch, and the cygnet who rides on the back of the mother swan, just two members of Eric Carle's animal family. Animal ba-

bies with their caring and affectionate mothers come to life in Carle's vibrant collage. The playful question and answer text invites children and adults to read aloud together. Repetition of key phrases helps preschoolers take the first step towards reading readiness. The gamelike format makes it easy to discover more about the world of nature and to learn the common names of some familiar - and not-so-familiar - animals. At the back of the book there is a special page listing the correct, but sometimes surprising names of animal babies, their parents and groups.

How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of

Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

The Neuroscience of Animal Intelligence provides a critical survey of the physiological approach to learning, memory, and intelligence in nonhuman animals. The emphasis throughout is on the

implications of physiological research for theories of intelligent processes in intact animals. An introductory chapter examines the historical and theoretical background of the physiological work on learning and memory. Organized according to psychological topics, subsequent chapters proceed from simpler to more complex preparations and processes, emphasizing the implications of the work for behavioral theories. The book explores: non-associative learning, in the marine invertebrate *Aplysia*, and in the spinal cord and brain of vertebrates; associative learning, concentrating on the invertebrates *Aplysia* and *Hermisenda*, and on mechanisms in the cerebellum and hippocampus of mammals; the processing of contextual information, with emphasis on the special role of the hippocampus and the frontal cortex; the fractionation of memory, concentrating on the hippocampus and associated limbic structures. After introducing two new approaches - comparative neurology and computational neuroscience - that complement the preceding chapters, *The Neuroscience of Animal Intelligence* concludes with a discussion of the role of the neocortex in perception and in general intelligence. Integrating neurobiology and issues of memory in the context of the neuroscience of animal intelligence, Macphail synthesizes behavioral approaches to the study of learning with the search for the underlying physiological mechanisms and anatomical localization of memory.

Humans offer a helping hand. Sea turtles face many dangers as they grow, eat, travel, and breed. In this dramatization of one female turtle's challenges, acclaimed nature writer April Pulley Sayre highlights the role that humans have in helping this endangered species. Previously published, this story has been re-illustrated by Annie Patterson. Information on sea turtle conservation efforts and the seven species of sea turtles is included.

In simple, powerful words and vibrant illustrations, Donald Crews evokes the rolling wheels of that childhood favorite: a train. This Caldecott Honor Book features bright colors and bold shapes. Even a child not lucky enough to have counted freight cars will feel he or she has watched a freight train passing after reading *Freight Train*. Donald Crews used childhood memories of trains seen during his travels to his grandparents' farm in the American South as the inspiration for this timeless favorite. *New York Magazine's The Strategist* chose *Freight Train* as one of the "Best (Nonobvious) Baby Books to Bring to a Shower." As *The Strategist* stated: "The Caldecott Honor Book is spare and minimal in both art and text and follows the journey of a freight train and all its cars until it rolls off the page and into the distance. It's a good

way to learn all the different names of train cars, too." Red caboose at the back, orange tank car, green cattle car, purple box car, black tender and a black steam engine . . . freight train.

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, *The Power of Now* is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

This series teaches students about the various ways in which objects can be described and compared. Color photos accompany the simple sentences on each page.

When a child writes a report about a seahorse, the creature himself has a few things to say about the animals he's compared to. First of all, he is nothing like a land horse. His tail is much more useful than an opossum's tail. And his snout fits his face perfectly—unlike an anteater's snout. Delivering fascinating facts along

the way, the seahorse sets the record straight about what makes his species so special.

"Please be soft," says Father. "Please do whisper," says Mother. Emily doesn't mean to be loud. But whenever she says anything in her Emily voice, windows crack, plates shatter, and the neighbors can't believe their ears. Emily tries and tries but she just can't be quiet. It seems like there's nowhere she fits in...until the day she sees a ship with a sign that says: LOUD HELP NEEDED. NOW. Nobody's louder than Emily! So she sets sail for an adventure on the high seas, looking for a place where she can be herself. Loud Emily. Climb aboard for a memorable tall tale of ships, whales, and a little girl with a very BIG voice.

Carle is one of the most beloved illustrators of children's books. This retrospective is more than just an appreciation of his art, however. The book also contains an insightful autobiography illustrated with personal photographs, an anecdotal essay by his longtime editor, a photographic essay on how Carle creates his collages, and writings by Carle and his colleagues. Still, it is the artwork in the oversize volume that seizes the imagination. More than 60 of his full-color collage pictures are handsomely reproduced and serve as a statement of Carle's impressive talent. - Booklist

A spider, blown by the wind to a fence post near a farm yard, begins to build her web and cannot be distracted from the task at hand--not by the horse, cow, sheep, goat, or dog. But when the rooster asks if she wants to catch a pesky fly, the busy spider is able to catch it in her web immediately!
