SAS Programming with Medicare Administrative Data is the most comprehensive resource available for using Medicare data with SAS. This book teaches you how to access Medicare data and, more importantly, how to apply this data to your research. Knowing how to use Medicare data to answer common research and business questions is a critical skill for many SAS users. Due to its complexity, Medicare data requires specific programming knowledge in order to be applied accurately. Programmers need to understand the Medicare program in order to interpret and utilize its data. With this book, you'll learn the entire process of programming with Medicare data—from obtaining access to data; to measuring cost, utilization, and quality; to overcoming common challenges. Each chapter includes exercises that challenge you to apply concepts to real-world programming tasks. SAS Programming with Medicare Administrative Data offers beginners a programming project template to follow from beginning to end. It also includes more complex questions and discussions that are appropriate for advanced users. Matthew Gillingham has created a book that is both a foundation for programmers new to Medicare data and a comprehensive reference for experienced programmers. This book is part of the SAS Press program.

Becoming an Engaged Campus offers campus leaders a systematic and detailed approach to creating an environment where public

engagement can grow and flourish. The book explains not only what to do to expand community engagement and how to do it, but it also explores how to document, evaluate, and communicate university engagement efforts. Praise for *Becoming an Engaged Campus* "This provocative yet exceedingly practical book looks at all of the angles and lays bare the opportunities and barriers for campus-community engagement while providing detailed pathways toward change. This comprehensive treatise marks a significant shift in the literature from the what and why of public engagement to the how. It is simply superb!"—Kevin Kecskes, associate vice provost for engagement, Portland State University "Becoming an Engaged Campus is an essential guidebook for university leaders. It details the specific ways that campuses must align all aspects of the institution if they are to be successful in the increasingly important work of community outreach and engagement."—George L. Mehaffy, vice president for academic leadership and change, American Association of State Colleges and Universities "Most colleges and universities make the rhetorical claim of community engagement; this book is an excellent primer on how to transform the rhetoric into reality. The authors do not speak in abstract terms. They describe the specific structures, policies, and programs that have made Northern Kentucky University a national model of how a large urban university can transform its impact on the region it is supposed to serve."—William E. Kirwan, chancellor, University System of Maryland

The question of what types of data and evidence can be used is one of the most important topics in linguistics. This book is the first to comprehensively present the methodological problems associated with linguistic data and evidence. Its originality is two-

fold. First, the authors' approach accounts for a series of unexplained characteristics of linguistic theorising: the uncertainty and diversity of data, the role of evidence in the evaluation of hypotheses, the problem solving strategies as well as the emergence and resolution of inconsistencies. Second, the findings are obtained by the application of a new model of plausible argumentation which is also of relevance from a general argumentation theoretical point of view. All concepts and theses are systematically introduced and illustrated by a number of examples from different linguistic theories, and a detailed case-study section shows how the proposed model can be applied to specific linguistic problems. Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)
