Explore classroom activities, puzzles, teacher resources

#### **National Geographic Readers: Koalas by Laura Marsh ...**

Koalas are marsupials, related to kangaroos. Most marsupials have pouches where the tiny newborns develop. A koala mother usually gives birth to one joey at a time. A newborn koala is only the size of a jelly bean. Called a joey, the baby is blind, naked, and earless. As soon as it's born, this tiny creature makes its way from the birth canal to its mother's pouch.

With a seemingly permanent half-smile on their face, koalas are appealing to boys and girls alike. Filled with adorable photos, and carefully leveled text, this level 1 reader introduces beginning readers to these furry creatures, from cub to adult, exploring where they live, what they eat, and even the way they say "hello" —by touching noses!

Sleepy Behavior and Eucalyptus Diet. Koalas live in eastern Australia, where the eucalyptus trees they love are most plentiful. In fact, they rarely leave these trees, and their sharp claws and opposable digits easily keep them aloft. During the day they doze, tucked into forks or nooks in the trees, sleeping for up to 18 hours. When not asleep...
