Scholars and students in law and media from Europe and the US consider the theoretical framework of copyright law; globalization, convergence, and divergence; copyright and the new technologies; protecting traditional knowledge and culture; and copyright, corporate power, and human rights.

'The essays in these volumes are clearly written and of readable length. . . the latest installments in the New Directions series will be of particular use to researchers interested in traditional cultural expressions and trade law but other scholars of copyright and media will find papers to interest them.'--Daithí Mac Síthigh, Scripted

The nine studies comprising volume 1 explore the theoretical framework of copyright law, underlying issues such as the moral justifications for copyright and the appropriateness of copyright in a globalized world, and the convergence and divergence of intellectual property rights in the context of globalization.

New directions in copyright law . By . Abstract. Book synopsis: As one of the most flexible of the intellectual property rights, copyright law is under constant pressure to adapt and expand in the face of new and sometimes unforeseen challenges and developments.

The interface between copyright law and the burgeoning of new technologies is considered through a range of theoretical and methodological approaches. In the fourth part of the volume legal theorists address issues around open access, open source, free software, and the implications of network theory for the relationship between copyright law and the Internet.

New copyright laws police the unrestrained copying of commodities that undermine the profits (for some) that were anticipated from the new form of manufacture/service, and perhaps imperil investment in its further dissemination.
