In July 1943 the scorched and bloody body of multi-millionaire businessman, Sir Harry Oakes, was found in a partly burned bed in his home in the Bahamas. He had died of wounds to the head caused by a weapon never found or clearly identified. Four small, identical holes in a pattern almost square had penetrated the mastoid bone above his left ear. Within forty-eight hours, after the most cursory of investigations, Oakes' son-in-law, Alfred de Marigny, was arrested and charged with the murder. The trial lasted thirty-two days. Once it was over, even though de Marigny was acquitted, his life lay in ruins. The authorities in Nassau had advised all British and friendly territories that de Marigny was to be regarded as a murderer at large, and it was four years before he could get a visa to enter the United States, where he finally made his home. Now, for the first time, de Marigny tells his own story, revealing what really happened in the Bahamas in July 1943 and in the months that followed. Even as war engulfed the globe, Nassau was a magnet for society's rich and spoiled, presided over by the Duke and Duchess of Windsor. It is against this extraordinary background of wealth and privilege that the story unfolds, a complex tale of business intrigue, broken promises and acts of betrayal; of currency smuggling and conduct close to treason, and of one man's untiring efforts to clear his name.

An internationally acclaimed scholar, who has dedicated more than fifty years of her life to understanding the Islamic world. An-nemarie Schimmel examines a much-misunderstood feature of Is-

lam: the role of women. Schimmel is critical of those--especially Western feminists--who take Islam to task without taking the time to comprehend the cultures, language, and traditions of the many societies in which Islam is the majority religion. Shattering stereotypes, Schimmel reconstructs an important but little-known chapter of Islamic spirituality. With copious examples, she shows the clear equality of women and men in the conception of the Prophet Muhammad, the Quran, the feminine language of the mystical tradition, and the role of holy mothers and unmarried women as manifestations of God. This work is studded with luminous texts from Arabic, Turkish, Persian, and particularly Indo-Muslim cultures, which reveal how physical love can give expression to the highest forms of mysticism.

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in

a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author elucidates the significance of silence in pedagogical contexts.
