Although internal medicine is constantly evolving, there are basic principles and thought processes that remain the essence of our specialty. Learning the facts is only the beginning. Medical students must develop their skills in deductive reasoning and synthesize these facts, weighing the pros and cons of the evaluation and management choices ...

This NMS book provides list after list of information about just about every topic in internal medicine, but does little to clarify what information is most appropriate. For example, in approaching a patient with an apparent GI ulcer, the book lists out all the diagnostic options without prioritizing them.
