Inclusion in the classroom is a growing phenomenon that covers a range of areas and subjects; with prominent discussions about race, gender, sexual orientation, and age, today's world is increasingly focused on making sure education is designed so everyone can succeed. Inclusivity in special education is particularly important as special education covers a wide range of students, including those with physical, intellectual, and behavioral disabilities. As more research and information surrounding best practices, new technologies, and teacher education for special education is considered, it is imperative that teachers and administrators remain up to date on these innovative techniques. The Research Anthology on Inclusive Practices for Educators and Administrators in Special Education is a critical reference source that includes abundant research on all aspects of inclusion in special education as well as the latest trends, research, and studies to provide a comprehensive look at the current state of special education. Covering topics such as accessibility, educational models, teacher training, and assistive technologies, it is ideal for special education teachers, academicians, in-service teachers, pre-service teachers, professors, students, researchers, professionals, administrators, curriculum developers, instructional designers, and policy-makers.

Now in its eighth edition, *The Moral of the Story* continues to bring understanding to difficult concepts in moral philosophy through storytelling and story analysis. The monograph *From Formal to Non-Formal: Education, Learning and Knowledge* presents a review of selected aspects of non-formal education and learning, and is written by António Fragoso, Petra Javrh, Polona Kelava, Taja Kramberger, Nives Ličen, Marko Radovan, Drago B. Rotar, Klara Skubic Ermenc, Tadej Vidmar, Igor Ž. Žagar, Tihomir Žiljak and Sabina Žnidaršič Žagar. These authors are all anthropologists, sociologists, philosophers, political scientists, education scientists and historians of education. As such, the subject covered is a broad one and reaches into fields that at first glance appear to be very distant from each other. It is precisely this diversity of approaches that offers the best promise of new findings regarding non-formal learning, education and knowledge and that represents a fruitful basis for further reflection on these topics. The monograph thus offers answers to some starting points for reflection on the increasingly varied dimensions and possibilities of formal, non-formal and informal knowledge and learning.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Depicting a story told through poetry, *Surviving You*, touches on many topics about a relationship transition from love to pain with lies dressed like the truth falling for someone who pretended through it all then feeling the truth arise over time knowing in the end it was the best thing that could have ever happened. Treading with caution, the contents of the book discusses stories with mental health, sexual assault, love, abusive relationships, heartbreak, trauma and everything in-between, in the hopes to spread awareness on these heavy topics. "I write this book for the hearts that need mending, the voices that need to be heard, and the souls that need healing. And once upon a time, in the thick of healing, I survived."

Short Description A Brilliant guide to the new eCitizen qualification from the ECDL Foundation - giving everything you need to know to pass the eCitizen exam, when you need it ! Long Description The new eCitizen qualification has been developed by the ECDL Foundation to meet the need for individuals who have little knowledge of computer use and allow them to develop an understanding and experience of the Internet and inclusion within the Information Society. The tasks contained within the course are designed to allow the candidate to become more involved within an on-line culture and are developed to allow the candidate to gain a practical experience of some of the opportunities the Internet presents. Therefore, to supplement the basic IT skills which are presented within the course there is a close link to a number of real applications such as online banking and information retrieval to allow the candidate to truly interact with the Internet. eCitizen has been carefully tailored to work alongside government targets to provide UK citizens with the web skills they require to improve their quality of life:- Foundation Skills - The technological skills needed to use the Internet (e.g.: open a browser, open and send an email)- Information Searching - Getting reliable information from the Internet (e.g.: use a search engine, be aware of the safety of personal data. Use information such as news, government...)- e-Participation - Interaction and involvement with the web (e.g.: online forms, e-commerce, book a flight, use e-learning materials) Throughout there is an understanding developed of personal safety (credit cards, Spam, personal data)

The rushed development of information and communication technologies and their impact on the world of learning in the last de-

cade have profoundly changed the paradigms, scenarios and values at all levels of education. The professionalization of tools and practices, in addition to the consolidation of academic and practical knowledge, has been a major continuing issue throughout these years. The annual conferences of the largest European professional community in distance and e-learning have been setting the landmarks in this process. The selection from this unique knowledge pool demonstrates the deepening and consolidation of knowledge and experience. This book presents the developments in the field of open, distance and e-learning, through new technologies, methodologies and tools, which have profoundly changed the paradigms, scenarios and values at all levels of education over the last decade.

This book gathers the papers presented at the XXIX International Congress INGEGRAF "The digital transformation in graphic engineering," which was held in Logroño, Spain on June 20-21, 2019. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design; innovative design; and computer-aided design. Further topics covered include virtual simulation and reverse engineering; additive manufacturing; product manufacturing; engineering methods in medicine and education; representation techniques; and design and modeling for nautical, engineering and construction, aeronautics and aerospace contexts. The book is divided into six main sections, reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support them in their daily work, but will also stimulate new research directions, advanced applications of the methods discussed, and future interdisciplinary collaborations.
