(PDF) Nutraceuticals and Functional Foods

Nutraceuticals or Functional Foods can play an important role in health and nutrition and marketing development opportunities exist for these products. Apart from disease prevention, Nutraceuticals can play an important role in disease management and therapy.

Nutraceuticals or Functional Foods - Food Facts

The main difference between functional foods and nutraceuticals is that functional foods are the food with bioactive compounds such as beta-carotene, lycopene, resveratrol, ferulic acid, etc. whereas nutraceuticals are the bioactive compounds found in fortified food, dietary supplements or herbal products. Furthermore, functional foods have naturally-occurring bioactive compounds in the food while nutraceuticals can come as pills, capsules or liquids.

What is the Difference Between Functional Foods and ...

In fact, the term nutraceutical, as coined by Stephen DeFelice, M.D., founder of the Foundation for Innovation in Medicine in Cranford, N.J., covers the gamut--including dietary supplements, those fortified foods that are enriched with nutrients not natural to the food such as orange juice with added calcium, functional foods and medical foods. Thus, nutraceuticals are more correctly defined as parts of a food or a whole food that have a medical or health benefit, including the prevention ...

Functional Foods & Nutraceuticals - Chiro

Hypolipidemic nutraceuticals and functional foods help improve serum lipid profiles as reducing total cholesterol, triglyceride, and low-density lipoprotein cholesterol, while elevating high-density lipoprotein cholesterol. The effectiveness of omega-3 polyunsaturated fatty acid, phytosterols, dietary fiber, and tea catechin in management of ...

Nutraceuticals and functional foods in the management of ...

The food industry has started to market products labelled as "functional foods." Although many review articles have focused on individual dietary variables as determinants of CVD that can be modified to reduce the risk of CVD, the aim of this current paper was to examine the impact of functional foods in relation to the development and progression of CVD.

Functional Foods and Nutraceuticals in the Primary ...

Here are some examples of conventional functional foods: Fruits: berries, kiwi, pears, peaches, apples, oranges, bananas. Vegetables: broccoli, cauliflower, kale, spinach, zucchini. Nuts: almonds, cashews, pistachios, macadamia nuts, Brazil nuts. Seeds: chia seeds, flax seeds, hemp seeds, pumpkin ...

Functional Foods: Definition, Benefits, and Uses

Nutraceuticals or functional foods are foods that provide both health benefits to reduce the risk of chronic diseases and basic nutrition. Examples of nutraceuticals are natural foods, including antioxidants, dietary supplements, fortified dairy products, and citrus fruits, and vitamins, minerals, herbals, milk, and cereals.
