Engines That Time Forgot - Hot Rod Network

Buick's aluminum 215-cu.in. V-8 is one of the great engines of all time, weighing in at just 324 pounds sans fluids and pumping out 185hp and 230-lbs.ft. of torque. GM management wasn't impressed, however, and sold all of the engine's tooling to Rover who produced versions of it into the 1990s.

Also note that, judged strictly by horsepower, the best 215 seems to be the Olds Jetfire at 215 H.P. / 300 lbs torque. This engine was the first domestic turbocharged powerplant available to the public.

Olds Le 215 Engine

The Buick version of the

215 V8 went on to become the well known Rover V8, which still remains in limited production, utilizing the Buick-style pistons, heads, and valve train gear. The Oldsmobile engine block formed the basis of the Repco 3-liter engine used by Brabham to win the 1966 and 1967 Formula One world championships. The early Repco engines produced up to 300 bhp (220 kW), and featured new SOHC cylinder heads and iron cylinder liners.

Buick 215 V8 Crate Engine | Crate Engine Block Supply

Enter Buick's all-aluminum, 215-cubic-inch V-8. Spread between Buick and Olds over three years, and just two years in the Tempest, GM built nearly a million engines before the design was quietly laid to rest. Casting issues meant a high scrap-page rate, which meant reduced profitability on a car that was already squeezing the General's pockets.
