You're going to have one solution if you can, by solving the equation, come up with something like x is equal to some number. Let's say x is equal to-- if I want to say the abstract-- x is equal to a . Or if we actually were to solve it, we'd get something like x equals 5 or 10 or negative pi-- whatever it might be. But if you could actually solve for a specific x , then you have one solution. So this is one solution, just like that.

One Solution, No Solution, Infinitely Many Solutions ...

The first case is the case of infinite solutions, when all numbers are solutions. The next case is no solutions, when we have no answer. We can identify which case it is by looking at our results. If

we end up with the same term on both sides of the equal sign, such as $4 = 4$ or $4x = 4x$, then we have infinite solutions.

Number of solutions to equations (practice) | Khan Academy

A solution is the answer to a problem. For example, in a math problem a solution is this: $5w=25$ $w= 5$

Mathematics. the process of determining the answer to a problem. the answer itself. Chemistry. the process by which a gas, liquid, or solid is dispersed homogeneously in a gas, liquid, or solid without chemical change. such a substance, as dissolved sugar or salt in solution. a homogeneous, molecular mixture of two or more substances. Pharmacology.

Solution Set Any and all value(s) of the variable(s) that satisfies an equation, inequality, system of equations, or system of inequalities.

QuickMath allows students to get instant solutions to all kinds of

math problems, from algebra and equation solving right through to calculus and matrices.

One Solution i.e. $x = 27$. Infinite Solutions. Zero Solution. Infinite Solutions. One Solution i.e. $x = -8$. Zero Solution.

linear equations in one variable with one solution, infinitely many solutions, or no solutions. Students will be able to write an equation that can be used to determine the number of solutions of the form $x=a$, $a=a$, or $a=b$.
