OpenCTI - Open platform for cyber threat intelligence

Cyber Security Threat Intelligence Sources: Open or Closed ...

Open source intelligence (OSINT) is a method of using open source tools to collect information from publicly available sources and then analyse it in order to make a decision or take some action.

Intelligence generated by these services can remain closed source, but some can trickle into the open source domain over time. Closed source typically provides a higher quality of available tooling and training, as there is funding to cover these components and a higher volume of intelligence output compared to its open source counterpart.
