The new edition of Business Analysis and Valuation builds on the strong success of the first IFRS edition, providing students with the knowledge of how to use financial statement information to assess a firm's financial performance, value, and creditworthiness. The text is primarily aimed at Masters and upper-level undergraduate programs in business and builds a bridge between accounting and finance, therefore making it accessible to both finance and accounting students.

It shows how to use financial statements, and more generally business analysis, in order to generate expectations of future performance. It furthermore shows how the value of a stock or a firm in an efficient market reflects expectations of future performance. More specifically, this course introduces a framework for business analysis and valuation using publicly available information, such as the information contained in financial statements, in order to develop an in-depth analysis of a
