We all have LIFE MOMENTUM. At any one time, we are either moving closer or further away from what we truly want in life. The decisions we have made and the actions we have taken to this very moment have led to where you are RIGHT NOW, but are you ready to unlock your FULL POTENTIAL? Whether you have aspirations to start your own business, write a book, spend more time with your family, travel, improve your health and fitness or own a seven-figure property portfolio, The Life Graduate will show you the 'how'. Romney Nelson was inspired to create The Life Graduate when he identified a fundamental gap of life skills often not delivered in a practical way throughout teenage years and adulthood. The strategies and systems have been simplified to empower anyone to achieve whatever they want in life through the lessons taught in The Life Graduate. It's your personal 'lesson plan' that teaches you: How to master goal setting and plan your path to success How to take more than 1,000 micro-actions each year to achieve your dream goals How to develop and implement great daily habits to support your goals How to add an extra three months a year to your life to improve your mental and physical health, improve your knowledge and achieve your goals faster than you ever imagined How to tackle and overcome procrastination, fear and the limiting beliefs you hold. It's time RIGHT NOW to release your LIFE MOMENTUM!

"This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in *Good Weekend* knows, he's an immensely funny, acute and vivid observer of Australian life. In *Strange Country*, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

As a food editor and stylist for *Martha Stewart*, Tara knows how to create and showcase gorgeously themed meals for every lifestyle and occasion. In her first cookbook, she shares more than 120 delicious showstopping recipes that are designed to impress. From leisurely weekend brunches spent over burrata cheese with grilled peaches and orange zest chimichurri to easy weeknight rice bowls with carrot-ginger dressing to a mouthwatering Italian crostata baked tart, Tara explains how to put together and master several special go-to dishes from the culinary capitals of the world to add to your repertoire. The book also features a section where she provides a basic recipe which can then be easily transformed into two or three new recipes to make meal planning a breeze during busy weeknight schedules. *Live Life Deliciously with Tara Teaspoon* shows serious foodies how to present food as an interesting and beautiful culinary experience with dishes that taste as delicious as they look.

This is not your regular cookbook. Food styling has become a skill many want to master, but don't know how. Popular food blogger and maverick baker Shivesh Bhatia is here to help. Twenty-two-year-old Shivesh enjoys a massive following on his blog and Instagram. Brands love him and so do people. In *Bake with Shivesh*, the ace baker reveals foolproof tips on food styling that can be easily followed at home, in your kitchen, with tools you already own. He also talks about his favourite styling techniques, and what works or doesn't on different social media platforms. This is a book for everyone looking to elevate the way they present food, to help boost their blogs and businesses, and to make food look as good as it tastes.

The microwave has many advantages over conventional cooking: it's quicker, more economical, cleaner and easier. Microwave ovens take up very little space. They produce fewer cooking smells and less steam, and kitchen/cooking areas remain cool. Annette Yates' book is designed specifically for the person who lives alone, or who has to prepare individual meals for some other reason: perhaps members of the family need to eat at different times or have conflicting tastes and preferences, or perhaps someone is on a special diet which requires food to be cooked separately. Included are recipes for: breakfasts; soups, starters and sauces; fish, meat, poultry, vegetable, cheese, egg and pasta dishes; and desserts - PLUS an indispensable cooking guide which explains how to adapt family recipe instructions to the smaller amounts needed for a single portion.

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend, and her soul makes a first step to healing.

Paula D'Arcy was only 27 when a drunk driver killed her husband and young daughter. But in the midst of crushing despair, she discovered a presence that responded to her fearful cries with great tenderness and wisdom. In this captivating work, D'Arcy recounts the way night slowly became day again--and the perspective shift that allowed her to find meaning in life again. If you've experienced great loss, or if you're feeling lost in the darkness yourself, *Stars at Night* can offer reassurance that pain does not have the final say.

Solar Energy is a wonderful concept. Take free energy from the sun and use it to power electrical equipment. No ongoing electricity bills, no reliance on an electricity socket. 'Free' electricity that

does not harm the planet. Generating electricity from sunlight alone is a powerful resource, with applications and benefits throughout the world. But how does it work? What is it suitable for? How much does it cost? How do I install it? This best-selling, internet linked book answers all these questions and shows you how to use the power of the sun to generate electricity yourself. Now in its fourteenth edition, this book assumes no previous knowledge. It explains the advantages of solar energy and the drawbacks you need to consider. As well as explaining the underlying principles, it provides a step-by-step guide so that you can successfully design and install a solar energy system from scratch. The website that accompanies this book includes online solar calculators and tools to simplify your solar installation, ensuring that building your system is as straightforward and successful as possible. Readers can also get in touch directly with the author to ask questions and get further support with their solar projects.

Solar photovoltaic (PV) deployment has grown at unprecedented rates since the early 2000s. As the global PV market increases, so will the volume of decommissioned PV panels, and large amounts of annual waste are anticipated by the early 2030s. Growing PV panel waste presents a new environmental challenge, but also unprecedented opportunities to create value and pursue new economic avenues. This report, prepared jointly by the International Renewable Energy Agency (IRENA) and the International Energy Agency Photovoltaic Power Systems Programme (IEA-PVPS), is the first-ever projection of PV panel waste volumes to 2050. It highlights that recycling or repurposing solar PV panels at the end of their roughly 30-year lifetime can unlock an estimated stock of 78 million tonnes of raw materials and other valuable components globally by 2050. If fully injected back into the economy, the value of the recovered material could exceed USD 15 billion by 2050.

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging as-

essment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

This book will give you the knowledge and confidence to create complete meals for every time of day and occasion - quickly. It will also teach you how to bake great cakes and breads, and make simple snacks and side dishes. Many meals are complete in their own right or have different elements that can be cooked one after the other (food needs to 'rest' before serving so this is quite possible and still keep it all hot.). But it can be used alongside your conventional hob. You may, for instance, want to quickly boil some rice or pasta to accompany a delicious meat, fish, chicken or vegetable main course in the combi. You can also use it as a conventional microwave, grill or convection oven.

Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.
