As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing. Second Language Listening combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing. Second Language Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.

Written by a leading proponent of biophilic design, this is the only practical guide to biophilic design principles for interior designers. Describing the key benefits, principles and processes of biophilic design, Nature Inside illustrates the implementation of biophilic design in interior design practice, across a range of international case studies - at different scales, and different typologies. Starting with the principles of biophilic design, and the principles and processes in practice, the book then showcases a variety of interior spaces - residential, retail, workplace, hospitality, education, healthcare and manufacturing. The final chapter looks 'outside the walls', giving a case study at the campus and city scale. With practical guidance and real-world solutions that can be directly-applied in day-to-day practice, this is a must-have for designers interested in applying biophilic principles.

How to Teach Listening - a practical guide to the theory of listening in the English language classroom and the skills required in its teaching.

The study of teacher cognition - what teachers think, know and believe - and of its relationship to teachers' classroom practices has become a key theme in the field of language teaching and teach-

er education. This new in paperback volume provides a timely discussion of the research which now exists on language teacher cognition. The first part of the book considers what is known about the cognitions of pre-service and practicing teachers, and focuses specifically on teachers' cognitions in teaching grammar, reading and writing. The second part of the book evaluates a range of research methods which have been used in the study of language teacher cognition and provides a framework for continuing research in this fascinating field. This comprehensive yet accessible account will be relevant to researchers, teacher educators and curriculum managers working in language education contexts.

The emphasis of this book is on those aspects of medical genetics most useful in a modern clinical practice. Clinical aspects of molecular genetics research have been incorporated throughout the spectrum of genetically determined diseases.

A book that teaches children to be happy being themselves - quirks and all. The self published book has taken on a life of its own - it's now available in store and online. And to further its success, it's author is now planning a tour of schools throughout NSW, reading the story to children and helping them express themselves through art. 'Bill the Fish' celebrates individuality. It teaches children through a series of wildly differing aquatic characters that we are all meant to be different.

This book traces the history of English language teaching right up to the origins of the communicative approach, ending with a discussion of the impact of applied linguistics on language teaching in both America and Britain.

Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process. The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice. They propose ways in which Communicative Language Teaching should develop within an education-

al model of theory and practice, incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources. Building on a critical review of recent language teaching principles and practice, they provide selection criteria for classroom activities based on a typology of communicative tasks drawn from classroom experience. The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of re-defining the roles of teacher and learner within a jointly constructed curriculum.

This book integrates recent research and practice in language teaching into a framework for analysing learning tasks.

The Rabinal Achi, one of the most remarkable works of Mayan literature, dates back to the 1400s. The drama is set in the Guatemalan highlands in the second half of the fifteenth century. In an exemplary trial that takes place in Kajyub, the capital of the Rabinal at that time, a captured enemy warrior (Quiché Achi) appears before the royal court. A series of combative dialogues pits the offending warrior against the local warrior (Rabinal Achi) and the king (Job Toj), reconstructing the deeds of those involved and retracing the antagonistic history of these two Mayan groups, the Quiché and the Rabinal. Alain Breton approaches the text from an anthropological and ethnographical perspective, demonstrating that this indigenous text reenacts pre-Columbian historic paradigms. Breton translated into French an entirely new transcription of the original text, and Teresa Lavender Fagan and Robert Schneider translated the text into English. Both the transcription and the translation are accompanied by detailed commentary and a glossary.

A practical guide to more effective assessment for improved student learning Learn how to be more consistent in judging student performance, and help your students become more effective at assessing their own learning This book o

For at least a century, attitudes to the use of translation in language teaching have been predominantly negative, the deprecators of the methodology having been particularly vocal at the turn of the 20th century and again in the 1960s and 70s. Yet, for all of this time, translation has remained a significant component in the teaching of many languages in many parts of the world, and the 1980s saw a revival of support for the practice among a number of applied linguists. Language teaching for translators has been rather less contentious. It has always been assumed that translators must know their languages thoroughly, but little has been written about how they, as a special group, might be taught their languages. In the final quarter of the 20th century, attention among translation scholars and pedagogues has turned so decisively away from linguistics that even teaching translators about their languages and how they can be put to use has been frowned on in many quarters. This book takes a fresh look at both issues. Part One addresses the question of the place and nature of language teaching in translator training programmes. Part Two deals with the issue of how translation might best be used as a teaching and testing methodology in language classes. Finally, the papers in Part Three address the relationship between translation and language teaching from the somewhat divergent points of view of the translator trainer and language teacher.

The 2017 edition of the Latin American Economic Outlook explores youth, skills and entrepreneurship. Young Latin Americans embody the region's promise and perils. They stand at the crossroads of a region whose once promising economy and social progress is now undergoing a slowdown.

Using the Caribbean experience as the focus, Christine Chivallon examines the transatlantic slave trade and slavery as founding events in the identification of a black diaspora experience. The exploration is extended to include the US to exemplify contrasting situations in slavery-based systems.

A leader in Introduction to Educational Research courses, Educational Research: Competencies for Analysis and Applications, ninth edition, remains a practical text focused on the skills and procedures students need in order to become competent consumers and producers of educational research. The accessible writing style and light, humorous tone of this book helps to demystify and enliven this demanding course. The text uses a direct, step-by-step approach to the research process. Tasks are included throughout the text to guide students through the process of creating their own research report. Published research articles are now included in every research methods chapter to provide students with illustrations of exemplary qualitative and quantitative research. Key changes in the ninth edition include an expanded coverage of qualitative research through a new chapter on Case Study Research (Chapter 17), a new chapter on Survey Research (Chapter 7), an increased emphasis on ethical considerations in the conduct of educational research (Chapter 1), and significant updates to Descriptive Statistics (Chapter 12) and Inferential Statistics (Chapter 13) that increase the coverage of how to use technology in the research process."

Transcribed from Mayan hieroglyphs, the Popol Vuh relates the mythology and history of the Kiché people of Central America. There is no document of greater importance to the study of pre-Columbian mythology.

A new and illuminating critical examination of international relations in Europe. This new volume presents all of the state of the art thinking, focusing particularly on international relations theory and theoretical debates in Western and Central European countries. The contributors seek to strengthen knowledge about different ways of cultivating the discipline; to intensify pan-European communication concerning IR theory; to contribute to improving the quality of theorizing; and finally to consider future directions for the discipline in Europe. The main issues addressed include: the historical development of the discipline; factors driving IR theorizing; the institutional and cultural context of theorizing; 'homegrown' theory-building vs. theory import; patterns of traditional and new discourse; and the diversity of disciplinary traditions.

Covering the period from the fall of the Roman Empire through to the beginnings of the Renaissance, this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life. Key features: * geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes * each map approaches a separate issue or series of events in Medieval history, whilst a commentary locates it in its broader context * as a body, the maps provide a vivid representation of the development of nations, peoples and social structures.

With over 140 maps, expert commentaries and an extensive bibliography, this is the essential reference for those who are striving to understand the fundamental issues of this period.

Originally published in 1986, designed for teachers and those concerned with the education of primary and secondary school pupils, *Learning Strategies* presented a new approach to 'learning to learn'. Its aim was to encourage teachers to start thinking about different approaches to harnessing the potential of young learners. It was also relevant to adult learners, and to those who teach them. Thus, although about learning, the book is also very much about teaching. *Learning Strategies* presents a critical view of the study skills courses offered in schools at the time, and assesses in non-technical language what contributions could be made to the learning debate by recent developments in cognitive psychology. The traditional curriculum concentrated on 'information' and developing skills in reading, writing, mathematics and specialist subjects, while the more general strategies of how to learn, to solve problems, and to select appropriate methods of working, were too often neglected. Learning to learn involves strategies like planning ahead, monitoring one's performance, checking and self-testing. Strategies like these are taught in schools, but children do not learn to apply them beyond specific applications in narrowly defined tasks. The book examines the broader notion of learning strategies, and the means by which we can control and regulate our use of skills in learning. It also shows how these ideas can be translated into classroom practice. The final chapter reviews the place of learning strategies in the curriculum.

This book is a study of ancient views about 'moral luck'. It examines the fundamental ethical problem that many of the valued constituents of a well-lived life are vulnerable to factors outside a person's control, and asks how this affects our appraisal of persons and their lives. The Greeks made a profound contribution to these questions, yet neither the problems nor the Greek views of them have received the attention they deserve. This book thus recovers a central dimension of Greek thought and addresses major issues in contemporary ethical theory. One of its most original aspects is its interrelated treatment of both literary and philosophical texts. *The Fragility of Goodness* has proven to be important reading for philosophers and classicists, and its non-technical style makes it

accessible to any educated person interested in the difficult problems it tackles. This edition, first published in 2001, features a preface by Martha Nussbaum.

This timely study examines the processes by which modern states are created within multiethnic societies. How are national identities forged from countries made up of peoples with different and often conflicting cultures, languages, and histories? How successful is this process? What is lost and gained from the emergence of national identities? Natividad Gutiérrez examines the development of the modern Mexican state to address these difficult questions. She describes how Mexican national identity has been and is being created and evaluates the effectiveness of that process of state-building. Her investigation is distinguished by a critical consideration of cross-cultural theories of nationalism and the illuminating use of a broad range of data from Mexican culture and history, including interviews with contemporary indigenous intellectuals and students, an analysis of public-school textbooks, and information gathered from indigenous organizations. Gutiérrez argues that the modern Mexican state is buttressed by pervasive nationalist myths of foundation, descent, and heroism. These myths—expressed and reinforced through the manipulation of symbols, public education, and political discourse—downplay separate ethnic identities and work together to articulate an overriding nationalist ideology. The ideology girding the Mexican state has not been entirely successful, however. This study reveals that indigenous intellectuals and students are troubled by the relationship between their nationalist and ethnic identities and are increasingly questioning official policies of integration.

In her first full-length volume of poems, Ruth Irup Sanabria explores language's power to destroy and create through the imagination and narrative of free-verse poems fueled by metaphor, music, and satire. In the first section, the author writes about a genocidal dictatorship that began in 1976 and that brought about the disappearances and deaths of thousands of Argentines. Voices of the children of the disappeared are juxtaposed with official exposés on the dictatorship, illuminating their plight in vivid detail. The second section explores racism and poverty and imbues it with the rhythms of Latino music and jazz. In the third section, the poet explores the idea that victims of political violence may actually be enabling it through complicity, apathy, and guilt. Written in a variety of styles, Sanabria's poetry provides a fresh perspective on social injustice and on poetry itself.

Reflective Teaching in Second Language Classrooms introduces teachers to ways of exploring and reflecting upon their classroom experiences, using a carefully structured approach to self-observation and self-evaluation. Teachers are encouraged to collect data about their own teaching; to examine their attitudes, beliefs, and assumptions; and then to use the information obtained as a basis

for critical reflection on teaching practices. The approach is not linked to a particular method, but rather can be applied to a variety of approaches and teaching situations. Each chapter includes thought-provoking questions and activities appropriate for group discussion or self-study.

Two distinguished psychologists look at the role of self-justification in human life, explaining how and why we create fictions that absolve us of responsibility and restore our belief in our intelligence, moral rectitude, and correctness; assess the potential repercussions of such a course of action; and

reveal how it can be overcome. Reprint.
