The art of negotiation—from one of the country's most eminent practitioners and the Chair of the Harvard Law School's Program on Negotiation. One of the country's most eminent practitioners of the art and science of negotiation offers practical advice for the most challenging conflicts—when you are facing an adversary you don't trust, who may harm you, or who you may even feel is evil. This lively, informative, emotionally compelling book identifies the tools one needs to make wise decisions about life's most challenging conflicts.

Real world negotiation examples and strategies from one of the most highly respected authorities in the field This unique

book can help you change your approach to negotiation by learning key strategies and techniques from actual cases. Through hard to find real world examples you will learn exactly how to effectively and productively negotiate. The Book of Real World Negotiations: Successful Strategies from Business, Government and Daily Life shines a light on real world negotiation examples and cases, rather than discussing hypothetical scenarios. It reveals what is possible through preparation, persistence, creativity, and taking a strategic approach to your negotiations. Many of us enter negotiations with skepticism and without understanding how to truly negotiate well. Because we lack knowledge and confidence, we may abandon the negotiating process prematurely or agree to deals that

leave value on the table. The Book of Real World Negotiations will change that once and for all by immersing you in these real world scenarios. As a result, you'll be better able to grasp the true power of negotiation to deal with some of the most difficult problems you face or to put together the best deals possible. This book also shares critical insights and lessons for instructors and students of negotiation, especially since negotiation is now being taught in virtually all law schools, many business schools, and in the field of conflict resolution. Whether you're a student, instructor, or anyone who wants to negotiate successfully, you'll be able to carefully examine real world negotiation situations that will show you how to achieve your objectives in the most challenging of circumstances.

The cases are organized by realms—domestic business cases, international business cases, governmental cases and cases that occur in daily life. From these cases you will learn more about: Exactly how to achieve Win-Win outcomes The critical role of underlying interests The kind of thinking that goes into generating creative options How to consider your and the other negotiator's Best Alternative to a Negotiated Agreement (BATNA) Negotiating successfully in the face of power Achieving success when negotiating cross-culturally Once you come to understand through these cases that negotiation is the art of the possible, you'll stop saying "a solution is impossible." With the knowledge and self-assurance you gain from this book, you'll roll up your sleeves and keep negotiating until you reach a mutually satisfactory outcome!

Start with No offers a contrarian, counterintuitive system for negotiating any kind of deal in any kind of situation—the purchase of a new house, a multimillion-dollar business deal, or where to take the kids for dinner. Think a win-win solution is the best way to make the deal? Think again. For years now, win-win has been the paradigm

for business negotiation. But today, win-win is just the seductive mantra used by the toughest negotiators to get the other side to compromise unnecessarily, early, and often. Win-win negotiations play to your emotions and take advantage of your instinct and desire to make the deal. Start with No introduces a system of decision-based negotiation that teaches you how to understand and control these emotions. It teaches you how to ignore the siren call of the final result, which you can't really control, and how to focus instead on the activities and behavior that you can and must control in order to successfully negotiate with the pros. The best negotiators: \* aren't interested in "yes"—they prefer "no" \* never, ever rush to close, but always let the other side feel comfortable and secure \* are never needy; they take advantage of the other party's neediness \* create a "blank slate" to ensure they ask questions and listen to the answers, to make sure they have no assumptions and expectations \* always have a mission and purpose that guides their decisions \* don't send so much as an e-mail without an agenda for what they want to accomplish \* know the four "budgets" for

themselves and for the other side: time, energy, money, and emotion \* never waste time with people who don't really make the decision Start with No is full of dozens of business as well as personal stories illustrating each point of the system. It will change your life as a negotiator. If you put to good use the principles and practices revealed here, you will become an immeasurably better negotiator.

When discussing being stuck in a "win-win vs. win-lose" debate, most negotiation books focus on face-to-face tactics. Yet, table tactics are only the "first dimension" of David A. Lax and James K. Sebenius' pathbreaking 3-D Negotiation (TM) approach, developed from their decades of doing deals and analyzing great dealmakers. Moves in their "second dimension"—deal design—systematically unlock economic and noneconomic value by creatively structuring agreements. But what sets the 3-D approach apart is its "third dimension": setup. Before showing up at a bargaining session, 3-D Negotiators ensure that the right parties have been approached, in the right sequence, to address the right interests, under the right expectations, and facing the right consequences of walking away if there is no deal. This new arsenal of moves away from the table often has the greatest impact on the negotiated outcome. Packed with practical steps and cases, 3-D Negotiation demonstrates how superior setup moves plus insightful deal designs can enable you to reach remarkable agreements at the table, unattainable by standard tactics.

On War is a treatise about a military art which Prussian officer Carl Philipp Gottlieb von Clausewitz had been working on for 15 years. It is commonly believed that Clausewitz's treatise had a greater impact on military leaders of the late XIX and XX centuries than any other book. In reality, this book is an overturn in the war theory. The work is notable for its brightness, narration details as well as hard criticism of many war events. The author dedicates a special place in his work to politics, its influence on the war events, the dependence how the war finishes on powers and weaknesses of particular politicians and military leaders. There is a good reason why his famous phrase "the war is the continuation of the politics, but with other, strong arm methods" is still relevant.

Summary of *Never Split the Difference* by Chris Voss and Tahl Raz Includes Analysis Preview: *Never Split the Difference* by Chris Voss and Tahl Raz is a guide to using hostage negotiation techniques in business and personal negotiations. Modern negotiation strategies taught in business school usually center on classic texts that describe negotiation without factoring in emotions or irrational behavior. In reality, all negotiations involve emotional factors and illogical reactions. And in hostage scenarios, "splitting the difference" by accepting the release of half the hostages in exchange of partial fulfillment of demands is never a desired outcome. Hostage tak-

ers who feel heard are more likely to trust negotiators to be honest about what they want. Active listening involves mirroring the other person's speech, speaking in a way that sounds assertive but calming, and not saying anything at all for several seconds between utterances. This slows the conversation down and conveys the impression that the negotiator wishes to understand... PLEASE NOTE: This is key takeaways and analysis of the book and NOT the original book. Most of us worry that we're not very good negotiators - too quick to concede or too abrupt in our approach. But negotiation is present in almost every social interaction - we cannot avoid it. Neale and Lys present a practical new approach that will help you

master this crucial everyday skill in every situation. Instead of focusing on reaching agreement at any cost, Neale and Lys reveal how to overcome our psychological biases and assess the hidden value in any negotiation. They explain how to know what a good deal is; when to negotiate and when to walk away; why keeping a straight face can prevent you from getting the best deal; when to make the first offer and when to wait; and why meeting in the middle can result in both sides being worse off. Drawing on three decades of ground-breaking research into behavioural economics, psychology and strategic thinking, *Getting (More of) What You Want* will revolutionise the way you approach negotiation. Whether you're looking for a better deal on your new car, asking for a pay rise, selling your company or just deciding who does the washing up, this book will help you become a more successful, more efficient negotiator - and get more of exactly what you want.

With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, pre-modern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines moder-

nity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape. *We Have Never Been Modern* blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.

Based on heretofore unexplored sources, this book offers a comprehensive study of the life, work, thought and influence of the eponym of one of the earliest Sufi *ṭarīqa* lineages, Abū 'Umar al-Suhrawardī (d. 632/1234).

We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most impor-

tant factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of “decision trees,” which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyz-

ing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance

that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: "Life is negotiation!" No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator. Foreword by Henry Kissinger In this groundbreaking, definitive guide to the art of negotiation, three Harvard profes-

sors—all experienced negotiators—offer a comprehensive examination of one of the most successful dealmakers of all time. Politicians, world leaders, and business executives around the world—including every President from John F. Kennedy to Donald J. Trump—have sought the counsel of Henry Kissinger, a brilliant diplomat and historian whose unprecedented achievements as a negotiator have been universally acknowledged. Now, for the first time, *Kissinger the Negotiator* provides a clear analysis of Kissinger's overall approach to making deals and resolving conflicts—expertise that holds powerful and enduring lessons. James K. Sebenius (Harvard Business School), R. Nicholas Burns (Harvard Kennedy School of Government), and Robert H. Mnookin (Harvard Law School) crystallize the key elements of Kissinger's approach, based on in-depth interviews with the former secretary of state himself about some of his most difficult negotiations, an extensive study of his record, and many independent sources. Taut and instructive, *Kissinger the Negotiator* mines the long and fruitful career of this elder statesman and shows how his strategies apply not only to contemporary diplomatic

challenges but also to other realms of negotiation, including business, public policy, and law. Essential reading for current and future leaders, *Kissinger the Negotiator* is an invaluable guide to reaching agreements in challenging situations.

**NATIONAL BESTSELLER** • A deeply engaging history of how European settlements in the post-Columbian Americas shaped the world—from the highly acclaimed author of *1491*. • "Fascinating...Lively...A convincing explanation of why our world is the way it is." —The New York Times Book Review Presenting the latest research by biologists, anthropologists, archaeologists, and historians, Mann shows how the post-Columbian network of ecological and economic exchange fostered the rise of Europe, devastated imperial China, convulsed Africa, and for two centuries made Mexico City—where Asia, Europe, and the new frontier of the Americas dynamically interacted—the center of the world. 'MEIN KAMPF' is the autobiography of Adolf Hitler gives detailed insight into the mission and vision of Adolf Hitler that shook the world. This book is the merger of two volumes. The first volume of MEIN KAMPF' was written while the author was imprisoned in a Bavarian fortress. The book deals with events which brought the author into this blight. It was the hour of Germany's deepest humiliation, when Napoleon has dismembered the old German Empire and French soldiers occupied almost the whole of Germany. The books narrates how Hitler was arrested with several of his comrades and imprisoned in the fortress of Landsberg on the river Lech. During this period only the author wrote the first volume of MEIN KAMPF. The Se-

cond volume of MEIN KAMPF was written after release of Hitler from prison and it was published after the French had left the Ruhr, the tramp of the invading armies still echoed in German ears and the terrible ravages had plunged the country into a state of social and economic Chaos. The beauty of the book is, MEIN KAMPF is an historical document which bears the imprint of its own time. Moreover, Hitler has declared that his acts and 'public statements' constitute a partial revision of his book and are to be taken as such. The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible with-

out going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

A journey along the greatest land route on earth, from the master of travel writing Colin Thubron On buses, donkey carts, trains, jeeps and camels, Colin Thubron traces the drifts of the first great trade route out of the heart of China into the mountains of Central Asia, across northern Afghanistan and the plains of Iran into Kurdish Turkey. Covering over 7000 miles in eight months Thubron recounts extraordinary adventures - a near-miss with a

drunk-driver, incarceration in a Chinese cell during the SARS epidemic, undergoing root canal treatment without anaesthetic

in Iran - in inimitable prose. Shadow of the Silk Road is about Asia today; a magnificent account of an ancient world in modern ferment. 'It is hard to think of a better

travel book written this century' Times
