The Four Phases of Emergency Management | The Preparedness ...

The exact terminology for disaster phases differs, and the terms used seem to change frequently. For example, FEMA references: prevention, protection, mitigation, response, and recovery. For the purposes of this resources, the AAP will reference 4 basic phases related to a disaster: 1. Mitigation 2. Preparedness 3. Response 4.

Community preparedness for all disasters requires identifying resources and expertise in advance, and planning how these can be used in a disaster. However, preparedness is only one phase of emergency management. Current thinking defines four phases of emergency management: mitigation, preparedness, response,

and recovery.

It's important to understand that there are distinct stages, or phases, to surviving through an emergency. These are called The Four Phases of Emergency Management and they are: Mitigation. Mitigation is preventing disasters or taking steps to lessen the impact of unavoidable disasters. Ideally, mitigation should occur before an emergency happens.
