Disciplinary Domain of Medicine and Pharmacy, Faculty of Pharmacy, Department of Pharmaceutical Biosciences. 2017 (English) Independent thesis Advanced level (degree of Master (Two ... Two weeks of data collection were made in three wards before and during the pilot of the referral system.

Objective This investigation utilised the expertise of allied members of multidisciplinary teams working in emergency care settings to develop and validate a Rapid Assessment Prioritisation and Referral Tool (RAPaRT). This instrument is intended for use among patients (with non-life threatening acuity) presenting to emergency care settings to indicate when referral to an allied member of the ...

Pharmacy Prioritisation And Referral Ggc

(Based on prioritisation of patient need rather than clinical setting) Early GGC pilots of medical/nursing staff referring patients for pharmacy review were unsuccessful. Referral rates were low and potentially appropriate patients were not referred.

Pharmacy Prioritisation and Referral - GGC Prescribing

Pharmacy Prioritisation and Referral. Background. Clinical pharmacists cannot review all patients in NHSGGC every day. In order to allocate clinical pharmacist resource where it is most needed, patients' pharmaceutical care needs must be assessed and prioritised accordingly. Current model of clinical pharmacist service delivery

GGC Medicines

It enables the pharmacy team to record the patient triage status and see at a glance all pharmacy-based requests enabling a safety-focussed approach to patient care. It will also support discharge by the pharmacy technical team by allowing planning of the drugs required for discharge, and visibility of the stages of the discharge prescription process to all ward staff .
