This is a very good book for those interested in the philosophy of mind. I am a Masters student and it has proven very useful for getting a grip on the basics. There are, however, some slightly better written and more detailed books out there e.g. John Heil's *Philosophy of Mind: A Contemporary Introduction*.

*Philosophy of Mind*, by Edward Feser, is an accessible introduction and intelligible overview of the central issues concerning -- you guessed it -- the philosophy of mind. In addition to an overview of the history of this area of philosophy, Feser argues that dualism as an answer to the so-called mind-body problem is as alive today as it's ever been.

*Philosophy of Mind - Ian Ravenscroft - Oxford University Press*

A very interesting introduction to the philosophy of mind. I recommend pairing it with a beginner's level book from a materialist perspective such as Dennett's *Consciousness Explained*, or *The Mind's I* (edited by Douglas Hofstadter). For a book purporting to be an introduction to the subject, *Philosophy of Mind* is more partisan than one might expect.

In addition, he smartly uses bullet points to break down major philosophical arguments into their core aspects.

This book is a wonderful introduction to the philosophy of mind from a broadly dualist perspective. Along the way, Feser surveys such topics as qualia, thought, intentionality, and reason. What makes this book so valuable is the way Feser is able to explain somewhat technical issues in terms an interested layperson can understand, without sacrificing any of the intellectual weight of the discipline.
