Polaris 360. Once again, thank you for choosing a Polaris. B. What to Expect from the Polaris 360 When operating correctly, the Polaris 360 will travel randomly throughout the pool, vacuuming, sweeping and scrubbing the bottom. The climbing ability of the Polaris is dependent on the pool's shape and available water flow. It will climb better

Proper installation is important as the Polaris 360 has a very small window of return pressure strength to get it moving properly. Too little return pressure and the Polaris 360 will not move...

The Polaris 360 is a pressure cleaner that does NOT require a booster pump. There are several models of pressure cleaners offered by Zodiac under the Polaris brand. It is easy to identify each model. If you remove the bag and look down the throat of each unit, you will see small jets.

I changed the wheels/belts just a two days ago. When I put it in the water to test it out, everything worked fine (including the back end staying on the ground and turning around/climbing walls properly~ as these were issues before as well) but when I came

out to check it the morning after, it was floating on top of the water with the tail spraying water straight up in the air!

If the Polaris hose is tangled and doesn't seem to unwind, just add a Swivel to the hose by cutting the hose with a blade, and inserting a swivel with 2 nuts to hold it in. Make sure the arrow on the swivel is pointed towards the Polaris and don't add a swivel within 10 FT of the Polaris (otherwise it will do 360 all day). Note: Also if the Polaris wheels are not moving, more than likely the bearings are bad, very easy to change.
