To improve your own leadership influence, study the lives of great leaders—you'll find 21 of them in Pat Williams' newest book. Member of the Basketball Hall of Fame, senior vice president of the Orlando Magic, and author of 90 books, Pat Williams has devoted much of his life to the study of leadership—and shares the stories and principles of individuals from George Washington to Nelson Mandela, Billy Graham to Walt Disney, and Margaret Thatcher to Steve Jobs. Organized around Pat's "Seven Sides of Leadership"—Vision, Communication, People Skills, Character, Competence, Boldness, Serving Heart—21 Great Leaders will provide challenge, encouragement, and affirmation for your own leadership journey.

This book unravels the institutions surrounding witchcraft in the central Indian state of Chhattisgarh through theoretical and empirical research on witchcraft, violence and modernity in contemporary times. The author pieces together 'fragments' of stories gathered utilising ethnographic methods to examine the meanings associated with witches and witchcraft, and how they connect with social relations, gender, notions of agency, law, media and the state. The volume uses the metaphor of the shattered urn to tell the story of the accusations, punishment, rescue and the aftermath of the events of the trial of women accused of being witches. It situates the *tonhi* or witch as a key elaborating symbol that orders behaviour to determine who the socially included and excluded are in communities. Through the personal interviews and other ethnographic methods conducted over the course of many years, the author delves into the stories and practices related to witchcraft, its relations with modernity, and the relationship between violence and ideological norms in society. Insightful and detailed, this book will be of great interest to academics and researchers of anthropology, development studies, sociology, history, violence, gender studies, tribal studies and psychology. It will also be useful for readers in both historic and contemporary witchcraft practices as well as policy makers.

The Penguin English Library edition A dense yellow miasma swirls in the streets of London as Sherlock Holmes and Dr Watson accompany a beautiful young woman to a sinister assignation. For Mary Marston has received several large pearls - one a year for the last six years - and now a mystery letter telling her she is a wronged woman. If she would seek justice she is to meet her unknown benefactor, bringing with her two companions. But unbeknownst to them all, others stalk London's fog-enshrouded streets: a one-legged ruffian with revenge on his mind - and his companion, who places no value on human life . . .

A review of combinatorics and elementary probability. Pascal with random number generation for fortran, basic, and cobol programmers. A simple genetic algorithm (SGA) in pascal. A simple classifier system (SCS) in pascal. Partition coefficient transforms for problem-coding analysis.

What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.

The present book on NCC is published for the benefit of all the cadets of National Cadet Corps.
