"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The British Study Edition of the Urantia Papers is based on the standard SRT text, but uses the metric system and adds a critical apparatus of textual variants and study notes.

An analysis of the use of media by political and religious interest groups in India

Long plagued by poverty, India's recent economic growth has vaulted it into the ranks of the world's emerging powers-but what kind of power it wants to be remains a mystery. Cautious Superpower explains why India behaves the way it does, and the role it is likely to play globally as its prominence grows. --

This book examines environmental issues through the lens of security studies and presents a comprehensive analysis of Indian policy in dealing with threats posed by climate change. This volume, • Puts forward theoretical base for securitization of environmental issues, incorporating different schools of thought; • Presents a survey of global environmental politics in general and the effects of climate change and its consequences for India's national security in particular; • Examines the politics involved in India's environmental policy at both the domestic and international level; • Outlines key policy takeaways and possibilities for action that can help contain the threat of environmental change. A comprehensive guide to a new and emerging dimension in Indian security policy, this book will be essential reading for students and researchers of international relations, security studies, especially non-traditional security, public policy, especially environmental policy, and area studies.

India has become one of the world's emerging powers, rivaling China in terms of global influence. Yet many people know relatively little about the economic, social, political, and cultural changes unfolding in India today. To what extent are people benefiting from the economic boom? In what ways is education transforming society? And how is India's culture industry responding to technological change? In this "Very Short Introduction", Craig Jeffrey provides a compelling account of the recent history of India, investigating the contradictions that are plaguing modern India and the manner in which people, especially young people, are actively remaking the country in the twenty first century. -- From publisher's description.

This book examines the impact of economic reforms in India on the pharmaceutical industry and access to medicines. It traces the changing production and trade pattern of the industry, research and development (R&D) preferences and strategies of Indian pharmaceutical firms, patent system alongside pricing policy measures and their shortcomings. It also analyses the public health financing system in India driven largely by out-of-pocket expenditure — about 60 per cent — and characterised by very high share of medicines in total health expenditure. A masterful insight into a topical area, the work will be indispensable to those working on pharmaceutical industry and public policy. It will be of interest to researchers, scholars, students, and policy-makers of economics, industrial policy, public policy, intellectual property rights and health financing.

"We're going to build a wall." Borders have been drawn since the beginning of time, but in recent years artificial barriers have become increasingly significant to the political conversation across the world. Donald Trump was elected President of the United

States while promising to build a wall on the Mexico border, and in Europe, the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers. Virtual walls are also built and crushed at increasing speed. In the post-9/11 era there is a greater danger from so-called "transnational non-state actors", and computer hacking and cyberterrorism threaten to overwhelm our technological barriers. In this timely and original book, Said Saddiki scrutinises the physical and virtual walls located in four continents, including Israel, India, the southern EU border, Morocco, and the proposed border wall between Mexico and the US. Saddiki's detailed analysis explores the tensions between the rise of globalisation, which some have argued will lead to a "borderless world" and "the end of the nation-state", and the rapid development in recent decades of border control systems. Saddiki examines both regular and irregular cross-border activities, including the flow of people, goods, ideas, drugs, weapons, capital, and information, and explores the disparities that are reflected by barriers to such activities. He considers the consequences of the construction of physical and virtual walls, including their impact on international relations and the rise of the multi-billion dollar security market. World of Walls: The Structure, Roles and Effectiveness of Separation Barriers is important reading for all those interested in the topics of immigration, border security, international relations, and policy.

In view of the fast-changing world order, emerging countries are increasingly influencing the dynamics of regional securities. This timely and in-depth book examines India's reorienting strategic posture and describes how New Delhi's security policy in the Indo-Pacific region has evolved and expanded over the past two decades. The author argues that India's quest to leverage its geostrategic location to emerge as an Indo-Pacific actor faces multiple challenges, which create a clear divide between the country's political rhetoric and action on the ground. The author critically examines these contradictions to better situate India's security role in an increasingly fluid Indo-Pacific region.

This book is entirely different from books that have been written on Indian civil societal relations, spiritual character, political economy, philosophical foundations, scientific roots, cultural essence, and historicity. It takes a journey from tribals upwards and looks at the pyramid of the communities in an inverse order. This book is an excise in new methodology, pedagogy, analysis, and synthesis of knowledge. Every chapter in this book reads like a new innovation in Indian social anthropology. It draws a different map for the future of this nation and its intellectual history.

Examines the Hindu religious tradition, surveying its history and central beliefs, women's religious experiences, Hindu social structure, and other topics

'The most gratifying thing for me [is] that [this book] was listed as a millennium book [by The Pioneer] along with Dr. B. R. Ambedkar's Annihilation of Caste. Moreover, it has been translated into several Indian languages. In a way it has become a weapon in the hands of Dalitbahujan activists'. -from the Afterword to the second edition. Kancha Ilaiah Shepherd writes with passionate anger, laced with sarcasm, on the caste system and Indian society. He looks at the socioeconomic and cultural differences between the Dalitbahujans and Hindus in the contexts of childhood, family life, market relations, power relations, Gods and Goddesses, death and, not the least, Hindutva. Synthesizing many of the ideas of Bahujans, he presents their vision of a more just society. In this second edition, Ilaiah Shepherd presents an Afterword that discusses the history of this book, often seen as the manifesto of the downtrodden Dalitbahujans. He talks of its reviews as well as

of the abuse he has received from its detractors. He reminds us of the need for an ongoing dialogue. As he says, he wrote the book 'for all who have open minds. My request to Brahmin, Baniya and neo-Kshatriyas [upper class Sudras] is this: You learnt only what to teach others—the Dalitbahujans. Now in your own interest and in the interest of this great country, you must learn to listen and to read what we have to say.'

Surveys the main features of contemporary Indian foreign policy.

This book builds an overarching view of the essential elements, themes, and teachings of the world's oldest surviving faith tradition Hinduism. Each theme is divided in easy to follow lessons. Highly philosophic content of Vedic chants is made simple enough for students as young as 5. For in-depth study, several appendices guide students into scholarly understanding of complex philosophic ideas such as the nature of reality, the nature of the mind, and the cosmic laws enshrined in the Vedic and post-Vedic texts. As a teacher with 20+ years of experience, the author presents ancient wisdom in simple language. Many books have been written about Hinduism, many of them incomplete and confusing. This book will appeal to those seeking an easy to read, logical approach to both understanding and teaching Hinduism. The book will be useful to parents, grandparents, teachers and students alike.

Vishva Hindu Parishad and Indian Politics provides a detailed historical account of the VHP, one of the leading organisations in the Hindutva movement, focusing on its transformation from a loosely-knit body of Hindus aimed at preserving and promoting Hindu dharma, into a mass organisation actively involved in mobilising the urban middle classes, service professionals and religious leaders for the creation and promotion of a strong Hindu nation. Rich in empirical data, the book contains extensive quotations from fifty interviews carried out for this study, including those with central figures in the VHP such as Praveen Togadia and Ashok Singhal and members of related organisations.

Baksheesh & Brahman illustrates Campbell's working method and grants an illuminating look at the thoughts and experiences of an incredible mind, as well as a revealing portrait of the roiling Indian subcontinent of fifty years ago."--BOOK JACKET.

This handbook showcases how educators and practitioners around the world adapted their routine media pedagogies to meet the challenges of the COVID-19 pandemic, which often led to significant social, economic, and cultural hardships. Combining an innovative mix of traditional chapters, autoethnography, case studies, and dialogue within an intercultural framework, the handbook focuses on the future of media education and provides a deeper understanding of the challenges and affordances of media education as we move forward. Topics range from fighting disinformation, how vulnerable communities coped with disadvantages using media, transforming educational TV or YouTube to reach larger audiences, supporting students' wellbeing through various online strategies, examining early childhood, parents, and media mentoring using digital tools, reflecting on educators' intersectionality on video platforms, youth-produced media to fight injustice, teaching remotely and providing low-tech solutions to address the digital divide, search for solutions collaboratively using social media, and many more. Offering a unique and broad multicultural perspective on how we can learn from the challenges of addressing varied pedagogical issues that have arisen in the context of the pandemic, this handbook will allow researchers, educators, practitioners, institution leaders, and graduate students to explore how media education evolved during 2020 and 2021, and how these experiences can shape the future direction of media education.

The objective of this book is to provide an understanding of the economy with its nature and structure, dominance of unorganized sector, natural resources, economic and social infrastructure, demographic features, poverty, unemployment, inequality, national income, saving and investment, role of noneconomic factors, and sources of data. India evokes many images because the country is extremely heterogeneous in its resource endowments, climate, languages, and infrastructure. India provides a rich tapestry of economic and social milieu: the 22 officially recognized languages spoken by the population, with their many dialects; the caste system; and its hoary history with its rich culture and traditions. India possesses a wide and varied resource base, although domestic sources supply only a third of the country's oil requirements at

present. India's economic performance has attracted considerable commentary and controversy. Since 1950, India's approach to economic development has been within the framework of a mixed economy, which has resulted from both pragmatic and political considerations. The objective of this book is to provide an understanding of the economy with its nature and structure, dominance of unorganized sector, natural resources, economic and social infrastructure, demographic features, poverty, unemployment, inequality, national income, saving and investment, role of noneconomic factors, and sources of data. Despite being a part of the eight-volume series on the Indian economy, this second volume in the series is in the nature of an introductory essay designed to provide a succinct nontechnical exposition of India's economic structure, performance, and policies.

The Vatican II was an event of a new facelift for the entire edifice of the Catholic ecclesiology. It called for the renewal in the universal Catholic Church. This book deals with the question: How can the Catholic Church in India accept the council's challenge for renewal and become truly Indian in its being and essence? Undertaking a systematic examination of the post-conciliar ecclesiological development in the Indian Catholic Church, in its existential multi-religious and multi-cultural context, the author attempts to develop an ecclesiological reflection for the Indian context.

Contributed articles on social status of middle class women in India presented earlier at a conference held at Nehru Memorial Museum and Library, New Delhi in October 2003.

Majoritarian State traces the ascendance of Hindu nationalism in contemporary India. Led by Prime Minister Narendra Modi, the BJP administration has established an ethno-religious and populist style of rule since 2014. Its agenda is also pursued beyond the formal branches of government, as the new dispensation portrays conventional social hierarchies as intrinsic to Indian culture while condoning communal and caste- and gender-based violence. The contributors explore how Hindutva ideology has permeated the state apparatus and formal institutions, and how Hindutva activists exert control over civil society via vigilante groups, cultural policing and violence. Groups and regions portrayed as 'enemies' of the Indian state are the losers in a new order promoting the interests of the urban middle class and business elites. As this majoritarian ideology pervades the media and public discourse, it also affects the judiciary, universities and cultural institutions, increasingly captured by Hindu nationalists. Dissent and difference silenced and debate increasingly sidelined as the press is muzzled or intimidated in the courts. Internationally, the BJP government has emphasised hard power and a fast-expanding security state. This collection of essays offers rich empirical analysis and documentation to investigate the causes and consequences of the illiberal turn taken by the world's largest democracy.

India's core goals for Southeast Asia are in basic harmony with those of the United States, including regional stability, peaceful settlement of territorial disputes, and containment of radicalism. Still, America should not expect India to enter any sort of alliance, nor join any coalition to balance against China, but should demonstrate strategic patience and willingness to cultivate a long-term relationship.

This book studies the exclusion and discrimination that is meted out to Scheduled Caste (SC) students in the Indian Higher Education system, and the psychosocial consequences of such practices. It foregrounds the conceptual debates around caste, exclusion, and reservations in Indian academia, discussing the social dominance and the roots of prejudices in the university spaces. The volume reflects upon the fragile social world in which students from the margins struggle for survival in the academic space. It reveals that these students navigate the various facets of academia – like classrooms, pedagogy, scholarships, hostels, peer groups, and teachers – only to find the academic space a dystopian universe. The book also sheds light on suicide cases committed by the marginalized groups as a testimony of protest. Based on in-depth ethnographic research, this book will be of interest to teachers, students and researchers of education, sociology, political science, psychology, and exclusion studies. It will also be useful for policymakers, social activists, NGOs, research centers, and those working in higher education, reservations, public policy, caste, and exclusion studies.

This remarkable study of the British East India Company offers great insight into the formation of the Company, its impact on both England and India, and the social forces that shaped its development. With great detail and rich documentation, Ramkrishna Mukherjee examines a period of 258 years, beginning immediately before the Company's birth and ending with its collapse in 1858. This is an engrossing work that reveals much about what is no doubt one of the most important institutions in the history of British colonialism and of world capitalism generally.

A review of the existing literature on the China-India comparative theme conveys the distinct impression that the literature largely projects China and India as intrinsically competitive entities. While much has been written on where and why China and India are contesting, particularly from a political sense, very little attention has been devoted to mutual collaboration, whether existing or potential. Such possibilities are at their greatest in economics, which will dominate the future China-India relationship.This book explores Sino-Indian ties from a comparative economic perspective and argues that it is erroneous to visualise the ties either from exclusively competitive or collaborative perspectives. The future relationship between the two countries will be characterised simultaneously by two ?C?s: competition and collaboration, which are both linked to common challenges facing them. Arguing that while competition in the economic sphere is inevitable, given their size and aspirations, the book contends that negative externalities from competition will encourage both countries to collaborate and expand the scope of such collaboration. The book's refreshing angle makes it a must-read for those interested in Sino-Indian relationship.

Arguably, the greatest achievement of Swami Vivekananda, one of the most celebrated icons of modern India, was the reconstruction of Hinduism. This he accomplished by reforming the religion in India and changing its image in the West. Indeed, the Hinduism that Vivekananda expounded at the Parliament of World's Religions in Chicago was a new, progressive version of an ancient tradition, devoid of the superstitions and distortions with which it had come to be associated. He revolutionized Hindu faith traditions by turning them into a repository of rational, universal philosophy. This book tries to get to the heart of Swami Vivekananda's legacy and his relevance in the contemporary world. It examines hitherto lesser-known aspects of Swamiji's life and work including his contributions to practical Vedanta, universal religion, science-spirituality and inter-religious dialogue, dharmic secularism,

educational philosophy, poetry, and, above all, to the problem of Indian modernity. Despite the abundance of literature available on him, Swami Vivekananda is still not understood adequately, remaining somewhat of an enigma. A fresh reading of the life and times of the Swami by someone who has studied him closely, Makarand R. Paranjape's detailed, thought-provoking account shows that in Vivekananda's visionary thoughts lay the seeds of the creation of a modern India. This book reclaims Swami Vivekananda's stature as a pioneer of contemporary Hindu thought and nationalism.

This book provides an analytical discussion of the status of disaster risk reduction and governance in an Indian context, drawing examples and lessons from the output of the national and regional level programs and projects and from other relevant experiences in the country. Different types of disasters faced by Indian states are covered, including geophysical and hydrometeorological hazards. The book incorporates and draws upon some of the key lessons from the pre-disaster phase through the disaster phase and finally to the post-disaster phase, thus establishing an effective framework in the form of key lessons learned. The rich content of the book is based on contributions from various stakeholders, from academicians and practitioners to decision makers and nongovernment organizations related to disaster risk management systems in an Indian context. Special emphasis is given to analyzing field experiences from academic perspectives and pointing out key issues along with the relevance of risk governance of disaster risk reduction. The book works as a comprehensive reference in disaster risk governance for disaster managers in India and other countries. The book has 19 chapters organized into four parts. Part I provides the outline and basics of disaster risk governance perspectives at the national level with supporting examples from a global point of view. Part II specifically emphasizes the detailed perspectives on risk governance at the regional and local levels. Part III is devoted to approaches and issues of disaster risk governance and development at various levels, stressing the practices and clear examples of disaster risk governance, policy options, institutional organization, risk-reduction strategies, and key lessons learned. Finally, Part IV highlights risk reduction and cross-cutting issues, focusing on risk mitigation and scientific intervention for disaster risk reduction.

The political context in which historians of India find themselves today, says Sumit Sarkar, is dominated by the advance of the Hindu Right and globalized forms of capitalism, while the historian's intellectual context is dominated by the marginalization of all varieties of Marxism and an academic shift to cultural studies and postmodern critique. In *Beyond Nationalist Frames*, one of India's foremost contemporary historians offers his view of how the craft of history should be practiced in this complex conjuncture. In studies of colonial time-keeping, Rabindranath Tagore's fiction, and pre-Independence Bengal, Sarkar explores new approaches to the writing of history. Essays on contemporary politics consider the implications of the "Hindu Bomb," the rewriting of national history textbooks by Hindu fundamentalists, and the issue of conversion to Christianity. Scholars in all the fields touched by recent developments in South Asian historiography—anthropology, feminist theory, comparative literature, cultural studies—will find this a stimulating and provocative collection of essays, as will anyone interested in Indian politics.
