In Postcapitalism: A Guide to Our Future, Paul Mason outlines the emergence of a new economic paradigm - postcapitalism - partly instigated by rapid developments in information technologies. For Mason, technological innovation fosters myriad changes that can challenge the traditional categories of classical economics to instead offer the possibility of forging a more socially just and sustainable economy.

Paul Mason's 2015 book, Postcapitalism A Guide to Our Future, provides a striking visualization of a possible exit from the disasters of our current capitalist world system to something else: a more life-affirming, empathetic, creativity-fostering and fun world of cooperative progress. But before we get there, we need to manage a couple of problems that capitalism has created for us which present, as the title to Mason's penultimate chapter suggests, a rational case for panic.

My literary diet to date has not included a great deal of economics so I am unable to comment with authority on this, but what I can say is that the ideas in Post Capitalism - a Guide to our Future, are more important than Brexit; more important than keeping the Union together or fighting for

Independence for your own corner of it; whatever your great political passion may be, the themes of this book are almost certainly more important.
