- Soils are one of the most abused resources on Earth.
- Water, wind, and other forces such as climate, soil characteristics, and slope all affect the rate of erosion.
- Erosion can be controlled through planting windbreaks, terracing hillsides, plowing in contours, and rotating crops.

Earth system science aims to understand Earth as a system made up of interacting parts, or subsystems. A system can be any size group of interacting parts that form a complex whole. • In a closed

system, matter does not enter or leave the system. • In an open system, energy and matter flow in- to and out of the system.
