Definition of Cost Principle. The cost principle is one of the basic underlying guidelines in accounting. It is also known as the historical cost principle. The cost principle requires that assets be recorded at the cash amount (or the equivalent) at the time that an asset is acquired. Further, the amount recorded will not be increased for inflation or improvements in market value.
IAS 16 outlines the accounting treatment for most types of property, plant and equipment. Property, plant and equipment is initially

measured at its cost, subsequently measured either using a cost or revaluation model, and depreciated so that its depreciable amount is allocated on a systematic basis over its useful life.

IAS 16 — Property, Plant and Equipment

General Principles of Cost Accounting: Following are the main principles of Cost Accounting: 1. Cause-Effect Relationship: Cause-effect relationship should be established for each item of cost. Each item of cost should be related to its cause as minutely as possible and the effect of the same on the various departments should be ascertained.
