JOB DESCRIPTION - Senior Process Engineer

Other industries that need process/chemical engineers. I loved my time being a process engineer in the oil and gas industry. I worked for service companies, engineering procurement contractor (EPC), operators small, big, private and publically listed, as a full-time salaried employee and as a self-employed contractor.

I worked as a junior Process Engineer for an exploration and production oil company (on-shore) in the desert for about a year. It

is worth noting that while I worked there, the field was past its peak, and uses secondary recovery methods like wate...

An oil and gas engineer is involved in the process of extracting oil and natural gas from reservoirs. They may be drilling engineers, production engineers, or reservoir engineers, according to the Society of Petroleum Engineers (www.energy4me.org). In all these stages, an oil and gas engineer uses petrophysics knowledge to ensure that all drilling operations are conducted accurately and efficiently, while complying with laws and environmental standards.
