Introduction to Hive- A data warehouse on top of Hadoop

Apache Hive is a data warehouse software project built on top of Apache Hadoop for providing data query and analysis. Hive gives a SQL-like interface to query data stored in various databases and file systems that integrate

with Hadoop. Traditional SQL queries must be implemented in the MapReduce Java API to execute SQL applications and queries over distributed data.

HIVE is one of the top Hadoop ecosystem components widely used in the market. If you have good knowledge on data warehouse and SQL then this book will be of immense help in learning HIVE. Defines the architecture and programming very nicely. Personally I like this book. Recommended for analysts, business analyst and of course developers.
