A schedule in a project template has the same set of elements as a schedule in a project. You can create a task hierarchy, associate roles with tasks, define schedule attributes, and set dependencies. A schedule in a project template also supports task modes for each task. Therefore, it supports the scheduling engine.

For simple projects, it may be necessary to enter only the resource name against the project activity (on the Project Plan), especially if using a planning tool such as Microsoft Project. For larger, more complex projects, a full resource plan (provided by this document) should be completed to ensure that the resource allocation is both accurate and appropriate.
