Survivors' voices. We believe that the voices and experience of survivors need to be the touchstone we keep returning to when reviewing implementation of the National Redress Scheme. The breakdown of family and social structures caused by removal and abuse decimated communities. It deeply impacted Stolen Generations survivors.

National Redress Scheme failing Stolen Generations sur-

vivors

To highlight how the population of cancer survivors has changed in the United States, the National Cancer Institute and CDC studied cancer data collected during 1971--2001. This report summarizes the results of that study, which determined that the number of persons living with cancer increased from 3.0 million (1.5% of the U.S. population) in 1971 to 9.8 million (3.5%) in 2001.

Cancer Survivorship --- United States, 1971--2001

A sudden and deadly flu epidemic sweeps the population of the world (Britain in particular) leaving few survivors. Those that remain each have strengths and weaknesses aplenty, perhaps a personal mission to fulfil, and most likely something to hide; some reason to be glad of the fresh start offered them by this disaster.
