 While explorations of these two subjects date back thousands of years, the formal science of psychology is actually quite young. During the late 1800s, Wilhelm Wundt formed the first experimental laboratory devoted to the study psychology, officially marking the beginning of psychology as a discipline separate from philosophy and physiology.

Overview of Psychology for Beginners - Verywell Mind
 Psychologists don't stop at the intersection of stress, disease, and coping. They're also attempting to apply what they know about

human behavior and mental processes to the problems of health in general. They're looking for ways to keep people physically well and trying to find out how people's behavior contributes to illness.

Criminal Psychology: A Beginner's Guide (Beginner's Guides ...
Color psychology is the study of how colors affect our emotions and behaviors. As soon as we perceive color, our brain and endocrine system (the hormone producer) receive the input, releasing hormones throughout our body. As a result, this subconscious interaction has a powerful impact on our emotions.
