This book is designed to serve as a convenient quick-reference guide to the grammar of Classical Sanskrit for the use of university students and others. It is not intended to be a complete grammar of the language. Rather, its purpose is to present, mainly in the form of easily read tables, essential reference information such as the rules of sandhi, the declensional and conjugational paradigms, and the principal parts of major verbs. About two-thirds of the book consists of tables. The remainder is text, with advice on how to use the tables and explanations of the grammatical information has been abstracted, with substantial modification of the presentation, from existing Sanskrit grammars, especially those of Whitney, MacDonell, and Kale.

An exception is the set of three indexes: Index to verb stems, Index to verb endings, and Index to noun endings (Tables 28-30). These probably have no counterpart elsewhere. The manual originated as a set of photocopied notes which was supplied, as a supplement to existing textbooks, to first and second year students of Sanskrit in the Department of Studies in Religion at the University of Queensland. Over a period of seven years those notes were progressively modified and expanded until they became the present fairly comprehensive reference work.

This Key Code and Handbook examines the corporate governance and accountability of Major Banks, their directors and executives which were the central focus of bank, Supervisor, Regulator and governmental activity and public scrutiny in 2018 and 2019. This book explores this responsibility focus by providing evidence from the Global Financial Crisis and beyond with both APRA and ASIC investigating illegal conduct, misconduct and conduct which was below the level of community expectations. This book discusses how the Royal Commission into misconduct in the banking and financial services industry has already given rise to a detailed Final Report whose recommendations are still being put into effect. Further, this book uses evidence provided by the large number of Prudential Standards issued by APRA and investigations into the conduct of Major Banks by Regulators. This book explores governance variables - over 1,700 in number and grouped into 159 'key groupings' or separate categories - which are all indexed to 28 governmental, regulatory and supervisory reports and documents to create a governance code and commentary specifically tailored to Australian banks. Each governance variable is modelled on the Stage 1 Relational Approach contained in Enhancing Firm Sustainability Through Governance. Given the huge interest in the governance of banks, Parts 1 and 2 - explaining the Relational Approach - of Stage 1 were recently published in November 2018 and June 2019 in the Australian Journal of Corporate Law. This book is the largest reference book and handbook in publication worldwide containing the structures, mechanisms, processes and protocols - the checks and balances we call 'governance variables' - that deeply addresses and explains banking accountability and regulation in Australia.
