User Story in Agile is a way of capturing the requirements and description of a software feature from the user's perspective. It is a small piece of work that can be built by the development team during the sprint and is of value to the end user. It describes what a user wants, who the user is, and why they want it.

User Story with Acceptance Criteria and Acceptance Testing. Below is an example of a single user story with both the acceptance criteria and acceptance testing information included. User Story: As an end user, I want to access the human resource database to generate reports, so that I can periodically update the company's staffing contact list.
