## 8G00Z5 - KIDD COMPTON

---

After a night of indiscriminate partying, Rachel sleeps with a close friend's fiancé and is consumed with guilt, until the intensity of her feelings forces her to make a difficult choice

Limited to the history of book fires in England.

With six Academy Awards, four entries on the American Film Institute's list of 100 greatest American movies, and more titles on the National Historic Register of classic films deemed worthy of preservation than any other director, Billy Wilder counts as one of the most accomplished filmmakers ever to work in Hollywood. Yet

how American is Billy Wilder, the Jewish émigré from Central Europe? This book underscores this complex issue, unpacking underlying contradictions where previous commentators routinely smoothed them out. Wilder emerges as an artist with roots in sensationalist journalism and the world of entertainment as well as with an awareness of literary culture and the avant-garde, features that lead to productive and often highly original confrontations between high and low.

'A groundbreaking work . . . Federici has become a crucial figure for . . . a new generation of feminists' Rachel Kushner, author of *The Mars Room* A cult classic since its publi-

cation in the early years of this century, *Caliban and the Witch* is Silvia Federici's history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages through the European witch-hunts, the rise of scientific rationalism and the colonisation of the Americas, it gives a panoramic account of the often horrific violence with which the unruly human material of pre-capitalist societies was transformed into a set of predictable and controllable mechanisms. It is a study of indigenous traditions crushed, of the enclosure of women's reproductive powers within the nuclear family, and of how our modern world was forged

in blood. 'Rewarding . . . allows us to better understand the intimate relationship between modern patriarchy, the rise of the nation state and the transition from feudalism to capitalism' Guardian

Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor black tobacco farmer who worked the same land as her slave ancestors yet her cells - taken without her knowledge - become one of the most important tools in modern medicine.

Are there any legends about cats? Is Cinderella an English story? What is (or was) a Mumming Play? The subject of folklore covers an extremely wide field, with connections to virtually every aspect of life. It ranges from the bizarre to the seemingly mundane. Similarly, folklore is as much a feature of the modern technological age as the ancient world, of every part of the country, both urban and rural, and of every age group and occupation. Containing 2,000 entries, from dragons to Mother Goose, May Day to Michaelmas, this new reference work is an absorbing and entertaining guide to English folklore. Aimed at a broad general reader-

ship, the dictionary provides an authoritative reference source on such legendary characters as the Babes in the Wood, Jack the Giant Killer, and Robin Hood, and gives entertaining and informative explanations of a wide range of subjects in folklore, from nosebleeds and wish-bones to cats and hot cross buns.

"Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group

of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life. In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's

films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

The psychologist may appear in science fiction as the herald of utopia or dystopia; literary studies have used psychoanalytic theories to interpret science fiction; and psychology has employed science fiction as an educational medium. *Science Fiction and Psychology* goes be-

yond such incidental observations and engagements to offer an in-depth exploration of science fiction literature's varied use of psychological discourses, beginning at the birth of modern psychology in the late nineteenth century and concluding with the ascendance of neuroscience in the late twentieth century. Rather than dwelling on psychoanalytic readings, this literary investigation combines with history of psychology to offer attentive textual readings that explore five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential-humanism, and cognitivism. The varied functions of psychological discourses in science fiction are explored, whether to popularise and prophesy, to imagine utopia or dystopia, to estrange our everyday reality, to comment on science fiction itself, or to abet (or resist) the spread of psychological wisdom. *Science Fiction and Psychology* also considers how psychology itself has made use of science fiction in order to teach, to secure legitimacy as a discipline, and to comment on the present. "Making and Being draws on the lived experience of Susan Jahoda and Caro-

line Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMFAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educators today"--Page 4 of cover.

This title documents the burgeoning eco art movement from A to Z, presenting a panorama of artistic responses to environmental concerns, from Ant Farms anti-consumer antics in the 1970s to Marina Zurkows 2007 animation that anticipates the havoc wreaked upon the planet by global warming.

This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Com-

posed of more than 600 objects dating from 1740 to 1945.

Feminism is so last century. Surely in today's world the idea is irrelevant and unfashionable? Wrong. Since the turn of the millennium a revitalised feminist movement has emerged to challenge these assumptions. Based on a survey of over a thousand feminists, *Reclaiming the F Word* reveals the what, why and how of today's feminism, from cosmetic surgery to celebrity culture, from sex to singlehood and now, in this new edition, the gendered effects of possibly the worst economic crisis ever. This is a generation-defining book demanding nothing less than freedom and equality, for all.

With numerous examples to supplement her rich theoretical discussion, Nel Noddings builds a compelling philosophical argument for an ethics based on natural caring, as in the care of a mother for her child. In *Caring*—now updated with a new preface and afterword reflecting on the ongoing relevance of the subject matter—the author provides a wide-ranging consideration of whether organizations, which operate at a

remove from the caring relationship, can truly be called ethical. She discusses the extent to which we may truly care for plants, animals, or ideas. Finally, she proposes a realignment of education to encourage and reward not just rationality and trained intelligence, but also enhanced sensitivity in moral matters.

The second print edition of the popular, award-winning, online publication -- a handsomely art-directed digest magazine that mixes art, photography and literature with pop culture, comix and reporting on the news of the day. *Hazlitt #2* is a grim but playful take on the idea of a summer reading issue. Featuring Heather O'Neill, Tao Lin, Lorrie Moore, Daniel Galera, Owen Pallett, Richard Maxwell, Mary Jo Bang and many more. What's inside: · Heather O'Neill sets her house on fire · Tao Lin on your body as vessel or spaceship · The Black Notes of Owen Pallett · Franz Kafka's Josef K. is channeled through Justin Bieber · Nick Hune-Brown on the horrors of teenage embarrassment · Ebola: Nature's most perfect killing machine · Linda Besner on arts funding in the U.S. and Canada · Eating the Heart of Richard

Maxwell—talking with the innovative playwright and theatre director · How to be a Woman, or, Lorrie Moore as the mother you never had · The Life They Planned For You: aerial photography by Christoph Gielen · Poetry by Mary Jo Bang and David Hernandez · New Brazilian fiction by Daniel Galera and Fernanda Torres Also featuring art from Julia Dault, Stephen Appleby-Barr, Kristin Cammermeyer, Lorne Bridgman, and Marmar and Borins. General Editor: Chris Frey Art Director: Jeremy Laing

This work tells the stories of women rulers who shaped the destiny of many countries. It includes sixteen biographies of women who had beauty, intellect, and ambition gaining massive fame on the pages of history. Moreover, the reader will learn much about the history and culture of the various lands that these leaders ruled. Contents include: Semiramis, Queen of Assyria Dido, Queen of Carthage Cleopatra, Queen of Egypt Zenobia, Queen of Palmyra Matilda of Flanders Margaret of Anjou Catharine of Aragon Queen Elizabeth, and Mary, Queen of Scots Queen Catherine De' Medici Queen Anne Maria Theresa, Empress of Aus-

tria Catherine II., Empress of Russia Queen Marie Antoinette The Empress Josephine The Empress Eugénie Queen Victoria

Andrea Dworkin, once called "Feminism's Malcolm X," has been worshipped, reviled, criticized, and analyzed-but never ignored. The power of her writing, the passion of her ideals, and the ferocity of her intellect have spurred the arguments and activism of two generations of feminists. Now the book that she's best known for—in which she provoked the argument that ultimately split apart the feminist movement—is being reissued for the young women and men of the twenty-first century. *Intercourse* enraged as many readers as it inspired when it was first published in 1987. In it, Dworkin argues that in a male supremacist society, sex between men and women constitutes a central part of women's subordination to men. (This argument was quickly—and falsely—simplified to "all sex is rape" in the public arena, adding fire to Dworkin's already radical persona.) In her introduction to this twentieth-anniversary edition of *Intercourse*, Ariel Levy, the author of *Female Chauvinist*

*Pigs*, discusses the circumstances of Dworkin's untimely death in the spring of 2005, and the enormous impact of her life and work. Dworkin's argument, she points out, is the stickiest question of feminism: Can a woman fight the power when he shares her bed?

"The foundational text that gave me life-changing context, helping me to understand who I was and who came before me."—Tourmaline, activist and filmmaker *Transgender Warriors* is an essential read for trans people of all ages who want to learn about the towering figures who have come before them—and for everyone who is part of the fight for trans liberation. This groundbreaking book—far ahead of its time when first published in 1996 and still galvanizing today—interweaves history, memoir, and gender studies to show that transgender people, far from being a modern phenomenon, have always existed and have exerted their influence throughout history. Leslie Feinberg—herself a lifelong transgender revolutionary—reveals the origin of the check-one-box-only gender system and shows how she found empowerment in the lives of transgender

warriors around the world, from the Two Spirits of the Americas to the many genders of India, from the trans shamans of East Asia to the gender-bending Queen Nzinga of Angola, from Joan of Arc to Marsha P. Johnson and beyond. This book was published with two different covers. Customers will be shipped the book with one of the available covers.

For undergraduate and graduate courses in global marketing. The excitement, challenges, and controversies of global marketing. Global Marketing reflects current issues and events while offering conceptual and analytical tools that will help students apply the 4Ps to global marketing. MyMarketingLab for Global Marketing is a total learning package. MyMarketingLab is an online homework, tutorial, and assessment program that truly engages students in learning. It helps students better prepare for class, quizzes, and exams—resulting in better performance in the course—and provides educators a dynamic set of tools for gauging individual and class progress. 2014 Locus Awards Finalist, Nonfiction Category In this hip, accessible primer to the music, literature, and art of Afrofuturism, au-

thor Ytasha Womack introduces readers to the burgeoning community of artists creating Afrofuturist works, the innovators from the past, and the wide range of subjects they explore. From the sci-fi literature of Samuel Delany, Octavia Butler, and N. K. Jemisin to the musical cosmos of Sun Ra, George Clinton, and the Black Eyed Peas' will.i.am, to the visual and multimedia artists inspired by African Dogon myths and Egyptian deities, the book's topics range from the "alien" experience of blacks in America to the "wake up" cry that peppers sci-fi literature, sermons, and activism. With a twofold aim to entertain and enlighten, Afrofuturists strive to break down racial, ethnic, and social limitations to empower and free individuals to be themselves.

This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the

weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

Game of Thrones, one of the hottest series on television, leaves hundreds of critics divided on how "feminist" the show really is. Certainly the female

characters, strong and weak, embody a variety of archetypes—widow queens, warrior women, damsels in distress, career women, priestesses, crones, mothers and maidens. However, the problem is that most of them play a single role without nuance—even the "strong women" have little to do besides strut about as one-note characters. This book analyzes the women and their portrayals one by one, along with their historical inspirations. Accompanying issues in television studies also appear, from the male gaze to depiction of race. How these characters are treated in the series and how they treat themselves becomes central, as many strip for the pleasure of men or are sacrificed as pawns. Some nude scenes or moments of male violence are fetishized and filmed to tantalize, while others show the women's trauma and attempt to identify with the scene's female perspective. The key is whether the characters break out of their traditional roles and become multidimensional.

This is an excellent and timely book for science teachers and for science education students....[Ben-Ari] very success-

fully provides a contemporary introduction to each of these fields [the philosophy, history, and sociology of science], providing numerous examples that science students can identify with to illustrate the points being made...clearly written, well referenced, and illustrated with historical and contemporary episodes....This illustrative material will be welcomed by teachers.-Newsletter of the IHPST (International History, Philosophy and Science Teaching Group)Just a Theory comes just in time. Although we live in an age of science, public misunderstanding of the role and nature of the scientific enterprise has never been greater. In this accessible, engaging and surprisingly complete book, Ben-Ari addresses the big issues; what is science, what do sciences do, how scientific knowledge is produced, why religion and science are not at odds, and why it makes no sense to say that something is just a theory.-William F. McComas, Ph.D., Director, Program to Advance Science Education, Rossier School of Education, University of Southern CaliforniaSome people claim that evolution is just a theory. Do you know what a scientific theory re-

ally is? Just a theory is an overview of the modern concepts of science. A clear understanding of the nature of science will enable you to distinguish science from pseudoscience (which illegitimately wraps itself in the mantle of science), and real social issues in science from the caricatures portrayed in postmodernist critiques.Prof. Ben-Ari's style is light (even humorous) and easy to read, bringing the latest concepts of science to the general reader. Of particular interest is his analysis of the terminology of science (fact, law, proof, theory) in relation to the colloquial meaning of these terms.-Between chapters are biographical vignettes of scientists - both familiar and unfamiliar - showing their common commitment to the enterprise of science, together with a diversity of backgrounds and personalities.This accessible, informative, and comprehensive work will give lay readers a good grasp of real science.Moti Ben-Ari is associate professor in the Department of Science Teaching at the Weizmann Institute, Israel, and the author of six textbooks on computer science. He has received the 2004 ACM SIGCSE Award for Outstanding Contribu-

tions to Computer Science Education.

I know of no better guide for couples who genuinely desire a maturing relationship.M. Scott Peck, author of *The Road Less Traveled* A remarkable bookthe most incisive and persuasive I have ever read on the knotty problems of marriage relationships. Ann Roberts, former president, Rockefeller Family Fund

An award-winning literary author enters the world of magical realism with her World Fantasy Award-winning novel of a remarkable woman in post-apocalyptic Africa. Now optioned as a TV series for HBO, with executive producer George R.R. Martin! Few readers will want, or be able, to resist this modern bestiary. Borges' cunning and humorous commentary is sheer delight.

"This book contains authentic photographs and salient facts covering 358 troopships used in World War II. In addition, other vessels of miscellaneous character, including Victory and Liberty type temporary conversions for returning troops, are listed in the appendices ..."--Pref.

Renaissance Fun is about the technology of Renaissance entertainments in

stage machinery and theatrical special effects; in gardens and fountains; and in the automata and self-playing musical instruments that were installed in garden grottoes. How did the machines behind these shows work? How exactly were chariots filled with singers let down onto the stage? How were flaming dragons made to fly across the sky? How were seas created on stage? How did mechanical birds imitate real birdsong? What was 'artificial music', three centuries before Edison and the phonograph? How could pipe organs be driven and made to play themselves by waterpower alone? And who were the architects, engineers, and craftsmen who created these wonders? All these questions are answered. At the end of the book we visit the lost 'garden of marvels' at Pratolino with its many grottoes, automata and water jokes; and we attend the performance of Mercury and Mars in Parma in 1628, with its spectacular stage effects and its music by Claudio Monteverdi - one of the places where opera was born. Renaissance Fun is offered as an entertainment in itself. But behind the show is a more serious scholarly argu-

ment, centred on the enormous influence of two ancient writers on these subjects, Vitruvius and Hero. Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers. Hero of Alexandria wrote the Pneumatics, a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata. A second book by Hero On Automata-Making - much less well known, then and now - describes two miniature theatres that presented plays without human intervention. One of these, it is argued, provided the model for the type of proscenium theatre introduced from the mid-sixteenth century, the generic design which is still built today. As the influence of Vitruvius waned, the influence of Hero grew.

The Red Circle: My Life in the Navy SEAL Sniper Corps and How I Trained America's Deadliest Marksmen Now including an excerpt from The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF. Brandon Webb's experiences

in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, The Red Circle provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's distinguished second career as a lead instructor for the shadowy "sniper cell" and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors-including Marcus Luttrell and Chris Kyle-that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century,

Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military. Explosive, revealing, and intelligent, *The Red Circle* provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world.

Experience the \*now completed\* bestselling series that fans of Harry Potter and Percy Jackson are raving about.

Lest any reader should open this volume expecting to read an exhaustive treatise on witches and witchcraft, treated scientifically, historically, and so forth, let me disarm him beforehand by telling him that he will be disappointed. The witch occupies so large a place in the story of mankind that to include all the detail of her natural history within the limits of one volume would need the powers of a magician no less potent than was he who confined the Eastern Djinn in a bottle. I have attempted nothing so ambitious as a large-scale Ordnance Map of Witchland; rather I have endeavoured to produce a picture from which a general impression may be gained. I have chosen, that is to say, from the enormous mass of mate-

rial only so much as seemed necessary for my immediate purpose, and on my lack of judgment be the blame for any undesirable hiatus. I have sought, again, to show whence the witch came and why, as well as what she was and is; to point out, further, how necessary she is and must be to the happiness of mankind, and how great the responsibility of those who, disbelieving in her themselves, seek to infect others with their scepticism. We have few picturesque excrescences left upon this age of smoothly-running machine-wheels, certainly we cannot spare one of the most time-honoured and romantic of any. And if anything I have written about her seem incompatible with sense or fact, I would plead in extenuation that neither is essential to the firm believer in witchcraft, and that to be able to enter thoroughly into the subject it is above all things necessary to cast aside such nineteenth-century shibboleths. I would here express my gratitude to the many friends who have assisted me with material, and especially to Miss Muriel Harris, whose valuable help has done much to lighten my task.

Since its first use in 1890,

the electric chair has been the means of legal execution for over 4,300 individuals in 23 states. Its use in recent years has steadily declined, and nowadays many states use the chair only as a museum display. This book provides a history of the electric chair and analyzes its features, its development, and the manner of its use. Chapters cover the early conceptual stages as a humane alternative to hanging, and the rivalry between Edison and Westinghouse that was one of the main forces in the chair's adoption as a mode of execution. Also presented are an account of the terrible first execution and a number of the subsequent gruesome employments of the chair. The text explores the changing attitudes toward the chair as state after state replaces it with lethal injection.

Named One of the 16 Best Young Adult Books of 2016 (So Far) by Paste Magazine! Trixie Watson has two very important goals for senior year: to finally save enough to buy the set of Doctor Who figurines at the local comic books store, and to place third in her class and knock Ben West--and his horrendous new mustache that he spent all

summer growing—down to number four. Trixie will do anything to get her name ranked over Ben's, including give up sleep and comic books—well, maybe not comic books—but definitely sleep. After all, the war of Watson v. West is as vicious as the Doctor v. Daleks and Browncoats v. Alliance combined, and it goes all the way back to the infamous monkey bars incident in the first grade. Over a decade later, it's time to declare a champion once and for all. The war is Trixie's for the winning, until her best friend starts dating Ben's best friend and the two are unceremoniously dumped together and told to play nice. Finding common ground is odious and tooth-pulling-painful, but Trixie and Ben's cautious truce slowly transforms into a fandom-based tentative friendship. When Trixie's best friend gets expelled for cheating and Trixie cries foul play, however, they have to choose who to believe and which side they're on—and they might not pick the same side. Stephanie Perkins meets 10 Things I Hate About You in *The Only Thing Worse than Me Is You*, a fresh, romantic debut from author Lily Anderson inspired by *Much Ado*

*About Nothing*.

The world order built upon the Peace of Westphalia is faltering. State fragility or failure are endemic, with no fewer than one-third of the states in the United Nations earning a "high warning"-or worse-in the Fragile States Index, and an equal number suffering a decline in sustainability over the past decade.<sup>1</sup> State weakness invites a range of illicit actors, including international terrorists, globally networked insurgents, and transnational criminal organizations (TCOs). The presence and operations of these entities keep states weak and incapable of effective governance, and limit the possibility of fruitful partnerships with the United States and its allies. Illicit organizations and their networks fuel corruption, eroding state legitimacy among the governed, and sowing doubt that the state is a genuine guardian of the public interest. These networks can penetrate the state, leading to state capture, and even criminal sovereignty.<sup>2</sup> A growing number of weak and corrupt states is creating gaping holes in the global rule-based system of states that we depend on for our security and prosperity. Indeed, the chapters of this book

suggest the emergence of a highly adaptive and parasitic alternative ecosystem, based on criminal commerce and extreme violence, with little regard for what we commonly conceive of as the public interest or the public good. The last 10 years have seen unprecedented growth in interactivity between and among a wide range of illicit networks, as well as the emergence of hybrid organizations that use methods characteristic of both terrorist and criminal groups. In a convergence of interests, terrorist organizations collaborate with cartels, and trafficking organizations collude with insurgents. International terrorist organizations, such as al-Qaeda and Hezbollah, engage energetically in transnational crime to raise funds for their operations. Prominent criminal organizations like Los Zetas in Mexico and D-Company in Pakistan have adopted the symbolic violence of terrorists—the propaganda of the deed—to secure their "turf." And networked insurgents, such as the Islamic State of Iraq and the Levant (ISIL), the Revolutionary Armed Forces of Colombia (FARC), and the Liberation Tigers of Tamil Eelam (LTTE), have adopted the techniques of both

crime and terror.

The debut series from the double Hugo Award-winning N. K. Jemisin, author of *The Fifth Season* 'Lush and evocative' Naomi Novik, author of *Uprooted* In the city of Shadow, beneath the World Tree, alleyways shimmer with magic and godlings live hidden among mortalkind. Oree Shoth, a blind artist, takes in a homeless man who glows like a living sun to her strange sight. However, this act of kindness is to engulf Oree in a nightmarish conspiracy. Someone, somehow, is murdering godlings, leaving their desecrated bodies all over the city. Oree's peculiar guest is at the heart of it, his presence putting her in mortal danger - but is it him the killers want, or Oree? And is the earthly power of the Arameri king their ultimate goal, or have they set their sights on the Lord of Night himself? The *Inheritance Trilogy* begins with *The Hundred Thousand Kingdoms*, continues in *The Broken Kingdoms* and concludes in *The Kingdom of Gods*.

The summary devotes one page to the subject of identity - how we see ourselves and how others see us. Our personal identity has a huge influence on our future actions, and

this too is something that Robbins believes we have the power to choose and self-correct. The final section of the summary is entitled "A lesson in destiny". It invites us to take full advantage of our time on earth, living each day as if it were the last. It may sound cliché, but it's true. Replete with inspiring quotes by famous thinkers - from Marcus Aurelius to Benjamin Disraeli - this is an inspiring read which will empower you with the right attitude and actions to master your destiny.

This volume is the second half of the novel *Oathbringer*. In *Oathbringer*, the third volume of the *Stormlight Archive* series, humanity faces a new Desolation with the return of the Voidbringers, a foe whose numbers are as great as their thirst for vengeance. The Alethi armies commanded by Dalinar Kholin won a fleeting victory at a terrible cost: The enemy Parshendi summoned the violent Evershorm, and now its destruction sweeps the world and its passing awakens the once peaceful and subservient parshmen to the true horror of their millennia-long enslavement by humans. While on a desperate flight to warn his

family of the threat, Kaladin Stormblessed must come to grips with the fact that their newly kindled anger may be wholly justified. Nestled in the mountains high above the storms, in the tower city of Urithiru, Shallan Davar investigates the wonders of the ancient stronghold of the Knights Radiant and unearths the dark secrets lurking in its depths. And gradually realizes that his holy mission to unite his homeland of Alethkar was too narrow in scope. Unless all the nations of Roshar can put Dalinar's blood-soaked past aside and stand together and unless Dalinar himself can confront that past even the restoration of the Knights Radiant will not avert the end of civilization.

The first full-length study of transgender representations in art, fiction, film, video, and music In her first book since the critically acclaimed *Female Masculinity*, Judith Halberstam examines the significance of the transgender body in a provocative collection of essays on queer time and space. She presents a series of case studies focused on the meanings of masculinity in its dominant and alternative forms' especially female and trans-masculinities as

they exist within subcultures, and are appropriated within mainstream culture. In *Queer Time and Place* opens with a probing analysis of the life and death of Brandon Teena, a young transgender man who was brutally murdered in small-town Nebraska. After looking at mainstream representations of the transgender body as exhibited in the media frenzy surrounding this highly visible case and the Oscar-winning film based on Brandon's story, *Boys Don't Cry*, Halberstam turns her atten-

tion to the cultural and artistic production of queers themselves. She examines the "transgender gaze," as rendered in small art-house films like *By Hook or By Crook*, as well as figurations of ambiguous embodiment in the art of Del LaGrace Volcano, Jenny Saville, Eva Hesse, Shirin Neshat, and others. She then exposes the influence of lesbian drag king cultures upon hetero-male comic films, such as *Austin Powers* and *The Full Monty*, and, finally, points to dyke subcultures as one site for the development of queer

counterpublics and queer temporalities. Considering the sudden visibility of the transgender body in the early twenty-first century against the backdrop of changing conceptions of space and time, *In a Queer Time and Place* is the first full-length study of transgender representations in art, fiction, film, video, and music. This pioneering book offers both a jumping off point for future analysis of transgenderism and an important new way to understand cultural constructions of time and place.
