### Cognos - Report Studio - Tutorial-

### spoint

IBM Cognos Report Studio is a Web-based report authoring tool that professional report authors and developers use to build sophisticated, multiple-page, multiple-query reports against multiple databases. With Report Studio, you can create any reports that your organization requires, such as invoices, statements, and weekly sales and inventory reports.

Users can have access to both the Professional and Express authoring modes, however, they must use Report Studio for Professional authoring mode and Cognos Workspace Advanced for Express authoring mode. To switch from Professional authoring mode to Express authoring mode, the user must exit Report Studio and launch Cognos Workspace Advanced.

IBM Cognos Report Studio: Author Professional Reports Fundamentals (V10.2.2) is designed for professional report authors to learn report building techniques using relational data models, and methods of enhancing, customizing, and managing professional reports. You will participate in hands-on demos and workshops that illustrate key concepts while learning how to use the product.
