It continued to state that only 35% had a few hundred dollars, and 34% had nothing saved. So, only 16% of working adults have more than \$10,000 in savings! And, the Salvation Army says that 33% of people retiring in 2025 don't own a home. Without government assistance, most are going to enter the ranks of the homeless. The number of homeless retirees is growing as more baby boomers retire. I'm sure you don't want that type of life for you and your family. Do your investments benefit you? These statistics are only getting worse. But you don't have to become an unfortunate statistic. You can change your financial security by getting rich. You found the right place: this book is written for you if you make over \$100,000 and want ways to reduce your taxes, save more money in general and make more. It's exactly the book I wish I had a few years ago. When I made my first million dollars, I waited around for an award ceremony that never happened. At that point I started looking around for books, websites, podcasts, or videos to shed light on what do "rich" people do to reduce their taxable income use their money to make even more, and how to save more money now that I'm earning a lot more. But I was shocked to find that there was nothing around. There were a shit ton of stories about how to start a business, how to make \$1,000 a month, seven habits for manifesting money-but what about the guys and girls who actually have a little bit? Stumped, I bent over and paid my taxes like a good citizen. But I knew the super rich understood something I didn't. They had the "bible" of rich shit you do when you have bookoo bucks. I wanted in. Here are a few examples of what they were doing: - Donald Trump has saved \$100 million+ from doing land easements- Most yacht owners expense 50%+ or more from their boat by moving into a charter- Mitt Romney used the IDGT to minimize his \$100 million estate taxes. How do they do it? Answering that question became my mission: to uncover what super rich people are doing that us commoners don't know about, so we can take power back for ourselves. But there wasn't a central repository of this knowledge. So many financial advisors were poor; they gave out information, but hardly any of them followed those strategies themselves. Furthermore, when they did give me advice or when I found suggestions in blog posts, it was unclear how these things actually worked. So I kept asking around to find out what others they did, and took notes. I've interviewed lots of millionaires, wealth managers, and tax strategists to figure out what to do with my own money, and here I'm sharing it with you. Everything in this book is a validated strategy for high earners that I've personally used or talked with someone directly who's done it for themselves.

Most of us want to be rich; we just aren't sure how to get there. Do we fake it till we make it? Do we work smarter, not harder? Do we quit our day job and pursue our dream? What if the answer to becoming rich doesn't lie in the answers to any of these questions, but instead lies in our ability to change our mindset and imitate the greats? This book will show you just that: how to become rich by changing your mindset and by imitating men who are already rich. Give and Grow Rich has been designed so that you get maximum benefit in the least amount of time. Who has time to read more than 100 pages these days? Who would want to? If you want quick solutions, no fluff, and no silly get-rich-quick techniques, then this book is for you. It's like Napoleon Hill's "Think and Grow Rich," but condensed, and more tangible. The same wisdom distilled in a third of the time (and pages). The wisdom doesn't come from me alone, for I started out a poor man just like you. To write this book, I interviewed 7 guys from 7 different income brackets, ranging from \$20,000 per year to \$1 million per year. I asked each of them the same 15 questions, and as I listened to their answers, I saw the trends between the poor, the middle, and the rich. Then, I read the biographies of 7 billionaires from 7 different sectors. Man, did I learn a lot. So I wanted to share the lessons I learned with you. Here's what you can expect: \*\*\*You will learn how the poor, middle, and rich think about money. You will learn how they spend, save, invest, and give.\*\*\* You will learn how your beliefs about money drive your actions.\*\*\* You will learn how two billionaires rose to the top, then gave it all away, and tried to die penniless.\*\*\* If you're a parent, you will learn how you can teach your kids about money. I benefited greatly from writing Give and Grow Rich, so I know you will benefit greatly from reading it. In fact, from the time I started writing the book, to the time I finished, my income doubled! I started thinking like a rich man, imitating rich men, and it is already benefiting me. The same is true for my friends who have implemented these lessons. One of them started out poor, the son of missionaries, and he is making nearly \$200,000 per year. Another started out poor, the son of a single mom, and he is making \$75,000 per year and has started two businesses. So if you want a jam-packed, practical, no fluff guide to becoming rich, read this book. Don't be the person who keeps repeating the past, who keeps spinning out in a financial rut. Don't think that the rich will always get richer and the poor will always get poorer. I am living proof that you can change your mind and change your income. You can imitate the greats and become great. My friends have done the same, and you can too. Be the person who becomes a success story and inspires your community. Be the person who gets out of the financial woes and wills yourself to riches. Change your mind and change your money. GIVE AND GROW RICH.

The summary debunks the idea that becoming rich requires a large income and illustrates the difference between working for money and making money work for you. The messages are more meaningful, relevant and impor-

tant today than they were two decades ago. It rejects the idea that becoming rich requires a huge income. It rejects the idea that housing is a valuable asset. It demonstrates why parents cannot rely on schools to teach their children about money. It defines once and for all an asset and a liability. It teaches us how to teach our children about money so they can be financially successful in the future. 10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Murder In Sylvania is a true history about a grisly murder that happened in a small, quiet community in northwestern Ohio back in 1857. Everything contained in this book was prepared from documents that existed at the time of the murder, and the actual names of people and places are used throughout. The reader will learn about all the gory details of this murder, confessions to other murders, the sentencing and the hanging of a man whose childhood set the stage for this hardened criminal. The murder, committed by Return Jonathan Meigs Ward, was the first case of capital execution in Lucas County, Ohio, and this brutal murder was the last of a series of slayings committed by this first presumed serial killer in the state of Ohio.

Do you wonder just how much extra income tax you're paying, because the rich don't pay their share? You might be surprised. In the well sourced and documented "The Rich Don't Pay Tax ...Or Do They?" John Gaver undertakes a critical look at official IRS collections data to determine which income groups really do or don't pay what portion of the US personal income tax load. He goes on to further analyze the IRS tax data to quantify just how fair or unfair that outcome may be to the various income groups. "The Rich Don't Pay Tax! ...Or Do They?" contains URLs to the source data and lays out the relationships in that data, along with clearly laying out the calculation methods that help bring the IRS data into focus. Then, in a step-by-step manner, Gaver shows how the silent threat of an unintended consequence of our tax code is quietly, but seriously undermining our economy, to the detriment of everyone - rich or poor. Of course, why present a problem without a solution? So, the author shows how a thoroughly vetted plan that has already been presented as a solution to other problems would also solve the problems brought to light in this book, if undertaken soon. Although this book exposes a critical threat to our economy, it's really about a fair and equitable solution that would reverse this threat. While the silent nature of the very serious issues exposed in this book does keep them out of the public eye, the real threat is in who is aware of these issues and what they are doing about it. This book is about what YOU can do about it. Don't delay. Order your copy now.

To achieve this you need to learn the inconvenient truths about the rich. The inconvenient truths contain information about what rich people do. What they do sets them apart from everyone else. The top 5% income earners in the USA know these truths and habits contained in them and apply them every day. Most are taught, at a very early age by their parents, the habits needed to achieve financial success in life. This is why it is true when people say "the rich get richer." The remaining 95% don't know these truths; they are never taught these important truths by their parents or by their schools. As a result, they struggle their whole lives financially. It's time to change this around and this book will make that a reality. In this book

Financial education is not about teaching kids how to get what they want, it is about teaching them how to get what is worth having. What are your kids learning in school? Are they learning about saving, planning, investing, or becoming leaders? Are they learning how to start their own business or how become good employees? Are they learning how to manage credit or to accumulate credit card debt? Are they learning how to solve their financial problems or simply accumulate debt until they go bankrupt? Are they learning how to save on taxes or to pay as much taxes as possible? You should think about what your kids are learning every day because they will grow up fast and the opportunity to help them to become financially prepared will be gone.

More than one million dollars pass through the average person's hands in a lifetime. Yet few people retire with enough money to live comfortably--because they've never learned how to live within their means. Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money--investing, personal finance, and business decisions--is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

There is a difference between scholastic, professional and financial education. The book further analyzes the root cause of why you are not rich. It all boils down to your education. If you make changes to your lifestyle and spending habits today, you will reap the benefits tomorrow. On making money, Laura's approach is simple - she emphasizes on investing, spend less, and plan for a long-term. This isn't something new. We have all heard it. But we never implement it. Even as inequalities widen, the effects of austerity deepen, and the consequences of recession linger, in many countries the wealth of the rich has soared. Why We Can't Afford the Rich exposes the unjust and dysfunctional mechanisms that allow the top 1% to siphon off wealth produced by others through the control of property and money. Leading social scientist Andrew Sayer shows how over the past three decades the rich worldwide have increased their ability to hide their wealth, create indebtedness, and expand their political influence. Aimed at all engaged citizens, this important and accessible book uses simple distinctions to burst the myth of the rich as especially talented wealth creators. But more than this, as the risk of runaway climate change grows, it shows how the rich are threatening the planet by banking on unsustainable growth. Forcefully arguing that the crises of economy and climate can only be resolved by radical change, Sayer makes clear that we must make economies sustainable, fair, and conducive to well being for all.

"So, are you ready to get rich in 30 minutes?" "Is that even possible?" "It, of course, is, if you change your attitude towards (how you can make) money!" Besides, I also guarantee that by the time you finish reading this book, which might take 30 minutes or so on average, you will have become rich, within yourself. You will also learn what money is, the best ways you can make money and some of the fastest ways through which you can get rich! This isn't any self-affirmation guide. This book is full of practical tips that you can put into practice in real life and see the results for yourself. For me, during the course of my learning, it was an art. Now, since it is learned, understood and assimilated, I have converted it into as much of a science as possible. The steps given in this book are easy, practical and definitive! This book is also meant to be universally applicable and not meant for one particular region or continent, as the steps detailed in the book can be applicable in almost all parts of the world. Local laws and certain nuances may differ from one region to another but the book by default and intention suggests only legal ways of getting rich! "If we have only a very narrow understanding or attitude towards money, we will neither make enough money nor get rich ever." "The paradigm shift in attitude from simplistic cause and effect (work and reward) assumptions on money to embracing the slight grey area around how money is made can make you rich." Three Easy Ways to Make Money: 1) Don't be too honest and righteous 2) It is good to learn legal ways of tax avoidance 3) It is okay to use Other People's Money (OPM) "The real trick is in not attracting most of the usual taxes on your income by changing the terms through which you get paid." "Business can hardly happen without talking deals. Much of what I've done in business resulted out of talking deals with others. You have to talk deals with creditors, investors, banks, landlords, raw material suppliers, equipment suppliers, customers, buyers and clients. So, basically there is no business without talking deals." "Large establishments can keep growing for an indefinite period of time with all their power and might but they will also reach saturation sooner than a new entrant into the business. New entrants in an industry are always a threat to the existing players. With innovation, you will be surprised how existing competition is uprooted to make way for you because nature loves innovation, innovators and new way of doing things. Your ability and flexibility to adapt will sure break the rigid structure of an existing corporation." "So, you make way for yourself, when you see something from a completely different vantage point. Even if the reality you believe in is based on fact, you can create new facts, as long as it is not hard science. You can create new logic and override existing ones." "Most of the investors trust human potential more than anything else, as it is other people that make their money for them." "Almost 90% of the billionaires have become rich by leveraging other people's money. Most billionaires' stories are usually rags to riches and there have been very few instances of heirs carrying a legacy forward." "Classically, Steve Jobs started out of a garage. So did Jeff Bezos. Mark Zuckerberg didn't have all the money to make it big; neither did Bill Gates nor did Warren Buffett. Almost all of them leveraged other people's money to become billionaires. It is not the most difficult thing to earn investors' trust." "You can invest only very few thousand dollars. The size of your investment may grow into millions or even billions of dollars!"
