Poetry. In its sharp ear for everyday speech and fascination with the realms that lie beneath the surface of ordinary reality, the lyric poetry of Peter Cole elegantly carries forward a powerful American tradition that merges the visionary with the immediacy of direct experience--a lineage carried from Emily Dickinson and W.C. Williams into the broad possibilities of the present. In the long poems and lyrics of this collection, a poignant vision emerges--of Jerusalem, the Bible, Jewish liturgical writing, and of the secular mystery hidden in the Hebrew tradition. Originally published in a special artist's edition, the much acclaimed RIFT presents an original voice of the highest intensity.

If you are called to ministry, this book is for you! The prophetic

ministry was given to the church to bring order and clarity into the kingdom, but Jesus also warned us in Matthew 24:11 that MANY false prophets would arise, and that they would SUCCEED in deceiving MANY people. This third volume in the best-selling Practice of the Prophetic series serves as a field guide whereby we can identify false prophets, as well as understand their motives and methods and how to expose and thwart their schemes, while also detailing how to restore fallen prophets to God's intended plan for their lives.

This volume presents timely discussions on how digital technology is reshaping broadcasting and the media in the United States and around the world. It features contributions from distinguished scholars and young researchers, representing work that spans domestic and international issues of technological change and the implications for broadcasting and related media in a global context. Among the many issues covered are: The impact of digital technology on the structure of broadcasting organizations and regulation; The nature of broadcast content or media programming and how it is delivered at home and abroad; Engagement and interaction of the public with broadcasting and social and mobile media; and The reshaping of revenue models for broadcasters and media organizations globally. The first two parts of the volume, addressing research challenges, issues, and advances in global broadcasting, are competitively reviewed research papers which were presented at the BEA2014 Research Symposium. The third part focuses on international perspectives, with chapters from broadcasting scholars and paper discussants at the Research Symposium. This section provides reflection on the problems and prospects for research, education, and public policy that arise in this era of rapid and continuing change. As a benchmark of the remarkable changes taking place in today's media environment, the volume sets an agenda for future research on the implications of digital technology for broadcasting and broadcasting education.

To save one life, she risks many others. Working for the Royal Military Police, Major Helen Scott is used to rapid change. On a posting to Paris she oversees security for a NATO summit in the city, yet has barely begun before her presence is demanded at Interpol headquarters in Lyon. Helen's orders are to locate a kidnapping victim - the eldest son of oil magnate Khalil Dalmani. The main suspect is Fawaz bin Nabil, whose fortune has been made from illegal trade familiar to the intelligence agencies. Helen knows the pain of loss and won't rest until Khalil's child is found. Along the way, she crosses paths with old faces and forms new alliances. But who will betray her trust? A stunning new thriller from the author of the acclaimed DI Kelly Porter novels and a rising star in British crime fiction. Praise for The Rift 'A gripping, rollercoaster of a thriller. Great characters, pacy plot with plenty of twists - I couldn't put it down.' Simon McCleave, author of the DI Ruth Hunter Crime Thriller series

Behandler uenigheden og krisen i FN på grund af reaktionerne og angrebet på Irak. Hvad bliver følgerne for forholdet og relationerne mellem USA og Europa og vil vi opleve et splittet og ubeslut-somt FN?

The word 'music' in the early 21st century means many things. It means Mozart in the elevator, 50s pop songs on TV adverts, Finnish folk songs on Nokia 'phones. It means inflammatory Serbian nationalist song, ancient Coptic Church chant, Berlin electronica, Wynton Marsalis. Given this bewildering abundance, how we can speak of a single thing called 'music'? This book will argue that we can. More than that, it will argue that a vast area of cultural practice is at risk of vanishing behind the deafening roar of all those dead simulations of music that fill the airwaves. In this pas-

sionately argued and convincing book Ivan Hewett re-claims the unique place of music should have in our culture in its own right. This thoroughly updated new edition of Bradt's Northern Tanzania Safari Guide remains the only full-length guidebook focussed exclusively on the northern part of the country and Zanzibar. Tailored closely to the requirements of anyone going on a safari to northern Tanzania, followed by a few days on Zanzibar, it provides far more detailed coverage of the local safari circuit and other main attractions than other guides. As such, it offers complete and detailed lodge listings and also goes into greater detail about wildlife and where to see it. It is also the only guide to include detailed information on the many new private concessions that have opened up. Northern Tanzania is dominated by Africa's finest safari circuit. Centred on the legendary Serengeti National Park and its world-famous wildebeest migration, this circuit also incorporates the Ngorongoro Crater and surrounding Ngorongoro Conservation Area, Lake Manyara and Tarangire national parks. Geographically it is one of the most varied regions in Africa, with a palm-fringed Indian Ocean coastline complemented by the scenic wonders of the Great Rift Valley, Africa's largest lake, and several impressive volcanically formed mountains, most notably snow-capped Mount Kilimanjaro, the tallest peak in Africa and a popular goal for hikers. Lesser-known gems include the prehistoric rock art at Kondoa (a UNESCO World Heritage Site), the forested Arusha National Park and Amani Nature Reserve, and the spectacular Ol Doinyo Lengai - Africa's most active volcano. Tanzania is home to more than 100 ethnic groups, from the Arab-influenced Swahili of the coast to the traditionalist Maasai pastoralists and Hadza hunter-gatherers of the Rift Valley, yet it takes pride in a long history of post-independence tolerance, stability and safety. Northern Tanzania offers spectacular game-viewing all year round, and supports some of the world's largest surviving populations of lions, elephants, buffalos, leopards, giraffes, zebra, wildebeest and gazelle. Serviced by a well-developed safari industry, the superlative reserves of northern Tanzania are complemented by a stopover on the legendary Spice Island of Zanzibar. With its atmospheric old town, idyllic beaches and offshore reefs teeming with marine life, it is every bit as evocative as its name. Bradt's Northern Tanzania is written by Philip Briggs, the world's leading writer of guidebooks to Africa, and Chris McIntyre, CEO of specialist Africa tour operator Expert Africa. The guide reflects the growing trend away from large lodges towards small exclusive eco-friendly camps in remote parts of the Serengeti and other major reserves and this edition is more critically selective than previous editions, detailing the best on offer in all price brackets. Also new for this edition is a 48-page colour field guide, detailing all species a visitor can expect to find on a safari in the northern circuit, making this guide the most authoritative source available. Northern Tanzania is an essential travel companion for both first-time visitors and seasoned safari-goers.

Ross K. Dowling and David Newsome present an original, substantial and much-needed contribution to the field to further our understanding of geotourism in theory and practice. This Handbook defines, characterizes and explores the subject through a range of international perspectives and case studies, identifying geotourism as a rapidly emerging form of urban and regional sustainable development. With extensive case studies from North and South America, Europe, Asia, Australasia and Africa, this global Handbook examines and explains the relationship between geology and tourism. Thematically arranged sections cover the relationship of geology with tourism, sustainability and society, geotourism in urban areas, and interpretation and education strategies. The final two sections assess geotourism's impact through wide-ranging case studies of UNESCO global geoparks and geotourism in a range of countries. The eminent academics and practitioners demonstrate how geotourism is the future for engaging the public and protecting geosites, as well as emphasizing the importance of sustainability. An essential resource for students and educators, this Handbook provides an international perspective for those interested in tourism, environmental geography, ecology and geology. Written with practitioners in mind, this book reveals how tourism professionals and geologists should each know about the nexus of their subjects.

Technology's capabilities are always changing. Every day, advancements are made that will ultimately have profound effects on society, yet most of these developments go unnoticed by mainstream news outlets. As a result, the general public has largely been kept in the dark about the latest, greatest, and most exciting technological trends -- many of which are poised to reshape the world completely. This series aims to lift the veil off of these developments and shed light on how each could affect society in the years ahead. This book -- the first in the series -- begins the tour with a look at many areas of the entertainment industry, including television, movies, music, printed media, and video games. Tom Stuczynski is a tech industry insider working as a software engineer at one of the largest software development companies in the world. With over ten years' experience studying technological trends and having obtained degrees in multiple disciplines, Tom has become adept at understanding both the technical limitations and social considerations of cutting-edge technologies. Written for anyone interested in where we are, how we arrived here, and where we're headed, The Impact of Innovation series opens readers' eyes to the world of new possibilities created by technological innovation and its potential impact on society. Follow the blueprint in this book to launch a library DIY community history digitization program—one that provides the access and fosters engagement with patrons to sustain the program over time. • Takes readers through establishing local history digitization projects at the community level from start to finish, providing guidance on how to set up, maintain, and sustain ongoing digitization projects • Describes how to train library users for digitization—instructions that are also applicable for including volunteers in digitization projects • Explains how creating a DIY history digitization project can provide a community benefit and serve as a form of outreach that also enriches a library's local history collection

The rise and spectacular fall of the friendship between the two great philosophers of the eighteenth century, barely six months after they first met, reverberated on both sides of the Channel. As the relationship between Jean-Jacques Rousseau and David Hume unraveled, a volley of rancorous letters was fired off, then quickly published and devoured by aristocrats, intellectuals, and common readers alike. Everyone took sides in this momentous dispute between the greatest of Enlightenment thinkers. In this lively and revealing book, Robert Zaretsky and John T. Scott explore the unfolding rift between Rousseau and Hume. The authors

are particularly fascinated by the connection between the thinkers' lives and thought, especially the way that the failure of each to understand the other—and himself—illuminates the limits of human understanding. In addition, they situate the philosophers' quarrel in the social, political, and intellectual milieu that informed their actions, as well as the actions of the other participants in the dispute, such as James Boswell, Adam Smith, and Voltaire. By examining the conflict through the prism of each philosopher's contribution to Western thought, Zaretsky and Scott reveal the implications for the two men as individuals and philosophers as well as for the contemporary world.

The Journal of Interdisciplinary Science Topics (JIST) forms part of the 'Science in Content' module in the third year of both the BSc and MSci Interdisciplinary Science degrees. It is intended to provide students with hands-on experience of, and insight into, the academic publishing process. The activity models the entire process from paper writing and submission, refereeing other students' papers, sitting on the editorial board that makes final decisions on the papers, to finally publishing in an online journal. This book is a compilation of the papers written by undergraduate students that were published during the 2013/2014 academic year.
