This expanded twelfth edition of the bestselling guide to style is based on the Economist's own updated house style manual, and is an invaluable companion for everyone who wants to communicate with the clarity, style and precision for which the Economist is renowned. As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed out in the guide include: *Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down. Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Answers sometimes are" (Oscar Wilde). Flaunt means display, flout means disdain. If you flout this distinction you will flaunt your ignorance Forgo means do without; forego means go before. Fortuitous means accidental, not fortunate or well-timed. Times: Take care. Three times more than X is four times as much as X. Full stops: Use plenty. They keep sentences short. This helps the reader.

Great Britain is going through austerity. Those affected worst are the poorest and most vulnerable people in society. People who have nothing, are having the tiny amount of money they receive in benefits taken away by a spiteful government hell bent on protecting the very wealthiest, and savagely attacking the very poorest. But the problem is being ignored, or overlooked by the British public, largely due to a corrupt system where most of the media is controlled by the same wealthy people that the government pander to. In Manchester, it seems that one man is determined to put this issue right in the spotlight. His methods are met with disgust and outrage by the population, as he attacks DWP staff from behind as they leave their work, causing them life-changing injuries which shock and upset the entire nation. The DWP workers refuse to show up for work, and the whole British welfare system is thrown into chaos. Pensions and benefit payments aren't being processed and this looks like the biggest crisis to hit the blundering, incompetent government, since the last one. DCI Andy Miller is handed an open cheque-book, and all the resources that he needs to bring this shocking crime-wave to a swift conclusion. The government announce that extra officers are being used. But in austerity Britain, there are no extra officers. Only tired, underpaid and frustrated ones who hate the government just as much as the attacker seems to. Miller and his team are going to have to dig deep and come up with something extra special in order to put a stop to this madness. THE FINAL CUT, the 5th DCI Miller adventure. Gloucester Crescent is a curving, leafy street, tucked between Camden Town and Primrose Hill. It's unremarkable in many ways, unless you notice the lady in the van, and the familiar-looking residents crossing the road ...This is the story of the Miller family and their circle of brilliant, idealistic and intellectual friends in London

in the 60s, 70s and 80s. We follow William through the ups and downs of childhood, as he explores the homes of his famous neighbours, attends dramatic rehearsals with his dad Jonathan Miller, gets drugs and advice from the philosopher A. J. Ayer's wife, and tries to watch the moon landing with Alan Bennett and a room full of writers. Hilarious, and at times heart-breaking, this is also about how we grow up and move on - and what happens when we come back. Not only a picture of an extraordinary time in Britain's cultural history - and a hitherto unseen portrait of some of the brightest minds of a generation - this book tells the funny, tender and moving story of a young boy trying to carve out his own identity.

Gripping Private Eye detective stories set in the industrial North. Three books in one! With the atmosphere of urban decline and inner-city violence, these three murder mysteries are set in the metropolitan area of Salford, Manchester - one of the most deprived areas in England. Ex-rugby player turned social worker Gus Keane is a man who, faced with the disinterest of the Police, becomes a private investigator in order to find out who murdered his boss. Not surprisingly, law enforcement don't want someone meddling in the case, but increasingly they turn to Keane's local knowledge to bring the culprit to justice. Three related detective mysteries in one bumper volume on Kindle As reviewers have remarked, these books form a trilogy but each can be read on its own, without having read the others. This is partly because Gus Keane is an immediately likeable detective: he has his faults, and is always getting into trouble; but he has a way of getting the truth out of people and, hardened to the rough world of Salford, his local knowledge is key. THE THREE BOOKS IN THE TRILOGY TACKLING DEATH: A pacey pulp Private Eye thriller set in a northern English town Ex-rugby football player turned social worker Gus Keane is getting ready for retirement when his boss gets murdered. Finding himself under suspicion, Keane turns private detective to find out the truth. But when he closes in on the killer will Keane come out on top or fall victim to the murderer's desperate moves? DEAD CERTAINTY: Social worker turned Private Eye Gus Keane returns in this gripping murder mystery If something happens in Salford, Manchester, it is generally bad news and when two dead bodies turn up within a few hours of one another, it is no exception. With the local force stretched to the limits and firing blanks ex-rugby player Gus Keane is asked to step in to help find the culprits. What follows is an ever thickening plot as Keane gradually begins to unravel a mystery from Salford's shady past. FALLING FOUL: Private investigator Gus Keane is back with a difficult new case to solve With his ex-wife appearing back on the scene and relations with his girlfriend Marti troubled, the murder of one of Gus Keane's colleagues comes at a really bad time. Yet when his friend Jimmy is accused of the murder, he really must step up to the plate. With his knowledge of the local area, and a healthy suspicion that nothing anyone says is true, private investigator Keane must find the killer before Jimmy is convicted. These books are also available as individual titles on Kindle and are FREE on Kindle Unlimited.

From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today

bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace. When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, Surprise, Kill, Vanish brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

The most significant architectural spaces in the world are now entirely empty of people. The data centres, telecommunications networks, distribution warehouses, unmanned ports and industrialised agriculture that define the very nature of who we are today are at the same time places we can never visit. Instead they are occupied by server stacks and hard drives, logistics bots and mobile shelving units, autonomous cranes and container ships, robot vacuum cleaners and internet-connected toasters, driverless tractors and taxis. This issue is an atlas of sites, architectures and infrastructures that are not built for us, but whose form, materiality and purpose is configured to anticipate the patterns of machine vision and habitation rather than our own. We are said to be living in a new geological epoch, the Anthropocene, in which humans are the dominant force shaping the planet. This collection of spaces, however, more accurately constitutes an era of the Post-Anthropocene, a period where it is technology and artificial intelligence that now computes, conditions and constructs our world. Marking the end of human-centred design, the issue turns its attention to the new typologies of the post-human, architecture without people and our endless expanse of Machine Landscapes. THE OFFICIAL NORTH AMERICAN EDITION! "Beguiling, audacious... rises to its own challenges in engaging intellectually as well as wholeheartedly with its questions about gender, genre and the concept of wilderness. The novel displays wide reading, clever writing and amusing dialogue." —The Guardian This is a new kind of nature writing — one that crosses fiction with science writing and puts gender politics at the center of the landscape. Erin, a 19-year-old girl from middle England, is travelling to Alaska on a journey that takes her through Iceland, Greenland, and across Canada. She is making a documentary about how men are allowed to express this kind of individualism and personal freedom more than women are, based on masculinist ideas of survivalism and the shunning of society: the "Mountain Man." She plans to culminate her journey with an experiment: living in a cabin in the Alaskan wilderness, a la Thoreau, to explore it from a feminist perspective. The book is a fictional time capsule curated by Erin, comprising of personal narrative, fact, anecdote, images and maps, on subjects as diverse as The Golden Records, Voyager 1, the moon landings, the appropriation of Native land and culture, Rachel Carson, The Order of The Dolphin, The Doomsday Clock, Ted Kaczynski, Valentina Tereshkova, Jack London, Thoreau, Darwin, Nuclear war, The Letters of Last Resort and the pill, amongst many other topics. "Refreshingly outward-looking in a literary culture that turns ever inward to the self, although it still has profound moments of introspection. Uplifting, with a thirsty curiosity, the writing is playful and exuberant. Riffing on feminist ideas but unlimited in scope, Andrews focuses our attention on our beautiful, doomed planet, and the astonishing things we have yet to discover." —Ruth McKee, The Irish Times

The Sister is a fast-paced epic story. Suspenseful, and thrilling, it is a mystery that unravels over time, following the lives of a group

of seemingly unconnected people, as they struggle to bring an unusually talented serial killer to justice. CORNWALL, ENGLAND. In the summer of love, 1967, two children witness a murder. One, a seven-year old boy, views it from fifty yards - the other, a young Irish girl, from miles away... LONDON, 2006. With retirement looming, DCI John F Kennedy reopens the only unresolved case in his career, the disappearance of a young nurse, Kathy, twenty-three years earlier. The broadcast appeal for information on the missing teenage runaway, Eilise; is followed by a cold-case reconstruction of Kathy's last known movements. A new witness comes forward, and Kennedy - now set on the trail of a serial killer - unwittingly sparks a sequence of events that lead back to himself, threatening his own, very private existence. As the investigation unfolds, it becomes apparent that the murderer is no ordinary adversary. The Sister is much more than just an ordinary thriller. It is the story of a lifetime... The book is a two part pilot episode with resolution, but left open to a series of planned spin-off self-contained episodes involving a selection of characters from the original story, the first of which is due for release in late spring.

The police have a pretty big problem. Somebody has started shooting unsuspecting citizens dead as they go about their daily business in the north west of England. But it is a very specific type of person that the gun man is targeting. In order to keep the public calm, the police have no alternative but to explain to killer's motive. And that's when things start to get really tricky for the investigating officers. PLEASE NOTE: This book contains bad language.

This novel is a work of extraordinary imagination and wide range. Its playful narrative techniques convey a profound message, both personal and political, about humankind's inability to love and yet our compulsion to go on trying.

This fresh edition of Satish Sekar's classic work brings events up to date as at 2017 and includes matters that the author was prevented from publishing sooner. Among other things it deals with the collapse of the 2011 trial of police officers and others concerning the original miscarriage of justice in this case and in a new Epilogue calls for a Truth and Justice Commission. The author shows how this extreme miscarriage of justice destroyed families, divided communities and undermined confidence in the criminal justice system. The book takes the reader from the sadistic killing of Lynette White in Cardiff in 1988, via the subsequent investigation and trial to the aftermath of the folding of the 2011 trial over 'lost' documents that later materialised. But above all it deals with the hard scientific facts of the first vindication case of the DNA-age.

DCI Miller is faced with a head-ache and a half in the latest Manchester based adventure GONE TOO FAR. Kathy Hopkirk, the nation's most detested "celebrity" has disappeared. Famed for her outrageous remarks and nasty observations about ordinary people in the street and stars from the showbiz world, Kathy has always taken great delight in grabbing the headlines and causing as much controversy as possible. But now she is in the news for a different reason. She is missing. While visiting Manchester for work, she was staying at The Midland. The iconic, world famous hotel was the last place Kathy was seen, CCTV recorded her leaving on foot. Her destination was unknown. Three days later, her disappearance was reported to police by her manager. The sensational news was met with great interest by the British public, though very little surprise or sympathy. Kathy Hopkirk had been pushing it for years. It looks like this time, she may just have gone too far. DCI Miller and his team are overwhelmed by the amount of vitriol and hatred which surrounds the missing woman. Where do they possibly start with this one? Kathy has had thousands of death threats on Twitter alone. DCI Miller is back with another roller-coaster case. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

This Sunday Times bestseller is a shocking and at times darkly funny account of life as a prison officer in HMP Manchester. 'Authentic, tough, horrifying in some places and hilarious in others . . . the author's honesty and decency shine through' - Jonathan Aitken

Neil 'Sam' Samworth spent eleven years working as a prison officer in HMP Manchester, aka Strangeways. A tough Yorkshireman with a soft heart, Sam had to deal with it all - gangsters and gangbangers, terrorists and psychopaths, addicts and the mentally ill. Men who should not be locked up and men who should never be let out. He tackles cell fires and self-harmers, and goes head to head with some of the most dangerous men in the country. He describes being attacked by prisoners, and reveals the problems caused by radicalization and the drugs flooding our prisons. As staffing cuts saw Britain's prison system descend into crisis, the stress of the job - the suicides, the inhumanity of the system, and one assault too many - left Sam suffering from PTSD. Strangeways by Neil Samworth is a raw, searingly honest memoir that is a testament to the men and women of the prison service and the incredibly difficult job we ask them to do.

The instant Sunday Times bestseller from the UK's number one true crime podcast, RedHanded! What is it about killers, cults, and cannibals that capture our imaginations even as they terrify and disturb us? How do we carefully consume these cases and what can they teach us about what makes victims and their murderers our collective responsibility? RedHanded rejects the outdated narrative of killers as monsters and that a victim 'was just in the wrong place at the wrong time.' Instead, it dissects the stories of killers in a way that challenges perceptions and asks the hard questions about society, gender, poverty, culture, and even our politics. With Bala and Maguire's trademark humour, research on real-life cases, and unflinching analysis of what makes a criminal, the authors take you through the societal, behavioural, and cultural drivers of the most extreme of human behaviour to find out once and for all: what makes a killer tick?

Singleton attempts to restore the allegorical elements to the foreground of interpreting the Comedy.
