The Rossetti Infant-Toddler Language Scale is a criterion referenced instrument that assesses Interaction-Attachment, Pragmatics, Gesture, Play, Language Comprehension, and Language Expression. Behaviors can be directly elicited from the child, directly observed, or reported by the parent or caregiver to credit the child's performance.

The Rossetti Infant-Toddler Language Scale was designed to provide the clinician with a comprehensive, easy-to-administer, and relevant tool to assess the preverbal and verbal aspects of communication and interaction in the young child. The examiner has the freedom to determine in more than one way if a child has mastered a behaviour.

### **Rosetti Infant Toddler Language Scale by Deja Brown on Prezi**

Overall, I like the Rossetti Infant-Toddler Language Scale for children under age 3. It provides more detail for those ages than the

PLS-5, which I find helpful when writing goals and explaining targets to parents. For kids over 3, it doesn't have any targets, which is a bit of a bummer.
