One of 8 vols. each covering a different area of the world.

This book presents the 2nd International Conference on Artificial Intelligence and Computer Visions (AICV 2021) proceeding, which took place in Settat, Morocco, from June 28- to 30, 2021. AICV 2021 is organized by the Scientific Research Group in Egypt (SRGE) and the Computer, Networks, Mobility and Modeling Laboratory (IR2M), Hassan 1st University, Faculty of Sciences Techniques, Settat, Morocco. This international conference highlighted essential research and developments in the fields of artificial intelligence and computer visions. The

book is divided into sections, covering the following topics: Deep Learning and Applications; Smart Grid, Internet of Things, and Mobil Applications; Machine Learning and Metaheuristics Optimization; Business Intelligence and Applications; Machine Vision, Robotics, and Speech Recognition; Advanced Machine Learning Technologies; Big Data, Digital Transformation, AI and Network Analysis; Cybersecurity; Feature Selection, Classification, and Applications.

Starting from the premise that a multilateral legal framework is the surest way to achieve predictability and transparency under conditions of increasing reliance on internationally traded energy, the essays gathered in this book

treat the many complex interlocking issues raised by examining that desideratum in the light of current reality. Concentrating on the application of WTO agreements to energy trade - as well as energy-related issues addressed in the current WTO negotiations - the authors offer in-depth discussion and analysis of such issues as the following: the effectiveness of existing WTO agreements in addressing issues pertinent to energy trade how restrictive practices of energy endowed countries can be tackled under existing international trade rules; existing frameworks for investment in highly capital-intensive energy infrastructure projects; and conditions for access to pipelines and transmis-

sion grids; regulation of energy services; bioenergy development and trade; energy issues addressed in the WTO accession negotiations of energy endowed countries; international instruments of resolution of energy-related disputes.

This book uses electricity-sector reforms to question some of the preconceived ideas concerning the MENA region and to provide a broader analysis of related political economy issues. It presents potential further developments of MENA's electricity-sector reforms, taking into consideration the region's unique constraints and opportunities, and discusses the practical limits of reform and deregulation. Specifically, it examines the relationship between reforms and oil prices from a new perspective and presents alternatives to the Single Buyer Model. Complementing existing research on electricity-sector reforms in other emerging markets, the book provides a new analytical framework for assessing reforms that can be easily applied to other markets and sectors.

2011 Updated Reprint. Updated Annually. Saudi Arabia Industrial and Business Directory

"The investment climate in Saudi Arabia has become increasingly conducive for local and foreign investors." Abdulhakim H. Al Khalid, Chairman, Asharqia Chamber of Commerce The Oil & Gas Year Saudi Arabia 2020 charts the transformation of a key oil producer as it pursues wide-reaching plans to diversify the economy away from oil and develop new and varied economic activities. These include increasing non-oil government revenue from USD 43.5 billion to USD 266.6 billion and growing the private sector's contribution to GDP from 40% to 65%, among other reforms. "The kingdom has seen a tremendous transformation over the last three to four years. We are seeing a positive impact of this transformation on our business." Tareq Al Nuaim, president and CEO, Luberef As part of its Vision 2030, the government has been establishing partnerships and channelling local and foreign investment into a flurry of domestic projects, from digitisation and automation programmes to research centres, manufacturing hubs and smart cities. This fifth edition of The Oil & Gas Year Saudi Arabia series provides insight to investors and com-

panies looking at strategic opportunities in the country, at a time when Saudi Arabia is experiencing a transformation to a more diverse and technology-driven hydrocarbons industry.

While Saudi Arabia's economy remains dominated by its hydrocarbons sector, several other sectors have emerged in recent years as key propellers of economic growth. The Kingdom's financial services industries have continued to expand steadily despite the liquidity challenges posed by falling oil prices. Trade and investment are being treated as key priorities as the government looks to negotiate this altered economic landscape, aiming to leverage its large population, high per capita income and many sea and air links. The country's capital markets sector meanwhile is poised for a period of significant growth on the back of the opening of Tadawul to international investors in 2015 and the raft of regulatory upgrades implemented as result. The domestic insurance industry, which remains dominated by the motor and medical segments, has enjoyed double-digit growth over the past five years in both rev-

enue and net profit. Elsewhere the targets outlined in Vision 2030 indicate that a period of greater opportunity and integration is on the horizon for private players operating in core sectors such as health care, utilities, industry and ICT.

Inhaltsangabe: Introduction: The master thesis Worldwide Development of Nuclear Energy and the Strategic Deployment of German Consultancies on the Arabian Peninsula is chiefly targeted at German consultancy companies so that they can assess their status of strategic deployment and prioritize their activities to enter a new business sector in a foreign market. This publication could also be of relevance for policy makers, investors, suppliers as well as nuclear energy and governmental agencies to identify their need for external advisers to safely operate a nuclear power program; provides a guideline for how to enter a new market. Hence this thesis should be considered as an aid to identify hurdles and obstacles that have to be foreseen and so overcome. Potential business fields are also noted as well as important factors that have to be considered to minimize the chance of failure

in the new market. Nevertheless, this huge market with its continuously changing constraints and conditions could throw up a lot more obstacles than could be covered in this thesis. Also the internal organizations of individual companies may differ from the one described in the thesis. The objective of this master thesis is thus to set out a set of guidelines for possible approaches. The first two chapters present an overview of the current geographical, political, cultural and economic conditions to familiarize the reader with the background information and constraints needed for the subsequent chapters. The third chapter deals more specifically with the energy market on the Arabian Peninsula, particular in the Kingdom of Saudi Arabia and the United Arab Emirates. This chapter provides information on types of energy, pending developments, country-specific organizations and institutions, as well as means of financing such huge projects. The fourth chapter is devoted exclusively to nuclear energy, starting with the current status and the motivation of the two countries to launch such a development. This is followed by

a description of the legal requirements and other commitments as decreed by the countries governments. These specific legal conditions do not just apply within the countries concerned, but companies which do business there are likewise obliged to follow these regulations. Challenges for countries are opportunities for consultants, and identification of these represents is the core content of this chapter. The content of the fifth chapter is the [...]

Vols. for 1970-71 includes manufacturers catalogs. Saudi Arabia Investment and Business Guide - Strategic and Practical Information

This third edition of Doing Business with Saudi Arabia is the definitive English language guide to business practice and commercial opportunity in the Kingdom, the largest economy in the Middle East. This authoritative guide provides an up-to-date appraisal of the current economic and investment climate, a review of market potential in the key sectors, and unique best practice advice on all aspects of commercial engagement with Saudi Arabia. Also included are detailed regional and sectoral profiles.

Includes articles on international business opportunities.

This book examines China's bilateral relations with its established suppliers of crude petroleum and on occasion, petroleum gas products including liquefied natural gas (LNG) based on a five-dimensional framework: political-diplomatic relations, economic-trade relations, military- security relations, cultural relations, and petroleum-energy relations. A five-dimensional approach is comprehensive in nature and offers a complete understanding of China's complex relationships rather than looking solely on more typical perspectives like bilateral trade, security relationships, or energy ties. More often than not, social science literature focuses on one or more aspects of China's bilateral relations, which does not provide a complete picture of the complex nature of its interstate ties. This book endeavors to bridge this gap and look more substantially at China's bilateral relationships with energy-petroleum relations being the key aspect linking each one of them. The specific bilateral relationships examined are China's relations with Angola,

Brazil, Republic of the Congo, Iran, Iraq, Kazakhstan, Kuwait, Oman, Russia, Saudi Arabia, South Sudan, Sudan, United Arab Emirates, and Venezuela. These countries matter because their crude petroleum and petroleum gas product exports account for over 50 percent of China's annual oil consumption.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

This document brings together a set of latest data points and publicly available information relevant for Utilities Industry. We are very excited to share this content and believe that readers will benefit from this periodic publication immensely.

An investor's crucial guide to the changing face of Saudi Arabian business *Business and Entrepreneurship in Saudi Arabia* is an essential reference guide, informing investors on the key issues that define how business will be done as the nation's family-owned businesses change hands. Supported by the U.S.-Saudi Arabian Business Council, this book introduces the reader to the new Saudi entrepreneur and explains why Saudi Arabia's boom deserves more of the world's attention. As the heads of family-owned businesses age and corporate boards are reshaped, business practices will be influenced by the ascension of the country's young leaders. Interviews with young Saudi entrepreneurs describe the challenges, triumphs, failed attempts, and successful endeavors they experience every day as time-tested traditional models bump up against

more modern, innovative ideas and methods. The book's companion website features a variety of useful tools and documents that help readers implement the concepts presented, and the firsthand information provides deep insight into the future of these companies. Saudi Arabia is profoundly influencing the technological advances of multiple industries through increasing collaboration and in-country partnerships with communities around the world. The evolution of the Kingdom's family-owned businesses is becoming more important to investors as young Saudis claim their legacies, and this book provides an insightful understanding of the changing nature of Saudi business. Meet the emerging entrepreneur class of Saudi Arabia Learn how the Saudi boom affects global busi-

ness Discover what investors need to know about the Saudi economy Examine how time and technology is reshaping the way business is done Gain useful insight into the direction management of the Kingdom's growth will take over the next five years The Saudi economy constitutes thirty percent of the Arab world's GDP, and sixty percent of the population is under the age of thirty. Business and Entrepreneurship in Saudi Arabia provides essential information investors need to navigate the changing tide of doing business in Saudi Arabia. Saudi Arabia: Doing Business and Investing in ... Guide Volume 1 Strategic, Practical Information, Regulations, Contacts 2011 Updated Reprint. Updated Annually. Saudi Arabia Export-Import Trade and Business Directory Key initiatives include a

privatisation programme which would see the divestment of a number of state-owned giants, such as the partial listing of Aramco, the creation of the world's largest sovereign wealth fund and the increased participation of women in the job market. The Kingdom has played a key role too on the international stage in 2017, becoming the first country to host President Trump, a visit which resulted in renewed trade and investment commitments on both sides. Meanwhile the country's importance as a trading hub continues to grow thanks to both the various infrastructural upgrades that are taking place to its ports and airports, as well as its geographical advantage as a connector of three continents and its proximity to the Red Sea - through which 10% of world trade travels.
