The near-unanimous consensus among climate

scientists is that the massive burning of gas, oil, and coal is having cataclysmic impacts on our atmosphere and climate. These climate and environmental impacts are particularly magnified and debilitating for low-income communities and communities of color. Energy democracy tenders a response and joins the environmental and climate movement with broader movements for social and economic change in this country and around the world. Energy Democracy brings together racial, cultural, and generational perspectives to show what an alternative, democratized energy future can look like. The book will inspire others to take up the struggle to build the energy democracy movement.

In today's Web 2.0 world, JavaScript and Dynamic HTML are at the center of the hot new approach to designing highly interactive pages on the client side. With this environment in mind, the new edition of this book offers bite-sized solutions to very specific scripting problems that web developers commonly face. Each recipe includes a focused piece of code that you can insert right into

your application. Why is JavaScript & DHTML Cookbook so popular? After reading thousands of forum threads over the years, author and scripting pioneer Danny Goodman has compiled a list of problems that frequently vex scripters of various experience levels. For every problem he addresses, Goodman not only offers code, but a discussion of how and why the solution works. Recipes range from simple tasks, such as manipulating strings and validating dates in JavaScript, to entire libraries that demonstrate complex tasks, such as cross-browser positioning of HTML elements, sorting tables, and implementing Ajax features on the client. Ideal for novices as well as experienced scripters, this book contains more than 150 recipes for: Working with interactive forms and style sheets Presenting user-friendly page navigation Creating dynamic content via Document Object Model scripting Producing visual effects for stationary content Positioning HTML elements Working with XML data in the browser Recipes in this Cookbook are compatible with the latest W3C standards and browsers, including Internet Explorer

7, Firefox 2, Safari, and Opera 9. Several new recipes provide client-side Ajax solutions, and many recipes from the previous edition have been revised to help you build extensible user interfaces for Web 2.0 applications. If you want to write your own scripts and understand how they work, rather than rely on a commercial web development framework, the JavaScript & DHTML Cookbook is a must.

When Gaby Bailleux released the Angel Worm into Australia's prison system, allowing hundreds of asylum seekers to walk free, she also let the cat out of the bag. The Americans ran the prisons, like so many parts of her country, and so the doors of some 5000 American places of incarceration also opened. Both countries' secrets threatened to pour out. Was this a mistake, or had Gaby declared cyberwar on the US? Felix Moore - known to himself as 'Australia's last serving left wing journalist' - has no doubt. Her act was part of the covert conflict between Australia and America. That conflict

dates back to the largely forgotten Battle of Brisbane in 1943, stretches forward to America's security interests in Pine Gap and commercial interests everywhere, and has as its most outrageous act the coup of 1975. Funded by his property-developer mate Woody Townes, Felix is going to write Gaby's biography, to save her, and himself, and maybe his country. But how to

get Gaby to co-operate? What role does her film-star mother have to play? And what, after all, does Woody really want?
