For decades, fixing the United States' broken immigration system has been one of the most urgent challenges facing our country, and time and time again, politicians have passed the buck. With anti-immigrant sentiment rising around the country, and presidential elections on the horizon, it's no surprise immigration reform is on every candidate's agenda. While some candidates offer viable solutions, others perpetuate negative stereotypes and unpractical resolve. Ramos fearlessly questions political tactics, and has undoubtedly become the voice of the Latino vote in the US. It is now more important than ever to remember the role immigrants play in enriching our economy and culture, and to find a way to incorporate the millions of productive, law-abiding workers who have been drawn to the United States by the inexorable pull of freedom and economic opportunity. In this timely book, award-winning journalist Jorge Ramos makes the case for a practical and politically achievable solution to this poignant issue. Ramos argues that we have a simple choice: to take a pragmatic approach that deals with the reality of immigration, or to continue a cruel and capricious system that doesn't work, wastes billions of dollars, and which stands in direct opposition to our national principles.

Why are adults in their twenties and thirties stuck in their parents' homes in the world's wealthiest countries? There's no question that globalization has drastically changed the cultural landscape across the world. The cost of living is rising, and high unemployment rates have created an untenable economic climate that has severely compromised the path to adulthood for young people in their twenties and thirties. And there's no end in sight. Families are hunkering down, expanding the reach of their households to envelop economically vulnerable young adults. Acclaimed sociologist Katherine Newman explores the trend toward a rising number of "accordion families" composed of adult children who will be living off their parents' retirement savings with little means of their own when the older generation is gone. While the trend crosses the developed world, the cultural and political

responses to accordion families differ dramatically. In Japan, there is a sense of horror and fear associated with "parasite singles," whereas in Italy, the "cult of mammismo," or mamma's boys, is common and widely accepted, though the government is rallying against it. Meanwhile, in Spain, frustrated parents and millennials angrily blame politicians and big business for the growing number of youth forced to live at home. Newman's investigation, conducted in six countries, transports the reader into the homes of accordion families and uncovers fascinating links between globalization and the failure-to-launch trend. Drawing from over three hundred interviews, Newman concludes that nations with weak welfare states have the highest frequency of accordion families while the trend is virtually unknown in the Nordic countries. The United States is caught in between. But globalization is reshaping the landscape of adulthood everywhere, and the consequences are far-reaching in our private lives. In this gripping and urgent book, Newman urges Americans not to simply dismiss the boomerang generation but, rather, to strategize how we can help the younger generation make its own place in the world.

Fair trade has come a long way in the last 20 years. The Fair Trade Revolution celebrates the movement's achievement and takes up the challenge of improving more lives through fair dealing with producers. Fair Trade is now mainstream, with large companies like Cadbury's and supermarkets such as Sainsbury's producing and stocking many fair trade products. The authors of this collection, many of whom were responsible for the initial success of Fair Trade, emphasize the importance of ensuring that farmers and other producers remain the main beneficiaries. Punchy chapters, illustrated with many real-world examples, cover all the important issues including the tensions between large and small operators, the impact of recession, environmental policy and the danger of large operators embracing Fair Trade more in word than in practice. Written by the leading lights of the Fair Trade movement, including Harriet Lamb (Executive Director of the Fairtrade Foundation) and Bruce Crowther (Establisher of the world's first Fair Trade Town) this book will inspire activists and consumers to keep making the right choices.

When Harvard-trained sociologist Peter Moskos left the classroom to become a cop in Baltimore's Eastern District, he was thrust deep into police culture and the ways of the street--the nerve-rattling patrols, the thriving drug corners, and a world of poverty and violence that outsiders never see. In *Cop in the Hood*, Moskos reveals the truths he learned on the midnight shift. Through Moskos's eyes, we see police academy graduates unprepared for the realities of the street, success measured by number of arrests, and the ultimate failure of the war on drugs. In addition to telling an explosive insider's story of what it is really like to be a police officer, he makes a passionate argument for drug legalization as the only realistic way to end drug violence--and let cops once again protect and serve. In a new afterword, Moskos describes the many benefits of foot patrol--or, as he calls it, "policing green."

"The introductory sociology class provides the ideal laboratory in which to study our own society and those of our global neighbors. The distinctive emphasis on social policy found in this text shows students how to use the sociological imagination in examining such public policy issues as sexual harassment, the AIDS crisis, welfare reform, the death penalty, and the offshoring of service jobs." Richard T. Schaefer

This Fourth Edition of a well-established text on physical geography provides rigorous coverage of the topic at the undergraduate level. It includes a full-color art program and increased attention to environmental issues.

This book contains an overview of research on the interaction of biological and sociological processes. Issues explored include: the origins of social solidarity; religious beliefs; sex differences; gender inequality; human happiness; social stratification and inequality; identity, status, and other group processes; race, ethnicity, and discrimination; fertility and family processes; crime and deviance; cultural and social change.

Three basic premises guide this highly successful introductory text - first that theory and research must be both comprehensive and clear, second that the text must show how sociology is relevant both to the study of society and to students' lives and third that sociology can play a valuable role in teaching critical thinking skills. To that end, this solid, well respected text combines a balanced three-perspective approach with excellent student oriented examples, and distinctive social policy sections in a concise presentation that offers an alternative to full length books.

SOLOMON J. WICKEY · Member of the Old Order Amish faith · Iri-

dologist · Master Herbalist · Born with a God-given gift to heal · Falsely accused of practicing medicine without a license · Widely known throughout the USA and world · Breeds and raises registered Standardbred horses · Happy, fun loving, musician, carpenter, gardener, fisherman; devoted husband, father, brother, friend. Historically, when God decides to send mankind in a new direction, He sends a messenger, or sometimes an entire army to lead the way. Although for thousands of years messengers have been trying to show people the way to achieve perfect, optimal health, each has presented it in a different way, and since God will not be denied, we can expect legions of new messengers shouting with even stronger voices until they finally "get it." Solomon J. Wickey was sent to deliver the most profound message of all; tap into God's power to heal by sending a coded signal to the body via silent thought. Solomon has successfully demonstrated this method by restoring health where there was little, if any, hope, and improving the quality of life for tens of thousands. The mere possibility of achieving instant results without pain or debilitating side effects, is exciting for those willing to take charge of their own lives; their own health.

This encyclopedia offers a comprehensive look at the roles race and ethnicity play in society and in our daily lives. Over 100 racial and ethnic groups are described, with additional thematic essays offering insight into broad topics that cut across group boundaries and which impact on society.

In this work, the authors report on the yearlong 'financial diaries' of villagers and slum dwellers in Bangladesh, India, and South Africa. The stories of these families are often surprising and inspiring. In these early 20th century literary essays, Stefan Zweig offers a Central European view of the writers he believed to be the "three greatest novelists" of the 19th century: Balzac, Dickens, and Dostoevsky. In Zweig's view, Balzac set out to emulate his childhood hero Napoleon. Writing 20 hours a day, Balzac's literary ambition was "tantamount to monomania in its persistence, its intensity, and its concentration." His characters, each similarly driven by one desperate urge, were more vital to Balzac than people in his daily life. In Zweig's reading, Dickens embodied Victorian England and its "bourgeois smugness". His characters aspire to "A few hundred pounds a year, an amiable wife, a dozen children, a well-appointed table and succulent meats to entertain their friends with, a cottage not too far from London, the windows giving a view over the green countryside, a pretty little garden, and a modicum of happiness." The ideal of middle-class respectability suffuses Dickens' fiction. Dostoevsky drew on the struggles of his own life to illuminate the contradictions of the human soul. In Zweig's view, his heroes had no desire to be citizens or ordinary human beings. While Balzac's heroes "would gladly have subjugated the world, Dostoevsky's heroes wished to transcend it."

Szasz argues that when consumers believe that they are buying a defense--organic, natural, or green products--from environmental hazards, they feel less urgency to actually do something to fix the problem. To achieve real security, he believes consumers must give up the illusion of individual solutions and together seek substantive reform.

"Cutting, burning, branding, and bone-breaking are all types of self-injury, of the deliberate, non-suicidal destruction of one's own body tissue, a practice that emerged from obscurity in the 1990s and spread dramatically as a typical behavior among adolescents. Long considered a suicidal gesture, *The Tender Cut* argues instead that self-injury is often a coping mechanism, a form of teenage angst, and expression of group membership, and a type of rebellion, converting unbearable emotional pain into manageable physical pain. An important portrait of a troubling behavior, *The Tender Cut* illuminates the meaning of self-injury in the 21st century, its effects on current and former users, and its future as a practice for self-discovery or a cry for help."--P. [4] of cover.

Kate decides to be a cowgirl and has some interesting experiences.

Globalization makes it difficult to know where the things you buy come from. Journalist and travel writer Kelsey Timmerman wanted to know where his clothes came from and who made them, so he traveled from Honduras to Bangladesh to Cambodia to China and back. Along the way, he met the people who made his favorite clothes and learned as much about them as he did about globalization itself. Enlightening and controversial at once, this book puts a human face on globalization.

*Black Picket Fences* is a stark, moving, and candid look at a section of America that is too often ignored by both scholars and the media: the black middle class. The result of living for three years in "Groveland," a black middle-class neighborhood on Chicago's South Side, sociologist Mary Pattillo-McCoy has written a book that explores both the advantages and the boundaries that exist for members of the black middle class. Despite arguments that race no longer matters, Pattillo-McCoy shows a different reality, one where black and white middle classes remain separate and unequal. "An insightful look at the socio-economic experiences of the black middle class. . . . Through the prism of a South Side Chicago neighborhood, the author shows the distinctly different reality middle-class blacks face as opposed to middle-class whites." —Ebony "A detailed and well-written account of one neighborhood's struggle to remain a haven of stability and prosperity in the midst of the cyclone that is the American economy." —Emerge

*Extraordinary Groups* has had a storied history of excellence over multiple editions. Now available from Waveland Press at the start of its fifth decade of availability, its interdisciplinary approach to groups engaged in unconventional lifestyles makes it a popular textbook choice in hundreds of college courses across the social sciences, including anthropology, religion, history, and psychology. Written by sociologists, using and illustrating sociological principles, the book is appealing because it is descriptive and explanatory rather than analytical. Descriptions of the groups are interwoven with basic sociological concepts, but systematic analysis and inductive reasoning are left to the discretion of the instructor. *Extraordinary Groups* is a compelling overview of the broad tapestry of social life that constitutes the United States. The illustrated, full-featured Ninth Edition includes a glossary and end-of-chapter key terms, sources on the Web, and selected readings.
