Paula Porter has been writing since the seventh grade, when Mr. Kirk named her editor of the *Minden, Iowa, Junior High Newspaper*. She has an AA in Journalism from Iowa Western Community College, a BA in Journalism from the University of Nebraska at Omaha, a BA in Elementary Education from Buena Vista University, a MA in English Creative Writing from Iowa State University, and is completing her dissertation for a Ph.D. in Instructional Design for Online Learning from Capella University. Porter is a published poet and essayist, as well as a technical editor and Internet senior editor. When not teaching in the classroom or online at several colleges, Porter can be found cleaning stalls and tack or riding her horses, Odie and Tucker. Writing a research paper is easy, once students understand the process. The focus of this text is to help students learn, not only how to format an APA research paper, but how to "research smart, not hard." Not only does this book provide step-by-step instructions in creating APA templates for Microsoft Word 2003 and 2007, but helps students avoid intimidation by citations and references once they learn the mnemonics for both. By following a few simple steps, the dreaded research paper can be tamed. After teaching freshman English for sixteen years, I was delighted to use Paula Porter's 7 Steps to Researching and Writing an APA-formatted Research Paper for my Composition I and II classes. This book provides instruction in database and Internet research, as well as all the stages of the writing process, the most daunting task for college writers. Porter has combined higher level thinking skills of analysis, synthesis and evaluation with well-explained strategies in steps that lead to success for those who follow them. Dr. Diane Strauser Alvarez Porter has broken down a dense set of information into carefully constructed units designed to facilitate students' easy application of the requirements for APA format and essay writing. Her concise and methodical approach to the material is a boon for any writing course, and her approach utilizes her experience both as a student required to write in this citation style and as an instructor who has encountered the front lines with her students. Simple in its diction, it is not simplistic in what it affords for student success. AnneMarie Fowler, English and Literature Faculty

"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (PC) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper—the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of Writing a Research Paper (by Lionel Menasche, 1998) and partly a companion to The ESL Writer's Handbook. Each section of the book includes a discrete task called a Building Block, which requires students to apply the skills learned toward the development of

their own paper. This step-by-step approach allows students to construct knowledge as they become more familiar with the process, making writing a research paper a less intimidating task. Special features: This guide uses simple direct language for those for whom writing a research paper is new. Most example writing is from international students in an ESL program or first-year writing class, including two sample papers—one in APA and one in MLA. A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft. A subsection dedicated to constructing clear and cohesive paragraphs and sentences. The guide includes citation and style examples in MLA 8th edition.

WRITING FOR PSYCHOLOGY, Fourth Edition offers concise assistance for students writing their research analyses using APA style. This manual will help students adhere to the basics of APA style; refine critical thinking skills, library search skills, revising skills, editing skills, and proofing skills; and avoid plagiarism. Checklists precede a summary at the end of every chapter, giving students the chance to make sure they have been thorough in their reports. THE RESEARCH WRITER helps students transition from writing the research paper to doing research writing, from reporting information to working with ideas. The subtitle--Curiosity, Discovery, Dialogue--signals this shift: this handbook promotes research as a curiosity-driven activity that leads to discoveries that are then shared through various types of dialogue. With this practical and reader-friendly handbook, students will learn the research and writing skills needed for any research project and will be able to apply and transfer these skills to their own disciplines. Students can use THE RESEARCH WRITER to become more intelligent, ethically aware researchers, able not just to avoid plagiarism but to write with credibility while navigating the twenty-first century digital landscape. The ESL Writer's Handbook is a reference work for ESL students who are taking college-level courses. Because its purpose is to provide help with the broad variety of writing questions students may have when working on school assignments, the text focuses on English for Academic Purposes. Unlike other handbooks on the market, this book's sole purpose is to address the issues of second language learners. The spiral-bound Handbook complements a student writer's dictionary, thesaurus, and grammar reference book. It would be suitable as a text for an advanced ESL writing course when used together with the companion Workbook (978-0-472-03726-1). The new edition features significant revisions to Sections 3 and 4; in particular, both APA and MLA style guides have been updated and new sample papers for each are included. The new edition includes new and revised exercises and many new samples of student writing. Like its predecessor, the 2nd Edition has these special features: The topic selection is based on ESL writers' needs as observed by the authors over many years. The coverage of topics is more complete than the limited amount usually provided for ESL writers in first language or L1 handbooks. The explanatory language is appropriate for ESL students, in contrast to the more complex and idiomatic language of other English handbooks. Many of the examples of paragraphs, essays, research papers, and exercise sentences were written by ESL students to help users realize that they too can become effective writers.

Designed specifically for undergraduate writing, this easy-to-use pocket guide provides complete guidance for new writers on effective, clear, and inclusive scholarly communication and the essentials of formatting papers and other course assignments.

The Publication Manual of the American Psychological Association is the style manual of choice for writers, editors, students, and educators in the social and behavioral sciences, nursing, education, business, and related disciplines.

Most students struggle with learning how to find references, use them effectively, and cite them ap-

propriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019.

Robert P. Yagelski's WRITING: TEN CORE CONCEPTS is based on ten fundamental lessons -- the core concepts -- that students must learn to become effective writers. The thorough integration of these core concepts and the space devoted to guiding students through the main composing assignments distinguishes this book from all other writing guides. The text introduces students to the key rhetorical moves of three essential aims of writing (analysis, argument, and narrative) and then offers applied assignment chapters that use the ten core concepts to guide students' thinking and writing. Emphasizing writing as an interaction between a writer and a reader, WRITING: TEN CORE CONCEPTS offers students a way to participate in the important conversations that shape our lives. The second edition includes 21 new readings, new strategies for academic reading, a new section on summary-response essays, updated guidance on finding digital resources and on MLA documentation, and more.
