This book provides a comprehensive guide to procuring, utilizing and monetizing intellectual property rights, tailored for readers in the high-tech consumer electronics and software industries, as well as technology startups. Numerous, real examples, case studies and scenarios are incorporated throughout the book to illustrate the topics discussed. Readers will learn what to consider throughout the various creative phases of a product's lifespan from initial research and development initiatives through post-production. Readers will gain an understanding of the intellectual property protections afforded to U.S. corporations, methods to pro-actively reduce potential problems, and guidelines for future considerations to reduce legal spending, prevent IP theft, and allow for greater profitability from corporate innovation and inventiveness.

This practical and comprehensive handbook offers step-by-step instruction, guiding entrepreneurs of innovative technology startups all the way from idea to profitability. With its easy-to-follow format aimed at both experienced as well as novice entrepreneurs, this book covers all technical, financial, legal, and governmental hurdles facing startups. It discusses common causes of business failure and points out the pitfalls to avoid in getting innovative technology successfully to market.

The four-volume set LNCS 8517, 8518, 8519 and 8520 constitutes the proceedings of the Third International Conference on Design, User Experience, and Usability, DUXU 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014, jointly with 13 other thematically similar conferences. Technological advancements are often regarded as positive, as they are usually expected to make life and business easier. While this can often be the case, it is not always true, and much of the improvement in the realm of technology comes from analysis of new technologies for effectiveness. Technology Management in Organizational and Societal Contexts is a critical scholarly publication that explores the relationship between businesses and institutions and technology and analyzes the outcomes in order to promote improvement. Featuring coverage on a wide range of topics, such as e-services, multimedia in education, and issues of emerging technologies, this publication is geared towards academicians, researchers, and students seeking relevant and current research on the interactions between organizations and technology.

The 13 full, 5 short and 9 poster papers were carefully reviewed and selected from 64 submissions, and are presented together with 3 papers from the Workshop on Near Field Communication for Mobile Applications (NFS). The conference papers are covering mobile ap-

plications development, mobile social networking, novel user experience and interfaces, mobile services and platforms such as Android, iOS, BlackBerry OS, Windows phone, Bada, mobile software engineering and mobile Web, mobile payments and M2M infrastructure, mobile services such as novel hardware add-ons, energy aware services or tools, NFC-based services, authentication services.

Provides a basic introduction to the tablet computer, covering topics such as getting online, navigating the Web, downloading apps, using Facebook and Twitter, playing music, setting up email.

Intelligent autonomous systems are emerged as a key enabler for the creation of a new paradigm of services to humankind, as seen by the recent advancement of autonomous cars licensed for driving in our streets, of unmanned aerial and underwater vehicles carrying out hazardous tasks on-site, and of space robots engaged in scientific as well as operational missions, to list only a few. This book aims at serving the researchers and practitioners in related fields with a timely dissemination of the recent progress on intelligent autonomous systems, based on a collection of papers presented at the 12th International Conference on Intelligent Autonomous Systems, held in Jeju, Korea, June 26-29, 2012. With the theme of "Intelligence and Autonomy for the Service to Humankind, the conference has covered such diverse areas as autonomous ground, aerial, and underwater vehicles, intelligent transportation systems, personal/domestic service robots, professional service robots for surgery/rehabilitation, rescue/security and space applications, and intelligent autonomous systems for manufacturing and healthcare. This volume 1 includes contributions devoted to Autonomous Ground Vehicles and Mobile Manipulators, as well as Unmanned Aerial and Underwater Vehicles and Bio-inspired Robotics.

These proceedings contain research papers presented at the 5th International Conference on Dynamics in Logistics, held in Bremen, Germany, February 2016. The conference is concerned with dynamic aspects of logistic processes and networks. The spectrum of topics reaches from modeling, planning and control of processes over supply chain management and maritime logistics to innovative technologies and robotic applications for cyber-physical production and logistic systems.

The growing dynamic confronts the area of logistics with completely new challenges: it must become possible to describe, identify and analyze the process changes. Moreover, logistic processes and networks must be redesigned to be rapidly and flexibly adaptable to continuously changing conditions. The book primarily addresses researchers and practitioners from the field of industrial engineering and logistics, but it may also be beneficial for graduate students.

Unlock the potential of Samsung's Galaxy S II with this jargon-free guide from technology guru Preston Gralla. You'll quickly learn how to shoot high-res photos and HD video, keep your schedule, stay in touch, and enjoy your favorite media. Every page is packed with illustrations and valuable advice to help you get the most from the smartest phone in town. (Note: This book does not cover the Galaxy S3, Galaxy S4, and later models.) The important stuff you need to know: Get dialed in. Learn your way around the Galaxy S II's calling and texting features. Go online. Browse the Web, manage email, and download apps with Galaxy S II's 3G/4G network (or create your own hotspot). Master your media. Shoot and share pictures and video, organize and play your music library—and send it wirelessly to your TV or stereo. Be entertained now. Start watching movies and TV shows while they're still loading. Explore the world. Get news and weather, find a location, and navigate by GPS. Check your schedule. Use the convenient calendar app, and sync it with your Google and Outlook calendars. Preston Gralla is the author of more than 40 books, including Missing Manuals on Droid X2, Xoom, and Galaxy Tab. He's the editor of WindowsDevCenter.com and OnDotNet, and a contributing editor to Computerworld.
