Two award-winning professors, a former admissions officer at a major university (now a counselor at a prestigious high school), and a gifted high school senior (now in the throes of the college admissions process himself) team up to offer you over 600 tips, techniques, and strategies to help you get in to the college of your choice. Comprehensive, yet easy-to-read, this book will teach you: How to size up the colleges you're considering—and come up with a coherent list. What are college nights, college fairs, and college rep visits—and how you can use each to your advantage. What are "holistic", "contextualized", and "legacy" admissions—and how each can work for you. How some schools count "demonstrated interest"—and how you can take advantage of this little-known fact. What are Early Decision, Early Action, and Single-Choice Early Action—and whether any is right for you. How to figure out the true costs of college, and what is the difference between "need-" and "merit-based" aid. What it means when colleges say they meet "100% of demonstrated financial aid" and what "loan-free" means. When and how to make campus visits—and what to do on each. How to prepare for each section of the ACT or SAT—and how to increase your scores. What admissions officers are looking for in your application—and how to give it to them. How to write the all-important Common App essay—and present your extra-curricular activities. How to prepare for an alumni interview—and present yourself in the best light. Whom to ask for letters-of-recommendation—and how to help them write the best possible letter. How to compare your final offers—and, in some cases, substantially improve them. When it's good to wait out the "wait list"—and when not. -and much, much more. When you understand the college admissions process, you can maximize your chance of success. Why not put yourself ahead of the pack?

This update to SAT Wars provides new evidence in the case against standardized college entry tests, including the experiences of test-optional colleges. The Scandal of Standardized Tests sheds significant light on key problems such as: Are the tests stronger proxies for race and family income today than they were 20 years ago? Does going test-optional promote racial and economic diversity? Are there any differences in academic records between students admitted without test scores and those with them? How does testing figure into race-sensitive admissions legal controversies? Why is the College Board's "environmental dashboard" inadequate as a way to create a fair playing field? How are the odds of attending and graduating from college stacked against low-income youths and racial minorities? What does the FBI Varsity Blues sting tell us about college admissions in America? Book Features: Provides 25 years of data on California showing how the correlation of test scores with race has grown over time while their predictive powers have declined. Shows how the disparate results of SAT/ACT scores by race provide grounds for a constitutional challenge to the use of those tests. Provides an overview of our current national situation regarding college applications, attendance, and graduation rates according to family income and college major. Offers a devastating critique of the College Board's "adversity index." Includes a national balance sheet on the experiences of test-optional colleges.
